Editor in Chief **Chris Bieniek** thinks it's funny that digital audio and video are much better than analog, but an analog video-game controller is preferable to a digital one. Recently he's been playing *Tecmo Cup Soccer Game* on the Nintendo Entertainment System and repeating the words "dot... vector... polygon..." to himself, over and over.

Please join us in welcoming our new Executive Editor, **Jim Loftus**, who recently returned from Ohio with a six-pack of Jolt Cola and a humidor filled with Dunhill cigars after a fifteen-month absence from the video-game scene. "Ahh, I just took a long lunch," he remarked as he returned to his old desk.

Another recent addition to the *TIPS & TRICKS* staff is **Tyrone Rodriguez**, who has forsaken his status as an angry young video-game fanzine publisher to accept a full-time, in-house position as our new Associate Editor. We think he'll work out just fine...just as soon as we get him to ditch the alfalfa sprouts and V-8 in favor of BBQ beef and Mello Yello.

Art Director **Ione Flores** still suffers from the blurred vision that resulted from working on the *Tekken 2* strategy guide way back in our October '96 issue. (Just mention *Tekken 3* and she'll run away, screaming.) This photo was taken just before Ione realized that she had mistaken her dog Muchacho for an Oscar Meyer wiener.

Nikos Constant has been reading up on technocracy, a school of thought originating in the 1930s around the belief that the world of the future would be controlled not by politicians and monarchs but by scientists and engineers. He likes to think of *TIPS & TRICKS* as "Cliff's Notes for video games."

Contributor **Betty Hallock** recently took a part-time job at *The Wall Street Journal* (proving to her old *T&T* pals that she's pretty serious about this "journalism" thing after all.) Her responsibilities there include nightly, chauffeur-driven "spy runs" to the offices of a competing newspaper, after which she reports back to her editors by cellular phone.

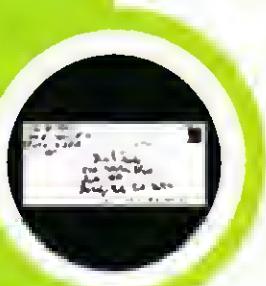

Glenn Broderick made it through this month's *Vandal Hearts* strategy guide with a steady diet of junk food and Howard Stern (no veggies, please.) Glenn lives on the East Coast; close friends say he smokes "like a chimney" and that—as a result—his car smells "like an ashtray".

TIPS & TRICKS Editorial Assistant **Deborah Lockhart** likes to play arcade games—especially fighting games—but still doesn't understand the idea that hitting the buttons as hard as you can does not make your character punch any harder...nor can her computer-controlled opponent hear her screaming at the monitor.

We can't respond to every letter personally, but we do read them all and we enjoy hearing from you—even if you're a weirdo.

LITTLE GREEN SLAB OF CLAY

I am obsessed with game magazines (especially *TIPS & TRICKS*) and Gumby. Why aren't there any video games about Gumby? He is awesome.

—Derek Maxfield
Salt Lake City, UT

Good question, Derek. Maybe it's because there are so many blockhead game designers out there...

MARIO KART MASTER

Well, I beat you. What do I get? Ha ha ha!

—Jeff Martinovich
La Habra, CA

Holy cow, yeah! This is the kind of Mario Raceway time we hoped we'd see! In our March issue, we challenged our readers to beat our best time of 1'28"43 on the Mario Raceway course in Mario Kart 64. Last issue we had upped the ante to a best time of 1'26"99, but you've shattered our record by more than a full second; not an easy task! Please write back and tell us how you did it. Which character did you race with? Where did you use the mushroom speed-bursts?

RANSOM NOTE

I found a secret to the game *Super Mario Kart*. I was wondering if there was money involved. If you would like to know this trick or secret, please write back and I will tell you, if you give me 75 dollars for my awesome ability to find out this trick. I will not accept any amount lower than the price I specified above. I am sorry if the letter sounds rude. I will send this trick to you as soon as you write me back and tell me the amount you will give me!

—Joshua Brown
Newaygo, MI

We don't want to sound rude either, Josh, but our abilities are pretty awesome, too, har har! Check out the Super NES tips in this issue for a list of the Super Mario Kart tips we've found. If your crazy wacky tip isn't one of the codes we've already got, write us back and let us know what it does...you little extortionist, you.

TUROK AND NOT TO ROLL

I just want to ask you to please do a *Turok: Dinosaur Hunter* strategy guide. It would mean a lot to me. I know you don't give a crap about me but I still wanted to ask you. My favorite writer is Nikos Constant; you put him on all of the biggest games. By the way, who chooses the letters that get published? I may as well suck up to you now, so...your mag is awesome! I know this letter won't get printed, I just want a strategy guide for *Turok*, please!

—Matt Musselman
Kokomo, IN

Ahhh, but that's where you're wrong, sir...wrong! We do indeed care about our readers, and this issue's *Turok* strategy guide (part 2) is proof. Every month we tally up the games that our readers ask for on the "Select Games" Response Cards and we really try to give you guys and girls exactly what you want. The Killer Instinct Gold feature in this issue is another example; we thought the game was old news already, but the response cards told us that y'all wanted more information about the game, so there ya go! Remember that you don't have to vote for

games that you see in the Select Games section; you can request a *TIPS & TRICKS* strategy guide on any title at all, even a freakin' Virtual Boy game. If we get enough requests, we'll do our best to keep everybody happy, rozumiesz?

PLEASED TO MEET YOU; HOPE YOU GUessed MY NAME

I was playing *Fighting Vipers* at the arcade yesterday and I noticed some words written on the belly of that big bear statue. It looks like it says "Sinners & Saints" or something like that. Do you know what it says or what it means?

—Allen "Picky" Warner
Beaufort, SC

You're close, Allen; it says, "All the Sinners Saints." This makes about as much sense as the graffiti that says "In Memory of Honey, R.I.P." when it's obvious that Honey (a.k.a. Candy) is alive and well. Anyway, the writing on Kuman's belly comes from the last verse of "Sympathy for the Devil" by the Rolling Stones:

"Just as every cop's a criminal
And all the sinners, saints
As heads is tails, just call me Lucifer
'Cause I'm in need of some restraint..."

SCE ME, FEEL ME...

Ever since you ran the article on the "SCE Girls" in the March '97 issue, I have been CRAZY about them. I must have read the article 20 times. Do you have any more information on them that you could send me? Do you know if they have a fan club that I could write to or get into? Please write back to me as soon as possible and keep those cool magazine articles coming. Thank you very much!

—Mike Powers
Waukesha, WI

Sorry, Mike, but the year-long "SCE Girls" campaign that Sony used to advertise the PlayStation in Japan has been discontinued as of January. The new PlayStation ads in this year's Japanese video-game magazines feature some businesswoman, a bunny and a dumb dog-headed guy in a wool cap. The SCE Girls (a.k.a. the "RGB Girls"; red, green and blue) were great; we'll miss them.

When I bought your January issue, I loved it the second I saw the pages of tips for X-Men vs. Street Fighter. I used to really suck at the game when I first played it, but your magazine helped. I also read T&T every day at study hall in school to waste time. You know as well as I do what it feels like to be a video-game freak! You think you're good, but when a cool new game comes out and you play, someone is there to kick your butt. However, now that I have your magazine, I can beat 11 people in one try with Ryu and Rogue. Even that punk

kid who beat me before and laughed at me; I showed him who is the man.

—Mahmoud El-Gassier
Bakersfield, CA

Mahmoud, knowing what it feels like to be a freak is an important part of the agony and the ecstasy of working for TIPS & TRICKS magazine. Thanks for reminding us what a bunch of introverted geeks we really are. You know, if not for our jobs and a couple of dark, scary arcades, we'd never even leave the house.

LITTLE MANIAC

I hate you, I MEAN IT! Why did you take out the Batman series games from Genesis? (I said that nicely.)

P.S. Show MY PICTURE in your magazine!

P.P.S. Sorry about my other side. Help, stop choking me!

"Bruce," your letter speaks for itself...we think.

MARCI, MARCI, MARCI!

Hi! It's me, Marcia. Thank you for printing my review [in the February, 1997 issue]. I'm happy that you liked it. Hey, maybe someone will take my advice. Anyway, I write about a lot of other things, too. I've enclosed two more reviews to see if I'm really good or just lucky. These are my reviews of Valentine candy:

CHOCOLATE HOUSE STRAWBERRY WHIPPED CREAM HEART

The first bite, for a couple of seconds it tastes like chocolate-covered cherries. But then you can taste the strawberry creme. Good taste and aftertaste. It's very good. Especially the chocolate. You can really taste the strawberry creme. It's very sweet. I give it ★★★★★ stars.

CHOCOLATE HOUSE CHOCOLATE COVERED MARSHMALLOW HEART

It tastes like a s'more without graham cracker and no melted chocolate. It's good. It's pretty thick. The inside is soft and creme-y. I give it ★★★★ stars.

I have a question for Betty: In New York, do you have a "Hello Kitty" store known as Sanrio? Do you ever shop there? I love it! So far I've bought a Pochacco miniature portable radio, a Keroppi bag, a deck of cards, chopsticks, a paper pad, a Pochacco day planner, a jewelry chest, a stamp pad and two things for free.

—Marcia Armon
Bakersfield, CA

P.S. And a pen.

Thanks for the reviews, Marcia; keep 'em coming! We asked Betty your question and she said that she hasn't seen a Sanrio store in the Big Apple, but she has been able to find Hello Kitty stuff in Chinatown and at the Air Market in the East Village, where she recently bought a Hello Kitty pill box to keep her vitamins in.

TEKKEN 3 PLEA

I've been reading your magazine for a year now and you guys do a great job with coin-ops. I saw how quickly you got the moves, strategies and other stuff for *Virtua Fighter 3* and I was wondering if you plan to do the same for the next installment of *Tekken*. Please do!

—Tredog
Portland, TX

You bet, Tre—we'll be all over that game like flies on feces. We're also planning extensive coverage of *Street Fighter EX*, *Street Fighter III*, *Rampage World Tour* and the new *Mortal Kombat* game. Truth is, we LOVE arcade games. We love arcades! The darker and seedier, the better. We love change machines, we love tokens, we love fiddling around with those secret option menus that your friendly neighborhood arcade operator doesn't want you to know about. The only thing we don't like about arcades is that brownish-black groove of melted plastic that appears over a game's START button when some knucklehead parks his cigarette there for too long.

CYNICAL DAD

I own a Sega Saturn and all the video game magazines say that the PlayStation is better than the Saturn. Is that true? Please print this, because my dad told me I was wasting my time because you won't print this.

—"Razor" Rhett Kuritz
Grand Rapids, MI

It's not true, Razor; they're both great systems. Oh, and your dad was wrong!

MOM'S SECRET LIFE

Well, you said you'd enjoy hearing from us even if we seem a little weird. I don't think that I am weird, but some kids might. I am a video game-playing mom and I wanted to tell you that you have the best tips and tricks, codes and information...and all in one mag. I look in my sons' other gaming magazines and they only cover Nintendo or mostly PlayStation. We have the Super Nintendo, Sega Genesis, Nintendo 64, 32X, Game Boy and the Sega Channel on our cable TV system. Thank you for being so versatile.

What I want to know is: What is your opinion of the CD-based video-game systems? Are they sticking around or should I set my sights on something newer? I would like to purchase another system that is, of course, a bit different.

If you can print this and my kids read it—we subscribe to your mag—they will absolutely flip! Kids: This is

what your mom does on her day off while you're in school!

—Susie Vinci
Desert Hot Springs, CA

All right, Susie, you're on! You're not weird at all; we think it's great that you're playing video games while your kids are at school. In fact, the more we think about it, the funnier it gets! Imagine one of your kids cooped up in some stuffy, sweaty classroom...the teacher is droning on and on about some ridiculous algebraic equation...the boredom is so thick you could cut it with a protractor. Suddenly, right in the middle of all of those sniffling, coughing kids and the smell of old chalk, your kid sits straight up and thinks to himself, "Oh, man...mom's at home playing Mario 64 right now!" Ha ha ha!

Seriously, your query about CD systems is among the most frequently asked questions in the *TIPS & TRICKS* mailbag. In our educated opinion, the CD format is going to be around for a long time. It has every advantage over cartridge-based systems with the exceptions of loading/access time and durability, and game developers are finding more clever ways to hide loading time every year. We can't say for sure what Nintendo has in store with its *Nintendo 64* "bulky drive" random access read/write storage peripheral, but we are sure of the fact that most third-party publishers love the CD medium. Manufacturing CDs is faster and less expensive than making cartridges, and it's less risky; if a publisher underestimates the popularity of a game, it can very quickly go into a second or third production run before the game's popularity begins to wane.

If you're asking which CD system we prefer, that's a tougher question to answer. Such a decision should always be made based on the software that's available for each of the systems you're considering. Both the PlayStation and Saturn have great games like *Tomb Raider*, *Street Fighter Alpha 2* and *Madden NFL '97*. The PlayStation doesn't have *Virtual On*, *Sonic 3-D Blast* or *Fighters Megamix*, but the Saturn doesn't have *Tekken 2*, *Formula 1* or *Final Fantasy VII*. Thanks for writing!

I WANT MY MK4

I really enjoyed the *Mario Kart 64* strategy in your March issue. I liked how you rated all of the racers based on speed, handling, etc. I have a quick question for you: When is the *Mortal Kombat* movie sequel coming out? The first one was so great, especially the music! Those clowns who made the insulting *Street Fighter* movie should take notes on how to do it right! Also, will *MK4* be coming to arcades this summer? In case you haven't guessed by now, I'm a *Mortal Kombat* nut!

—George Fenton
Miami Springs, FL

Glad you liked the *Mario Kart 64* strategy, George. The new *Mortal Kombat* movie is currently being filmed in England and should be on track for theatrical release in August. As for the *MK4* coin-op, there have been some minor delays in the game's development and it looks like it won't appear in arcades until August or September. Check out page 51 of this very issue for an *MK4* update, as well as some up-to-the-minute info regarding another new *MK* game called *Mortal Kombat Mythologies*.

PUTTING IT ALL TOGETHER

I want to thank you for giving my brothers and I the greatest video-game tip mag in the universe! The three of us race to the mailbox after school each day at around the middle of the month, because we know that any time, our new issue of *TIPS & TRICKS* will be waiting for us! The winner of the race to the mailbox gets to pick which game we will play when we get inside. Our favorite game right now is *Super Puzzle Fighter II Turbo* for the Saturn. Can you recommend any other puzzle games to play on the Saturn? Thanks!

—Frank Hellevik
Calabasas, CA

Hey, it sounds like you guys are having a blast! If you're looking for more puzzle-type fun, there are three other great games which you and your

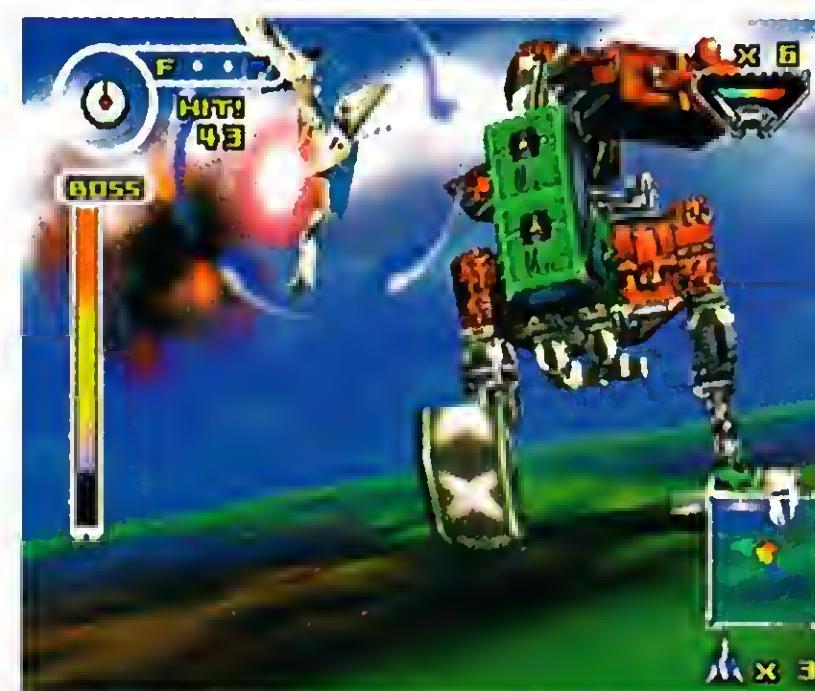

brothers should try: Bust-A-Move 2, Tetris Plus and Baku Baku. All three of these great games are available for the Saturn right now. Although it's a bit more complex than your standard Tetris clone, Tyrone says that Super Puzzle Fighter II Turbo is his favorite puzzle game on any system. (Of course, Tyrone would love a tattered piece of toilet paper as long as it had a Street Fighter logo printed on it!)

SHOCK VALUE

When Nintendo releases its Jolt Pak for the Nintendo 64, how much will it cost and what kind of "jolt" will I really get? Will the Jolt Pak work with all N64 games, or just some specially-programmed ones?

—Matt Lee
Novato, CA

Nintendo's Force Pak—as it's now called—is expected to be released in this country on June 23rd. For about \$12, sources tell us that the Force Pak will not only debut as a solo piece, but also be available as a free pack-in with *Star Fox 64* on or around that very same date. The Force Pak plugs into your N64 controller and is compatible only with select games which take advantage of the technology. As far as the degree of "jolt" you'll get, it's best described as a very mild vibration sent into your controller when you get hit; it's not like the controller is going to leap out of your hand or anything.

COME TO THE DARKSIDE

I am an avid reader of your magazine. I have a subscription to it and keep a copy handy whenever I play. Anyway, I have a question for you. In *Twisted Metal 1*, there is a character who is a semi truck named Darkside. He isn't a selectable character in *Twisted Metal 2*, but his picture is in the opening credits and in the "history" option in the main menu. I was wondering, since they show Darkside's picture, is he a secret character? I was hoping you would know. Thanks a lot!

—Kevin Musolino
Lewis Run, PA

You do not realize the true power of the Darkside, do you, Kevin? The only secret characters we've verified in *Twisted Metal 2* are Sweet Tooth and Minion; we debuted those codes in our January '97 issue. There's a rumor going around that you can play as Dark Tooth, but we're still investigating. We suspect that Darkside was killed at the end of TM1. For proof, watch the "story" option in TM2; you'll notice ol' Darkie bitin' the big one as he runs his big rig off of an L.A. bridge. Hey, he was a jerk with that loud horn, anyway!

A REAL WINNER

I do not make a habit of writing to video game mags, but I feel that it is time to let you know how I feel about you. I don't think I have ever used a magazine as much as I use *TIPS & TRICKS*. What a joy it is to behold each new issue, then use it as my personal tour guide into the realms of video-gaming heaven. What pure satisfaction I receive when I open up a new issue as the sunlight twinkles onto the pages and my hands tremble with anticipation. If it wasn't for you, I'd be...I'd be...oh, I don't know, something really bad would happen to me!

—Jeff Stanquist
Palm Springs, CA

Like what, Jeff—you'd go out into the real world, breathe fresh air and interact with a real, live human? Hee hee...just kidding.

Vandal Hearts

Battle Guide

VANDAL HEARTS
by Glenn Broderick

PlayStation Strategy
Vandal Hearts

The Way of the Vandal Heart-ist

In the pages that follow, you'll find the strategies you need to beat every one of the game's often brain-busting turn-based battles. I do suggest, however, that you try beating the game on your own before you turn to this guide because it is a "spoiler"—it will tell you exactly what you need to do if you want to win each battle and, eventually, the game.

The Casualties of War

Some members of your party will be killed using these strategies; it's a fact of life in the mythical world of Ishtaria. I have tried, however, to keep the casualties to a minimum since each character lost equals a loss of money, which prevents you from purchasing needed equipment. If you can manage to keep at least three or four of your party members alive at the end of the later battles, you'll have more than enough money to buy the necessary equipment.

A Word on Common Sense

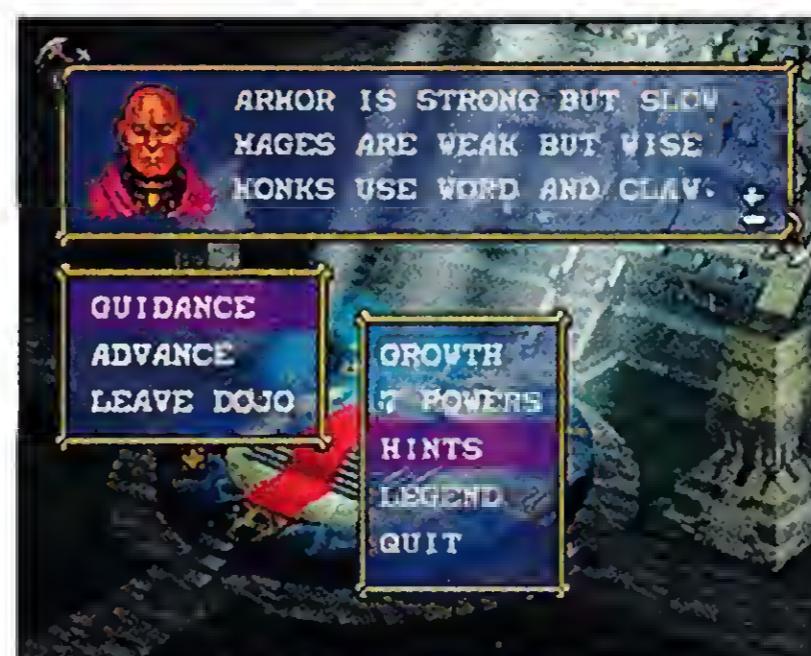

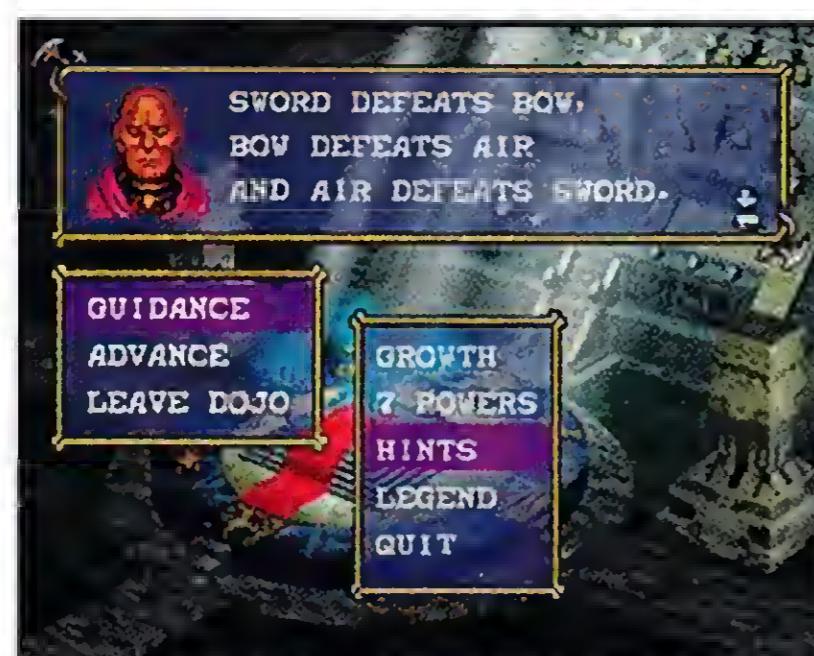

Another assumption I've made with this battle guide is that you'll upgrade your troop of warriors at every available instance. A good way to accomplish this is to visit the Dojo and the Shop after every battle. If you've done a halfway-decent job of keeping your guys alive and killing the baddies, you'll be able to advance your characters to their highest skill levels and equip them with the best armor, weapons and items in a relatively short period of time.

Which Way is Up?

For the sake of simplicity, all of the directions in this battle guide (i.e., right, left, up, down, etc.) are given from each level's default point-of-view. If you mess around with the camera angles (which is very tempting since it looks so darn cool), then you stand the chance of losing your bearings. Be warned!

Rules for Success

- Pay attention to each battle's victory/defeat conditions! You may not have to kill every baddie on screen to win the battle, but you may have to keep a certain member of your party (i.e. Ash, Clint, etc.) alive.
- Although it's definitely tempting to blow all your cash on weapons, you need good armor, too. Be sure to set aside money for the best armor; it could mean the difference between lasting three turns and lasting six to eight turns.
- The battle system in *Vandal Hearts* follows a set of rules very similar to "Rock, Scissors, Paper":
 - 1) Monks are like Knights, but weaker
 - 2) Priests and Mages have strong magical abilities
 - 3) Armor is weak against magical attacks.Be sure to learn it and utilize it when dispatching your troops on the field.
- Your mages (especially in the later levels) are your most important assets; be sure to use their magic points wisely or you they might be dead by the time you really need them.
- Be wary of treasure chests on the battlefields! While many of them contain useful power-ups, even more of them in the later levels contain a type of baddie called a "mimic" that can be a real pain to get rid of.
- Learn how to effectively use Supporting Tactics! You'll be surprised at how much more effective a supported attack is.
- Always remember to save as often as you possibly can!

Chapter 1: A Premonition of War

Battle 1

This first battle against Zoot Gach and his band of thieves is very simple and meant to acclimate you to the gameplay engine (i.e. turn-based strategy/combat.) Once you've learned how to move and attack with your characters, winning this one is a no-brainer. Use Ash to kill the guy behind him, then move him forward to prepare for the fight with Zoot. As Ash moves forward, move Diego and Clint to the top and bottom of the map, respectively, to take care of the bandits in those areas. Once they're dispatched, join Ash to support him in his attack on Zoot.

Battle 2

While slightly more challenging than the first battle, Battle 2 is very forgiving. (You won't believe what you see in later levels!) Since there's no real life-threatening danger here, start off using Clint to grab the treasure and then catch him up with the others on the second turn. Simultaneously, you'll want to send Diego up to the ledge on the right and kill the baddie up there. After this is accomplished, move Clint and Ash up and hit the switch that will operate the bridge. Since you don't want to risk Ash's life against the two baddies above, I suggest sending in Diego and Clint to kill them. Once they're done, you can move Ash safely up and exit the battle.

Battle 3

This semi-challenging battle gives you a taste of the things to come. During your first turn, you should send Diego up to the left to hit the golem up there. Move Clint over to the right and hit the golem there on its right side. During your second turn, you'll need to use Diego to finish off the golem from turn one; meanwhile, move Ash and Clint up to the right to take care of the two golems up there. You should then use a turn to get Diego caught up with the other two. You'll notice a golem will be chasing the group; take him out with a shot from Diego and a sword hit from Ash. What happens next is easier than shooting fish in a barrel: Move everyone to the right side of the bridge and peg the golems with all of your weapons as they come after you. Once they're taken care of, you're free to exit the battle.

Battle 4

This is the battle where the game gets tricky and it only gets trickier as you go along. To start with, you'll have to move everyone in your party (Eleni, Ash, Clint, Diego and Huxley) into a line going from left to right, being sure to keep Huxley behind the other four. Move your group aggressively forward and make sure that Huxley keeps up or he'll fall off the bridge. After the first turn of moving forward, split Diego and Eleni up to the left and right of the bridge while Ash and Clint go right up the center. Remember to use every attack at each character's disposal (including Huxley's healing ability) so you can plow through the enemy's front line. Also, don't forget to utilize Kira when she becomes available; her arrows do some serious damage.

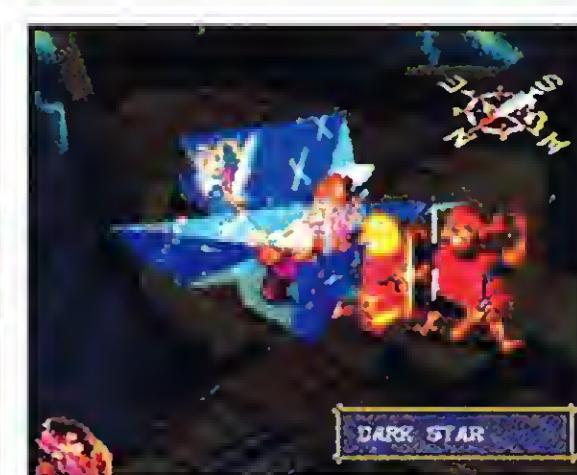

Battle 5

Your first order of business in this battle is to get your entire group to the bottom of the sand dune, using Clint and Ash to lead the way (with Huxley close behind for healing purposes.) Keep Kira and Diego to the left and right and Eleni right behind Huxley. Pummel away the sand worm's head with everything you've got. This is really the first battle that just about requires the use of magic, so you'll have to know what each of your characters has for magic in order to succeed. To do the job right, I recommend repeated use of Ash's Ice Storm and Eleni's Dark Star all aimed directly at the thing's head. If you're using Huxley to constantly heal Ash, this battle should be won in no more than three to four turns.

Battle 6

Another key element of strategy gaming is introduced in this battle at sea: the decoy. As I said in the beginning, losing troops during the course of battle is not only inevitable, it's sometimes necessary to win. You're going to want to move Diego and Eleni to the plank on the right while everyone else moves to the plank on the left. Diego and Eleni will draw approximately half of the troops over to the right side of the map, leaving your five remaining warriors to take care of what's left. A very effective method for taking care of the troops on the right is the supported attack (outlined in the game's manual.) Move two to three players up the plank and Kira at the rear; if she gets an enemy in within her range, shooting at him over the heads of her compatriots gives the arrow support and increases its HPs. Once the thugs are done with, use all the magic at your disposal to take care of Hassan.

Chapter 2: Island of Madness

Battle 1

The most important bit of strategy for this level is a reminder of the battle's objective: You must keep at least one villager alive to successfully complete it! The best way to ensure this is the following: Move Eleni and Grog over to the left as a decoy (and to destroy the evil statue down there); they'll draw a round of the villagers towards them. Move everyone else over to the block on the right. Immediately push the block over to the left, effectively locking the vast majority of the villagers down with Eleni and Grog (who, by the way, will most likely get killed). Now, move Ash's party along the perimeter of the map, killing all the statues as you go.

Battle 2

If you want to survive this one, you've got move aggressively from start to finish. First, move Ash's party quickly through the guard dogs and down into the river bed. Continue moving down the river bed until you've caught up with the other party of fighters. During this progress toward the other end of the river bed, it's important that you keep Clint and Huxley at the front so they can take any potentially deadly hales instead of Ash. You'll need to move the other party of warriors down into the river bed as well, until they've joined forces with Ash and his troops. Move Ash and Dolan to the center of this big group so they don't get killed and use everyone else to take care of baddies.

Battle 3

A big part in victory here is letting your enemies poison themselves on the toxic terrain; once they're poisoned and a turn passes, they're so weakened that one hit from someone in your party will just about kill them. This is also a caveat to you. A wise strategy would be in keeping your troops in one big clump at the center of the map, waiting for the enemies to encroach (since the more you move, the more likely you are to get poisoned yourself.) Keep Ash and a healer at the center of this cluster and use your heavier troops to take the blunt of the attacks. Once the majority of baddies on this screen have been taken care of, you'll most likely have one, pesky arrow shooter left at the top of the screen. Dispatch Clint, along with a healer, up to take care of him.

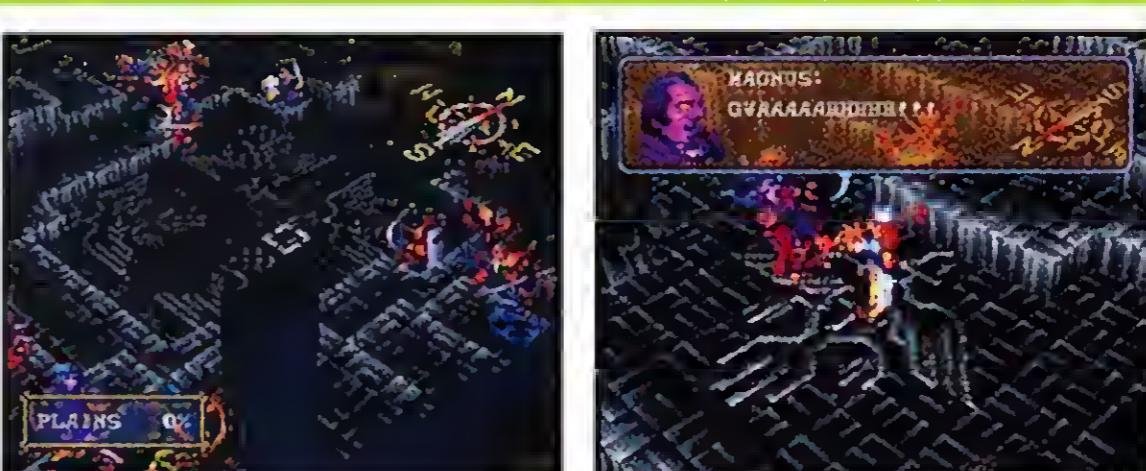

Battle 4

This battle is very difficult. Move Ash with three sacrificial lambs (including an archer) over to the left. Be sure that his back is against the wall and that he's surrounded by other party members at all times! Simultaneously, move everyone else over to the right. Use your archers in each group to start wearing down the extremely annoying baddies up top. Finish them off with your surviving heavier troops when you manage to get them up to the second level. Once you've killed those guys, you'll still have to get to the Church. Unfortunately, your losses on the first half of the map will most likely make you use Ash to fight on the front lines, so, if at all possible, keep a healer close to him at all times. Your strategy for this half of the battle simply involves keeping all of your guys around Ash since all the baddies will invariably flock to him.

Battle 5

Split up into two groups—three go on the left and the rest go on the right. The troops on the right should be able to plow through the path with few problems. The right side, preferably including a healer and two powerful warriors, will have to be more careful; move them cautiously up the path before them until Magnus comes on screen. Once both groups are on either side of him, close in on him with a relentless flurry of physical and magical attacks until he lies bleeding on the ground! (Sorry, I got carried away for a minute.)

Battle 6

One of the more taxing trials of your strategic prowess, Battle 6 requires some forethought to conquer. First off, you'll need to form a strategic line of warriors from left to right. Over the course of two turns, you'll need to splinter that line into two groups: one going left and the other going right. Each group should steadily push the dogs into the left and right corners. Since there should be fewer dogs on the right, your group of warriors on that side should be able to kill the dogs there and move over to the left to help that group kill what's left. But remember: Each of your turns needs to be carefully thought out because you've only got six turns to kill every dog.

Chapter 3: Escape to Tomorrow

Battle 1

This is a very easy and refreshing respite compared to the quick and nerve-wracking pace that the game has achieved thus far. All you have to do is send Ash and Grog off to the opposing corners of the platform where the fire heads are attacking; you can easily kill each with one hit. Then, move whoever is closest to Sara over to help her take care of the two fire heads that appear near her after the first turn. That's all there is to it.

Battle 2

While this strategy won't earn buckets o' cash, it will definitely do the job. Pick one pole that doesn't have a ledge behind it and place a warrior on all sides of it (front, back, left and right). Let the fire heads destroy the other three poles, you just need to keep one intact to win the battle. When the pole you're guarding is the only one left, they'll begin to move in. Since they're so weak, they're easy pickin's for sword attacks and your magic attacks. Just be sure to use Sara's Heal Plus spell to repair any damage that they might be able to inflict before you kill them. It should take no more than six turns to do the job.

Battle 3

This is where we see some of the game's most evil artificial intelligence. First, move Dolan's group to the right and down the path with the boulder at its top. Be very aggressive in fighting everything off. Then, lodge Ash's group around the middle of the bridge before it. You'll need use Ash and Clint to fight off the oncoming attacks, so be sure that Sara is nearby to use her Healing Plus (you'll need this just about every other turn). When Dolan's group reaches the bottom of the path and crosses the bridge to the left, use Diego to take out the remaining grenadiers. Then, sandwich the remaining baddies between Dolan's group and Ash's group.

Battle 4

For starters, move Huxley and two other lightly-armored guys down the passage on the right of the castle. Be sure to move Huxley on top of the plateau over there (with the treasure chest and boulder.) Move everyone else to the left side of the castle. Hammer away as you go forward and use Diego to take out the Warlock and Healer very early on. With them gone, your two driving fronts will push the enemy into a no-win situation.

Battle 5

First, and most importantly: you need to skip your first four turns so the enemy gets close enough to attack. If you move before that, they'll send someone back for help and you'll automatically lose. When you do attack, move your lightly- and heavily-armored guys to the rear of the enemy caravan. Move everyone else to the front and hammer them back. Meanwhile, you'll need to use Huxley to drop the bridge in the rear left of the map, go across and push the crate off to the right so the enemy can't get through that way. Then, move him back to the other side of the bridge where he can deal with any survivors. Also, you'll want to keep as many people alive on the front line as possible to help Huxley with the dogs and troops that will try to escape across the bridge.

Battle 6

Move Eleni to the left and everyone else to the right. Once she's hit the switch in the upper right corner, move Clint and Amon through the open gate. Use Darius to fly up the center of the map and hit the switch up there. Then, use Eleni to work her way through the gate on the left and hit the switch over there. Finally, move Clint and Amon further to the left and hit the final switch. If it was done correctly, then the three remaining juggernauts will be boxed in and easily dispatched.

Battle 7

Don't panic! Clint's group will have to survive one turn without any back up. During this turn, your primary goal should be to protect Clint (since, if he dies, you lose.) The best and easiest way to do that is to move him back under the shelter behind him. When Ash's group arrives, you simply need to follow the path around the castle in a counter-clockwise fashion, destroying everything in your way with magic and sword play. You'll find that your archers and/or hawk men are invaluable here. Your biggest challenge will be half-way to the jailer; make sure all your troops are condensed there after no more than four to five turns. Use your magician on the floor of the map to attack grenadiers and constantly keep Clint moving toward the open door where he'll eventually have to kill a Warlock.

Chapter 4: The Successor

Battle 1

Send a sacrificial lamb over to the right to flip the bridge switch and then keep him/her there to draw troops across the bridge. Also during the first turn, you'll need to send someone over to the left to push the crate in front of the enemies' path (so they have to go around.) Then, move everyone else aggressively up the center of the map, over the bridge. Don't stop to fight, just keep moving with Ash leading the pack. You should be done in six to eight turns.

Battle 2

Break up your troops into two equal groups, one will go to the left and one will go to the right. (Just make sure that your guardsmen are in the group on the right.) Move each group straight ahead, taking out the acid-puking baddies as you go. Continue with each group going up the hill, driving the baddies into one small group at the top. Once there, use your magicians to repeatedly hit them with big attacks (i.e. Phase Shift.)

Battle 3

The key here is to move your two magicians/sorcerers to opposite edges of the fighting arena. Then, send a couple of your party members out to each of the four clusters of enemies to draw them out into the main arena. Once they're within range, use your magicians to do repeated Phase Shifts (or other big magic attack.) This should kill off all but the egg worms. Finish those off with whoever happens to be closest.

Battle 4

You need to keep moving everyone in your party aggressively forward or they'll be lost as each section of the train is detached. Your archers/hawk-men should lead the assault against the baddies with healers close behind to repair any damage they take. After an attack by an archer or hawkman, the best possible follow-up (should you have the resources, which you should) is a big attack from a magician or magicians.

Battle 5

This is, unquestionably, the most evil and the most frustrating level in the whole game, bar none. Your primary offense here is going to be magic. Split your troops up into two groups; each should contain a mage of some sort and the one on the left should be smaller than the one on the right. Use your mages to charge ahead and weaken the numerous foes with repeated magical attacks, then finish the job with the rest of your troop (archers are especially helpful.) If you place your soldiers and mages correctly, you should be able to hit the Death Device components with your magic spells as you go along. Believe me, it will take you at least a few tries before you get it down.

Chapter 5: The Legacy

Battle 1

Send Huxley and a mage over to the bridge on the right; the mage will weaken the attacking enemies with big magic and Huxley will finish the weakened foes off (and heal the mage when need be.) This will draw a lot of the offense away from the major group. Send everyone in the other group, except Ash, up the bridge on the left. Again, use your mage(s) liberally with a follow-up by regular troops to dispatch the baddies quickly and effectively. As always, use your archers to get rid of those pesky death angels.

Battle 2

Move everyone very quickly across the bridge and then split them into two groups, one going left and one going right. (I suggest putting Huxley, who by now should be a Ninja, in the left group so he can get to Kurtz very quickly). Then, use your archers in both groups to get rid of the Warlocks and Priests since they're the life-blood of the enemy's offensive. Once they're gone, hammer back the offense on either side. Just make sure that you leave one person behind near the switch so that when the enemy offensive is launched from the rear, you can hit it and take the whole attacking force out with one fell swoop.

Battle 3

Send two periphery groups up the left and right sides of the map; their job will be to drive the enemies on either side into the center of the map with the other monsters. Once you've driven them into the center, use your mages to pummel them with powerful spells (i.e. Phase Shift, Salamander.) Follow up with your archers. Invariably, one of the egg worms will run to the very top of the map; box him in with your remaining troops and take care of him however you choose.

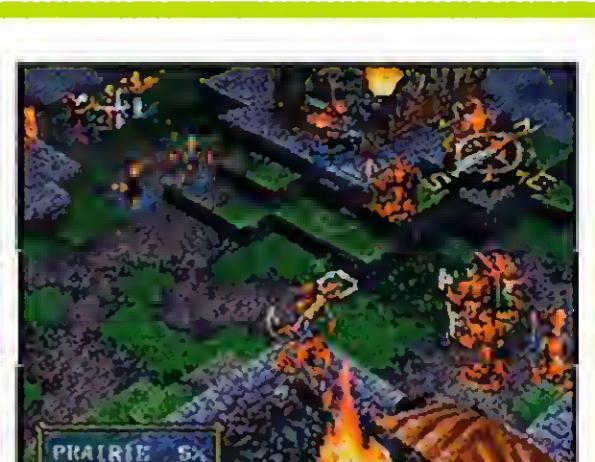

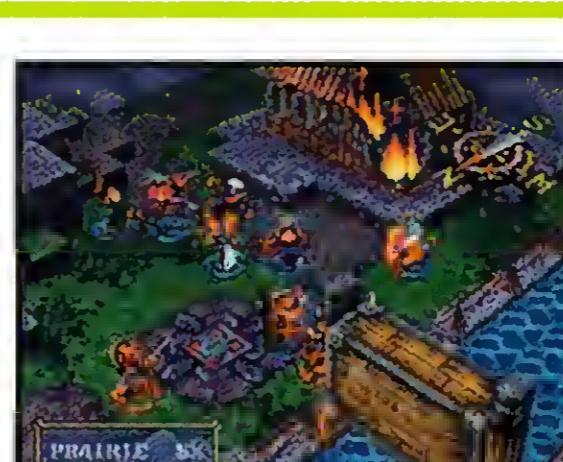

Battle 4

First, send an archer and a mage to the left and right. Hit the enemies on either side with everything you've got. Then, mass a huge strike straight up the center; using your mages and archers, you'll have the egg worms and skeleton warriors taken out in no time. When you get close to the dragon he'll charge, so make sure you've got someone with many hit points to take the first hit. When it's your turn, destroy him with magic and archers.

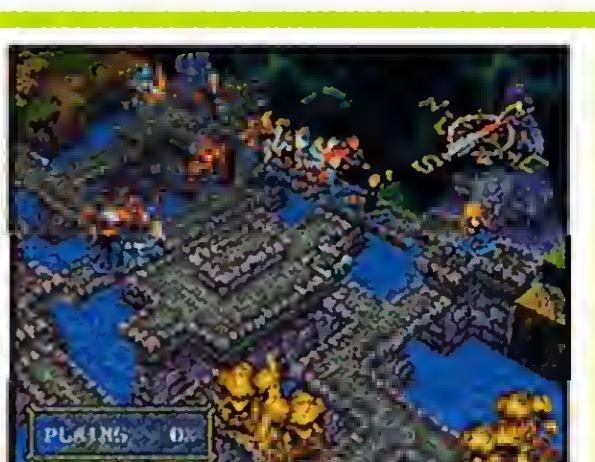

Battle 5

Move everyone down into the river bed and be sure to get rid of the priest before you do anything. Once on the other side, Kane's troops will attack. You'll have to fight them and off (repeated Salamander spells and archers' attacks work well here) and remember to press the switch that will flood the river bed, killing the other offensive being launched on you. After that's taken care of, forge ahead and be sure to place Ash and one guardsman on the ledge of the house on the left. Recharge your mages to weaken the last batch of enemy troops; let the rest of your team finish the job. (Make sure you do finish the job, though, because the boss will heal himself if you don't.)

Battle 6

Move three or four guys to the right to take care of the golems; with a little magic they're very easy to kill. Let the computer take its turn; it'll move Leena to the switch. Again, use your mages to weaken the golems that appear and finish them with archers and other troops. Repeat this process for the next bridge and you'll be done in no time—but remember to protect Leena if you want to win this battle.

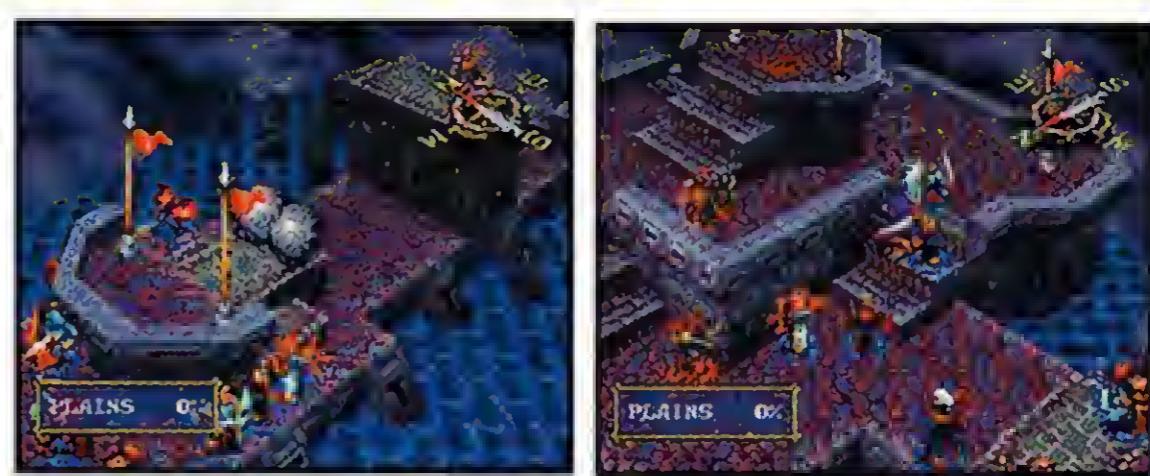

Chapter 6: A Fool's Epitaph

Battle 1

In this fight, you have no choice but to come on strong. Here's what you do: Move your guardsmen and other heavy troops quickly ahead, slashing anything that gets in your way. For each turn, use one of your mages to pull a big move like a Phase Shift or Salamander so that during the next turn, your troops can easily finish the job. You need to use your mages wisely, though, because after you flip the switch that brings the wall down, you meet dark angel Kane. Ash with Vandal Heart can do half of the job on Kane, but you need big spells and some close-up attacks to finish him off.

Battle 2

Very, very easy. Charge right to the center of the map, pushing every boulder as you go. After your second urn, you should be able to hit every enemy on the map with your mage's Salamander attacks. Once they're weakened, move in with your ground troops to finish the job. Just be mindful of the bats on the perimeter of the map; they need to be killed too if you want to finish this battle.

Battle 3

Similar in fashion to several maps thus far, this fight requires that you get your mages to the middle of the map and let loose with many big spells in order to weaken the enemy. As usual, follow up with your guardsmen and ground troops to clean up, being sure to use your archers on the extremely harmful dark mages who have been weakened from the magic attacks. Once you've done that, mount a big attack against Xeno that will take him out in one turn since he will, given the opportunity, heal himself repeatedly.

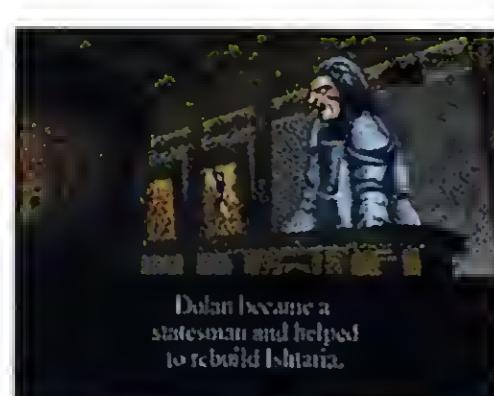

Battle 4

A big finish to a big game. First, send your mages as far forward as possible and do their weakening routine with Salamander spells. Simultaneously, send your archers to the left and right to take care of the weakened dragons and knights. Then, move everyone else aggressively up the center of the map; use your mages and ground troops liberally.

Once the archers have finished their job below, wait for them to catch up with the main group. From this vantage point, the archers should be able to take out the now-weakened dark mages with little or no problem. Now we move onto Dolf. Dolf will repeatedly heal himself so you'll have to play a bit of a waiting game. As soon as you can get four of your troops within striking distance, attack him. He'll die and, of course, dark angel Dolf will be reborn. If you've got a healer left, use her to do a group heal before you launch the final offensive against him. Like killing regular Dolf, you'll need to have at least four of your warriors in striking distance (Ash with Vandal Heart as one of the four) to finish Dolf and the game.

- To save time, memorize which button you need to push to get through the intermissions. This way, you'll cut down on the number of characters you'll have to fight.
- If a character grabs you, they can do a lot of damage. Use the Emergency Escape Spinning Attack to break a hold. The spin attack takes some of your health, but it's better than getting all of your health beat out of you.

what you should know...

A 15-shot gun (similar to a 9mm) that takes out one enemy at a time. A three-shot burst makes them fall.	Find this while fighting the old guy with the beard. Use it to keep him back, then follow up with a jump attack to take away max health.	This blinds opponents so you can do an easy kick combo on them.
Ten shots in the Anti-Tank, and they can take out multiple enemies, including yourself.	Axes come up whenever there are firemen present. Swing low to get in multiple hits. Effective, but punches and kicks are sometimes better.	Blinds opponents but better with the lighter to make a flamethrower.
10 shots, multiple enemy takedown.	The bottle is rather weak and leaves you open for a counter-attack. Use it for fun, but fists and kicks are better.	The TV monitors take a lot of energy out of the robots, but they slow you down, leaving you open for a robot grab or laser beam.
The missile launcher gives you 10 shots; it takes out multiple enemies and is very effective against mini-bosses.	The knife is a pretty weak weapon; drop it unless you want to see blood.	Barrels take out multiple opponents which is good against the firemen. They do slow you down though, so watch out.
		The chair should be used after you've stunned the green boss dressed like a football player. Follow it with a combo.
		Clubs come up every so often, and though they keep enemies at a distance, they don't take the place of a good combo.

Stage 1 is pretty easy. Beat the guys on the balcony and get the health and ammo power-ups. Move inside and beat the other thugs; one of them drops a gun that you can use to take out the woman in the miniskirt. Your first intermission button push is a punch. Outside of the elevators you'll fight a set of thugs, one of whom drops a missile launcher. Get that going to take them out. You should have one or two shots left to kill the biker boss in denim that ends the level. If there aren't any missiles left, use the handgun to finish him. Don't bother throwing the grandfather clock; it just slows you down.

DIE HARD

Arcade

Brush the first group of thugs back with the spray can—or PUSH flame them—then combo them to death. The first intermission is a jump.

After you've jumped out of the fire truck's way, you'll go against a posse of firemen. Use the machine guns they drop first, then go for the barrels and the axe. Just watch out for the water. The second intermission is a kick, then it's on to the anti-tank gun in the bathroom. Watch for ricochet!

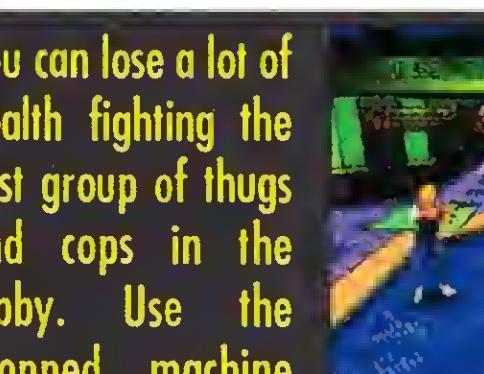

Keep the robots down with combos and watch out for the laser. To avoid it, always walk in a diagonal pattern towards them so that you're out of the beam's range.

stage 2

You can lose a lot of health fighting the first group of thugs and cops in the lobby. Use the dropped machine guns to dispatch the thugs. The cops are a bit different because they hang low to the ground. Avoid their gunfire and kick-combo them.

Make sure you jump quickly to avoid the missile that is aimed at your head after your fountain fight.

Watch out for the fountain that comes up while fighting the girls in the water. The burst takes away energy.

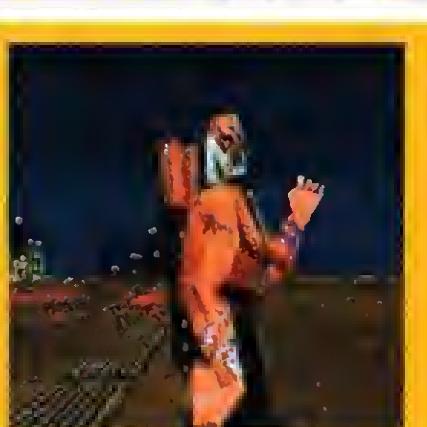

Don't let the end boss grab you. Use a gun to keep him back and watch his blocks.

stage 3

When the old guy takes his shirt off, you know he means business. It's do or Die Hard time, kids.

Gramps is a blocking maniac; he blocks just about everything. Use your best combos on him; he'll usually let his guard down after he blocks the first two hits, so you'll get him with anything after that.

The second intermission has you jumping back and forth; be sure to get the health power-ups.

stage 4

The first room has more police that shoot from the ground along with a bunch of thugs. Try to keep everybody on one side of the room and use the rocket launcher to kill them. Cops should be kicked.

The first intermission move is a punch. The second is a kick, but it only disarms the thugs. You still must fight.

After you've beaten the thugs in the waiting room, you have to fight the fireman mini-boss. There are plenty of guns to kill him. The only warning is that he drops bombs that can take mucho energy.

stage 5

Finally you've made it to the bearded fellow. He is good at blocking so use kick attacks to weaken his defenses. Stay close to him to avoid the desks, couches and painting that shoot out of the wall. Use the golf clubs to start off a combo and don't let him grab you.

Throws are also good ways to counter a block. In a two-player game, you get to fight your opponent after you've killed the boss! Carpal Tunnel Syndrome prevented us from beating the game in under 10 minutes (our best was 12). Is there more here?

Real Bout Fatal Fury Special

• Plane Shifting

Established back in the original *Fatal Fury*, the ability to shift from the foreground to the background (and back again) didn't become an integral element of gameplay until last year's *Real Bout* came along. In *Real Bout Special*, plane shifting makes a *big* difference; it affects combo usage as well as standard fighting tactics.

Plane shifting has both offensive and defensive uses and can help with placement as well. As an offensive tool, you'll find that it is possible to actually knock your opponent into the background and back into the foreground, continuing smoothly with a punishing combo. As a method of counter-attacking, you can dash at an opponent, shift planes to avoid their attack, then shift back to counter-attack. This is especially useful when your opponent has performed a Power move or Desperation attack which leaves them stunned from the attack. Other times the shift can be used to avoid an aerial attack.

From a defensive point of view, the plane shift can be used to work yourself out of a corner trap, to move out of the way of an oncoming projectile or to avoid Super and Desperation attacks. When trapped against a wall or barrier and you are being hit repeatedly, a dizzy is almost certain; shifting to the opposite plane can really save a round. Projectiles seem obsolete when it's just as easy to move out of their way. Once in the opposite plane you're not exactly defenseless, either. Each button still can attack, and the C button even has the unusual effect of knocking your opponent into the plane you're currently in.

Krauser performs his Kaiser Wave; Terry side-steps to safety.

Terry punishes Wolfgang by dashing forward, shifting back and performing a Power Dunk.

• Dizzy

Here's the barrier before any damage has been sustained.

Now the barrier is beginning to show signs of damage.

Once you break through, the Panda will dizzy Master Tung!

Here's a new one: To dizzy your opponent, you must bash him or her against the barrier at the edge of the screen until the barrier breaks. It's important to remember how this differs from the traditional fighting-game dizzy spells. Each barrier can withstand a certain amount of damage before toppling; however, the character who does the most damage isn't necessarily the one who makes his or her opponent dizzy. Let's say your opponent is using your face for a punching bag right against the barrier. As the barrier is about to crumble, you get around to the other side and get the last hit on the barrier with your opponent's back to it—in a scenario like this, it's possible to dizzy your enemy with just one hit! Since there are only two barriers, a maximum of two dizzies are possible in each round; this happens very infrequently, especially if both players are equally skilled.

• Power Gauge

The Power gauge is the key to new techniques found in *Real Bout Special*. As you perform special attacks and inflict damage to your opponent, the meter will charge up. There are three different indicators that appear above this meter: S Power and P Power expire after a predetermined amount of time, but H Power stays until you use it up.

• H Power: Break Shots

When the meter becomes at least half full, "H Power" will appear directly above the Power gauge. You can now perform Break Shots. Think of these as the *Fatal Fury* equivalent of Alpha Counters: While in a block stall, perform your character's H Power attack to break out of the block (see the moves lists to determine which attack does this.) Break Shots use up your H Power. These attacks have their advantages and disadvantages; you must learn when to use them for maximum effect. Some special attacks cannot really be broken because of the speed of delivery. One such attack is Terry Bogard's Rising Tackle, which attacks with five rapid hits. The ideal usage of a Break Shot is to block attacks which leave your opponent vulnerable afterwards, then counter-attack with a low-risk combo.

• S Power: Power Attack

If you allow your H Power meter to become maxed out, the next step is the S Power meter. Power Attacks are the same as Desperation attacks; the only difference is that S Power allows you to perform them when you're not in desperation mode (i.e. your energy meter is not flashing.) If you do this once, your S Power gauge is used up.

Neo-Geo strategy guide

Real Bout Fatal Fury Special

Hidden Abilities are more powerful than the standard Power Attack/Desperation Move. You can only gain access to the P Power meter if you are in desperation mode (i.e. your energy meter is flashing red.) If you already had S Power and you go into desperation mode, your

S Power will automatically become P Power. If you only have H Power and you go into desperation mode, the H Power meter will become P Power as soon as it's filled up. Think of the Hidden Abilities as Super Desperation Attacks.

• Combo Theory

As in last year's version of *Real Bout*, this year's *Special* uses the Rush combo system. As in *Street Fighter Alpha 2*, your combo hits will be counted on the fly. The Rush system counts both chain attacks (consecutive button presses from left to right) and button presses that lead into special or super attacks.

• Rush Hits

When linking button presses together, there are a couple of things to remember. First, be aware that the timing is different for almost every fighter. Although some fighters may share similar combos, each one attacks in different ways and therefore must be taken as an individual effort. Don't expect to become a master of every combo just because you can pull off Andy's 11-Hit Rush. It doesn't work

that way here. You'll notice a significant difference, especially with slower fighters like Franco Bash.

• To Jump or Not to Jump

Jumping in on opponents takes on a different dynamic in the *Fatal Fury* series. With two jumping heights—plus the ability to crawl and shift planes—it's easy to see what can go wrong. Jumping in is almost unnecessary in most instances. Punching serves more of a purpose, and of course, you have alternate methods of getting around a projectile. Combos don't have to be initiated in the air, so you have more reasons to keep the battle on the ground. A seasoned player will keep jumping to a minimum and use the crawl to get closer to his or her opponent.

• Fighting the Bosses

Billy Kane—The first king of South Town. This Brit ranks high in the *Real Bout Special* line-up. As a computer-controlled opponent, he can keep you away and trap you better than most of the cast. He does have some weaknesses which you can exploit; Most notably, he's always thinking "offense." This can come in handy if you've got a Break Shot at your disposal. "Offense into defense" is a good rule. Whenever Billy uses his Super Fire Wheel, you can shift planes, then press ↓ + C to knock him down.

Laurence Blood—The tricky Spaniard appears to be much easier than Billy or Krauser. Blood can work you if you become too impatient. He can lure you in with some fakes, then beat you down with one of his large combos. If you can get in close on him, try your best to complete a combo that will knock him down; otherwise, he'll counter-attack.

Wolfgang Krauser—This can be one heck of a battle! With quick thinking, you can win. The computer-controlled Krauser has fantastic artificial intelligence. Whenever you have access to a Break Shot, Krauser will rarely attack. If he has time to block, he will use his Phoenix Thrust instead of blocking. He's not shy about using his Kaiser Wave, either. Keep a reasonable distance; close enough to retaliate but far enough to give you some breathing room.

Joe Higashi

This Thai kickboxer is an average fighter, but he's got some stuff to keep him going during battle. The Slash Kick should only be used as a countermeasure to attacks which can be countered. It leaves you vulnerable after your opponent has blocked it. As for the Exploding Hurricane and Pressure Knee, these two attacks should be used exclusively in Rush Combos. If you do otherwise, your opponent can very easily get around these attacks. Joe's Power and Super attacks cannot be implemented in combos.

• Desperation Attacks

These "catch-up" attacks have been a part of the series since *Fatal Fury 2*. They can only be performed when your energy meter is flashing red. These attacks are designated by an S in the

moves lists because they also work in S Power mode as described above.

Real Bout Fatal Fury Special

Terry Bogard

SNK's main man returns to kick some butt. He's been given some extras to balance him even more—as if he needed it! The Power Dunk has priority over nearby opponents when Terry is getting up from an attack. The good old Burning Knuckles is perfect versus jumpers. Terry B's combos are also a cinch to set up. Terry retains his lofty position in character rankings.

Tung Fu Rue

It's safe to assume that SNK has thrown the story-line out the window since Master Tung is making yet another appearance in the series. Age has really weakened Tung as his attacks do minimal damage; even less than Mai or Blue Mary. What he lacks in strength he makes up for in agility. He's very quick and his attacks tend to come out faster than one would expect. Using Tung requires that you play a smart game of finesse, very different from using Franco or Krauser.

Cheng Sinzan

The tubby hero from *Fatal Fury 2* returns with practically no changes. He plays as slowly as he did in the earlier games in this series. He does have speedy, unorthodox attacks which catch unexpected opponents off-guard. Not a combo king like Kim or Terry, but a fun character to mess around with.

Laurence Blood

Krauser's right-hand man has definitely got some very cool patterns to use. He's got the range and he's got the speed. Plays similar to his rival, Vega from the *Street Fighter* series. His Bloody Saber can be linked three times for extra damage and hits.

Wolfgang Krauser

The German strongman is light in the combo and special attacks categories but he's got the brute force to work any unwary opponent in a couple of seconds—trust me, I speak from experience. He's got the most devastating Super Power in the game. It's best to play a game of waiting and counter-attacking with him—though a well-placed Leg Tomahawk can do some good. The Kaiser Wave is your best asset when in Desperation mode.

Ryuji feels like a character from the *King of Fighters* series, which isn't necessarily a bad thing. He's quite a cheap fighter and—to my dismay—he's one of the better fighters of *Real Bout Special*.

Andy Bogard

Terry's little brother proves that he can play with the big boys; he's got new attacks and has better recovery time. He strikes swiftly and to the point. The Quicksilver Slicer is a perfect attack to use during a Rush Combo for extra damage. Andy's a fighter that suits a person who wants to master a well-rounded fighter.

Hon-Fu

Blue Mary

As yet another returning fighter, Blue Mary is very agile. Her Straight Slicer and Vertical Arrow can be repeated in the same move to get an extra hit. Mary's combos aren't as large as Terry's, but they do a good amount of damage.

Bob Wilson

Bob appears to use the rare fighting style of Capoeira, which was developed in Brazil. This style of fighting emphasizes kicks and graces. You won't know if he's dancing or attacking half of the time. This is a good confusion tactic. Massive combos remain to be seen with Bob but he doesn't need them. He's an above-average fighter.

Billy Kane

Billy is unbelievable; he's among my favorite fighters. He's a perfect character to pick if you want to learn how to play cheap. Almost all of his special attacks can be used during combos and his Desperation attack will not let any jumper touch you. Speaking of jumpers, Billy's Punch (A) and Power Attack (C) can get in on an opponent if you use them during a pounce. They've got the range and speed to snuff most anti-aerial countermeasures. Secret Characters

Not too many people know this, but *Real Bout: Fatal Fury Special* has four secret characters hidden in the game. They're actually alternate versions of four familiar characters: Andy Bogard, Tung Fu Rue, Billy Kane and Blue Mary. Here's how to get them:

1. Insert a quarter or token and press START.
2. At the character-select screen, highlight Andy, Tung, Billy or Mary.
3. Press and hold the START button and continue to hold it down for the rest of the code.
4. While holding START, press B, B, C, C, then...
5. Press and hold the B button, wait for one second...
6. Press and hold C, wait for one more second...
7. While still holding START + B + C, press A or D to select the character.

If you've done this correctly, the letters "EX" should appear before your character's name. Just as the normal characters have two different color schemes, the color of the EX characters depends on whether you finished the code with the A button or D. The code is the same for all four fighters and it works on both players' sides. Each character has some modifications made to them which technically classify each as a different fighter. Note that while it is possible to have, for instance, EX Andy vs. EX Andy, the match-up screen—for no apparent reason—will always display only one EX character (on the Player 1 side.) As shown in these pictures, the match-up screen contradicts the in-game characters' appearances.

EX Andy

The evil EX version of Andy loses some attacks but regains his Flaming Flipkick and a double-hit Quicksilver Elbow. EX Andy isn't a downgrade or upgrade; he seems more of an addition for those among us who may prefer a modified Bogard brother. Nonetheless, he's a powerful character.

STRATEGY GUIDE

BY NIKOS CONSTANTINOU

PART 2

WHAT YOU SHOULD KNOW

- This is the second half of a two-part *Turok* strategy guide. The first appeared last month and featured maps for levels 1 through 4. This month we'll cover levels 5 through 8 and give you cheat codes that can get you through the game with ease.
- By the time you've reached this point in the game, you should know how to control the analog joystick pretty well. One important thing to remember is that the diagonal jump pushes you a little bit farther than the long jump. So if something's just out of reach with a running jump, try a diagonal jump.
- To get to the final boss, you have to find all of the Chronosceptor pieces.
- Some of the cheat codes that we've given you can be found while playing the game. There are still some codes that we haven't found, including a "shrunken head" mode and a level select. Can you find them?

MAP GUIDE

	GRASS		GRANITE
	LAVA DOORWAY/SWITCH		BUILDING
	WALKWAY		WARP
	SAVE POINT		KEY
	WATER		GATE
	DEEP WATER		CHRONOPIECE
	CHASM		SECRET AREA
	CAVERN		BRIDGE/LADDER START

A few words about cheating.

The following page contains nine different cheat codes, some of which will help you to get through the game without having to worry about losing lives, health or looking for weapons. *Tips & Tricks Magazine*, as the name implies, is here to help you get through a game by giving you tips and tricks. Unfortunately, in cases such as this, our help can take away from some of the actual game play. While I was doing this guide, I was having a lot of fun playing through the game. I got excited

when I found a secret area, a new weapon or key or faced a new monster. When I finally killed the last boss, saw the ending and watched the credits, I felt like I had conquered a wild beast. I reveled in my victory by going to 7-11 to get a Cherry-Lemonade Slurpee and some candy. Of course, some of these same cheats helped make this guide more complete as I went back to map out the levels. But the first time I played through, it was all skill, baby. Cheat if you want, but don't cheat yourself.

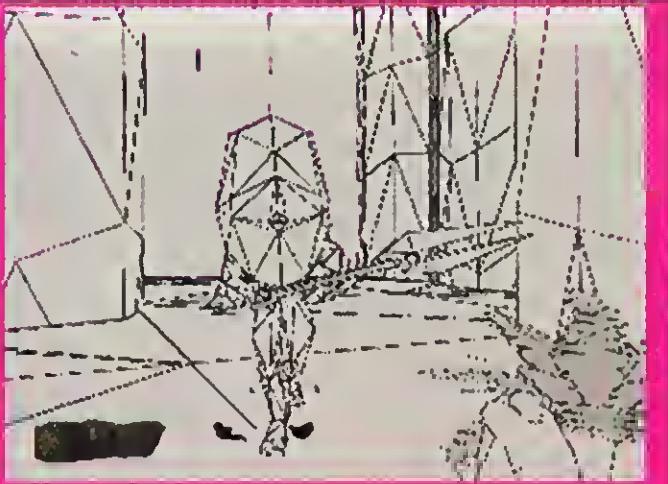

Hey buddy! Don't cheat!

**ROBIN SMITH**

The mysterious Robin Smith code opens up a bunch of the game's cheats. Robin's gifts include Invincibility, All Weapons, Unlimited Ammo, Big Heads, and Show Credits. Just enter RBNSMTH to activate.

DISCO DANCING

The Disco Dancing cheat causes all of your enemies to dance around in place and not attack you. This makes it much easier for you to take them out. Enter SNFFRR to make each enemy shake their booty like Devo.

INK AND INK

Pen and Ink makes all of the game's textured polygons disappear, leaving only the anti-aliasing lines in glorious black and white. It's kind of eerie and neat to play this way. Enter DLKTDR to activate.

CHEAT CODES

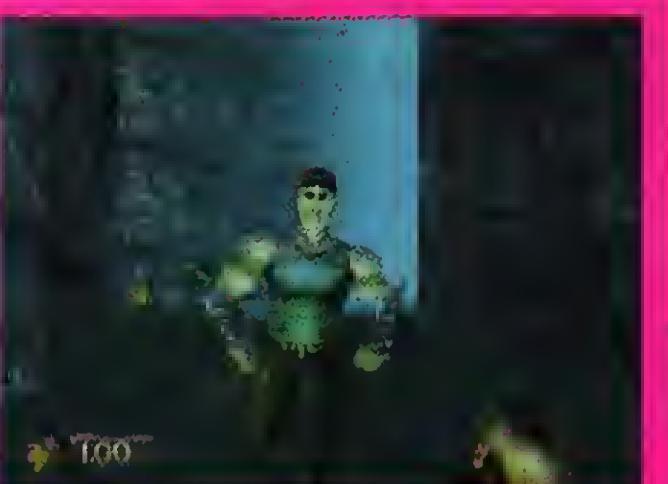

Enter each of these codes in Turok's "Cheat Code" screen, then activate them with the new "Cheat Menu" option that appears when any code has been entered.

GALLERY

If you want to get a close-up look at most of the game's enemies, enter the Gallery to scrutinize Iguana's work. You can zoom in and out and rotate each enemy individually. Enter THBST to get this treat going.

SHOW CREDITS

Check out the credits before you've finished the game by entering the code FDTHMGS. It seems like everybody and his brother worked on *Turok*, including the guys who worked on the comic and Robin Smith.

SPRIT MODE

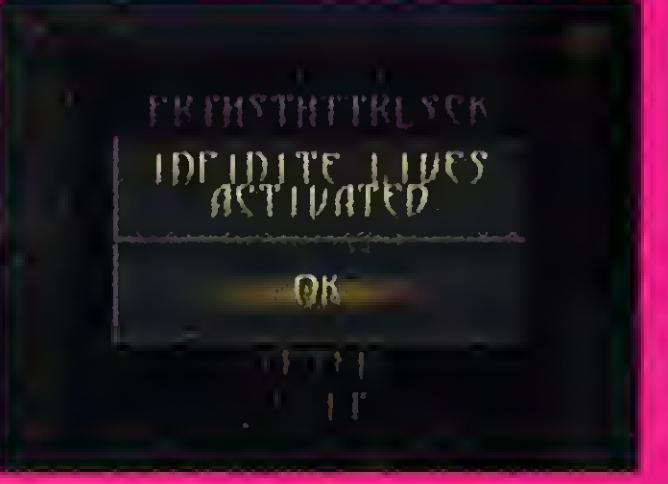

Spirit Mode makes you have the psychedelic shield effect all the time, rendering you invincible and making all of the enemies move in slow-motion. It's annoying after a while, but try it by entering THSSLKSCL.

ALL WEAPONS

If you've already entered the Robin Smith code, then you won't have to enter CMGTSMMGGTS to have All Weapons. It's just a waste of time, but we thought we'd include it just so that you can have the full story.

UNLIMITED AMMO

Another code that's invalidated by the Robin Smith code; enter the Unlimited Ammo code only if you have nothing else to do. Notice that some codes actually spell out sentences: "BLITSRRFRND" is "Bullets are our friend."

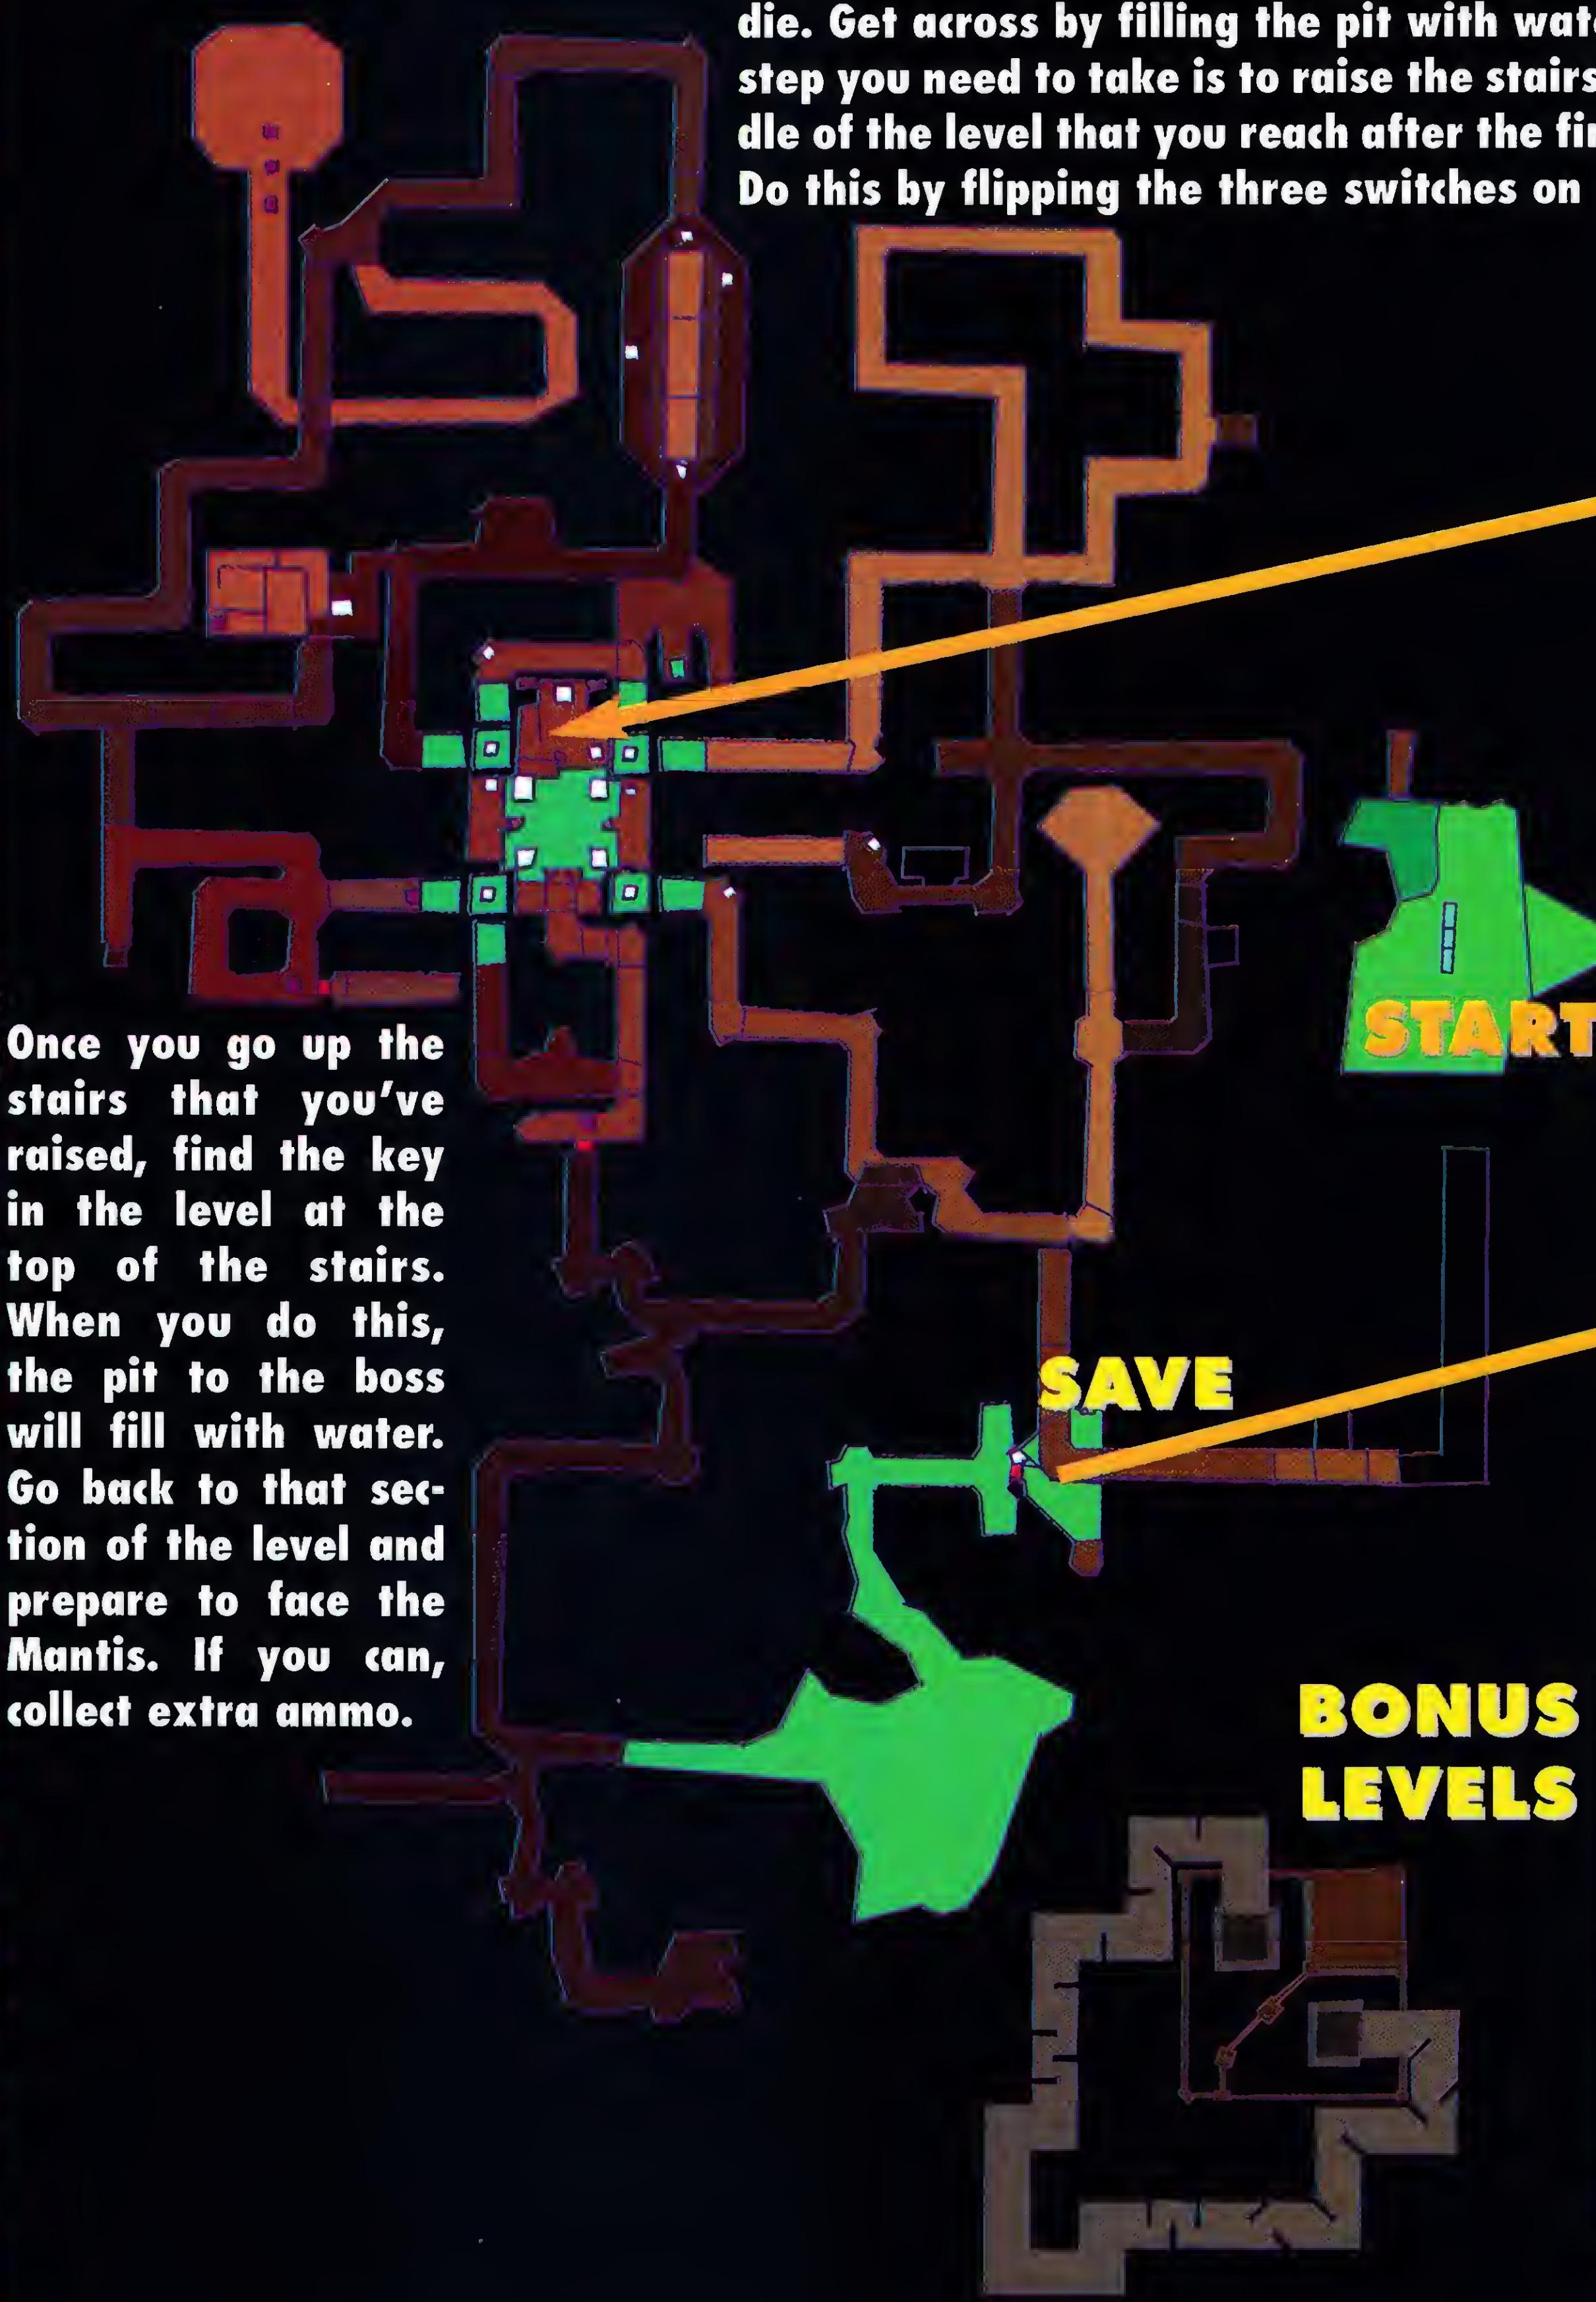

INFINITE LIVES

You won't have to worry about collecting the little triangles to earn extra lives if you enter the code FRTHSTHTTLSCK. Along with the other codes we've given you here, you should be able to finish *Turok* easily.

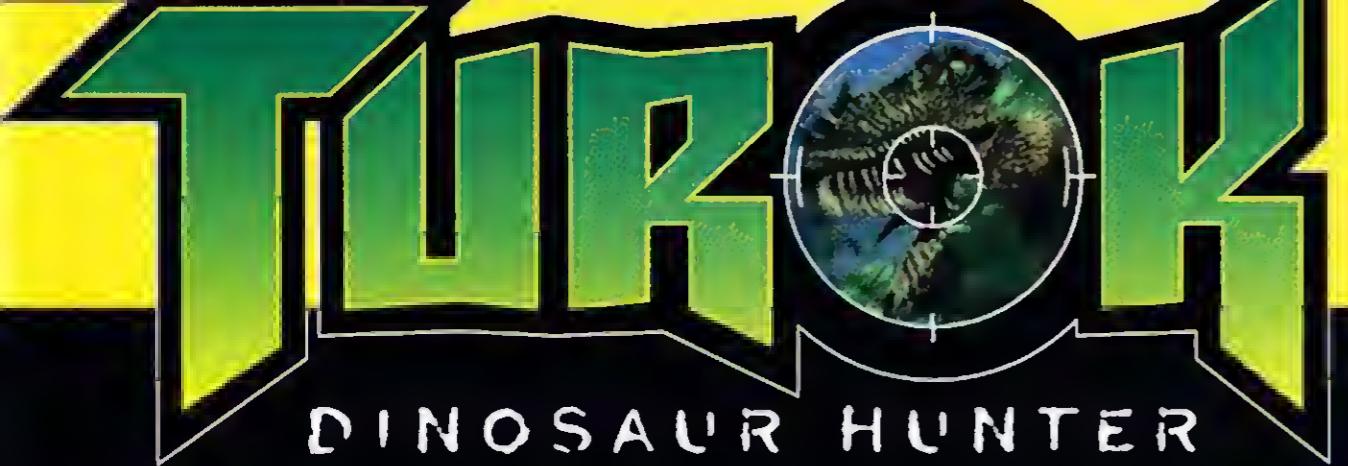

LEVELS

To get to the boss at the end of this level, you'll have to fill the pit that blocks your way to the Mantis. Don't bother jumping across the pit because you'll die. Get across by filling the pit with water. The first step you need to take is to raise the stairs in the middle of the level that you reach after the first teleport. Do this by flipping the three switches on the level.

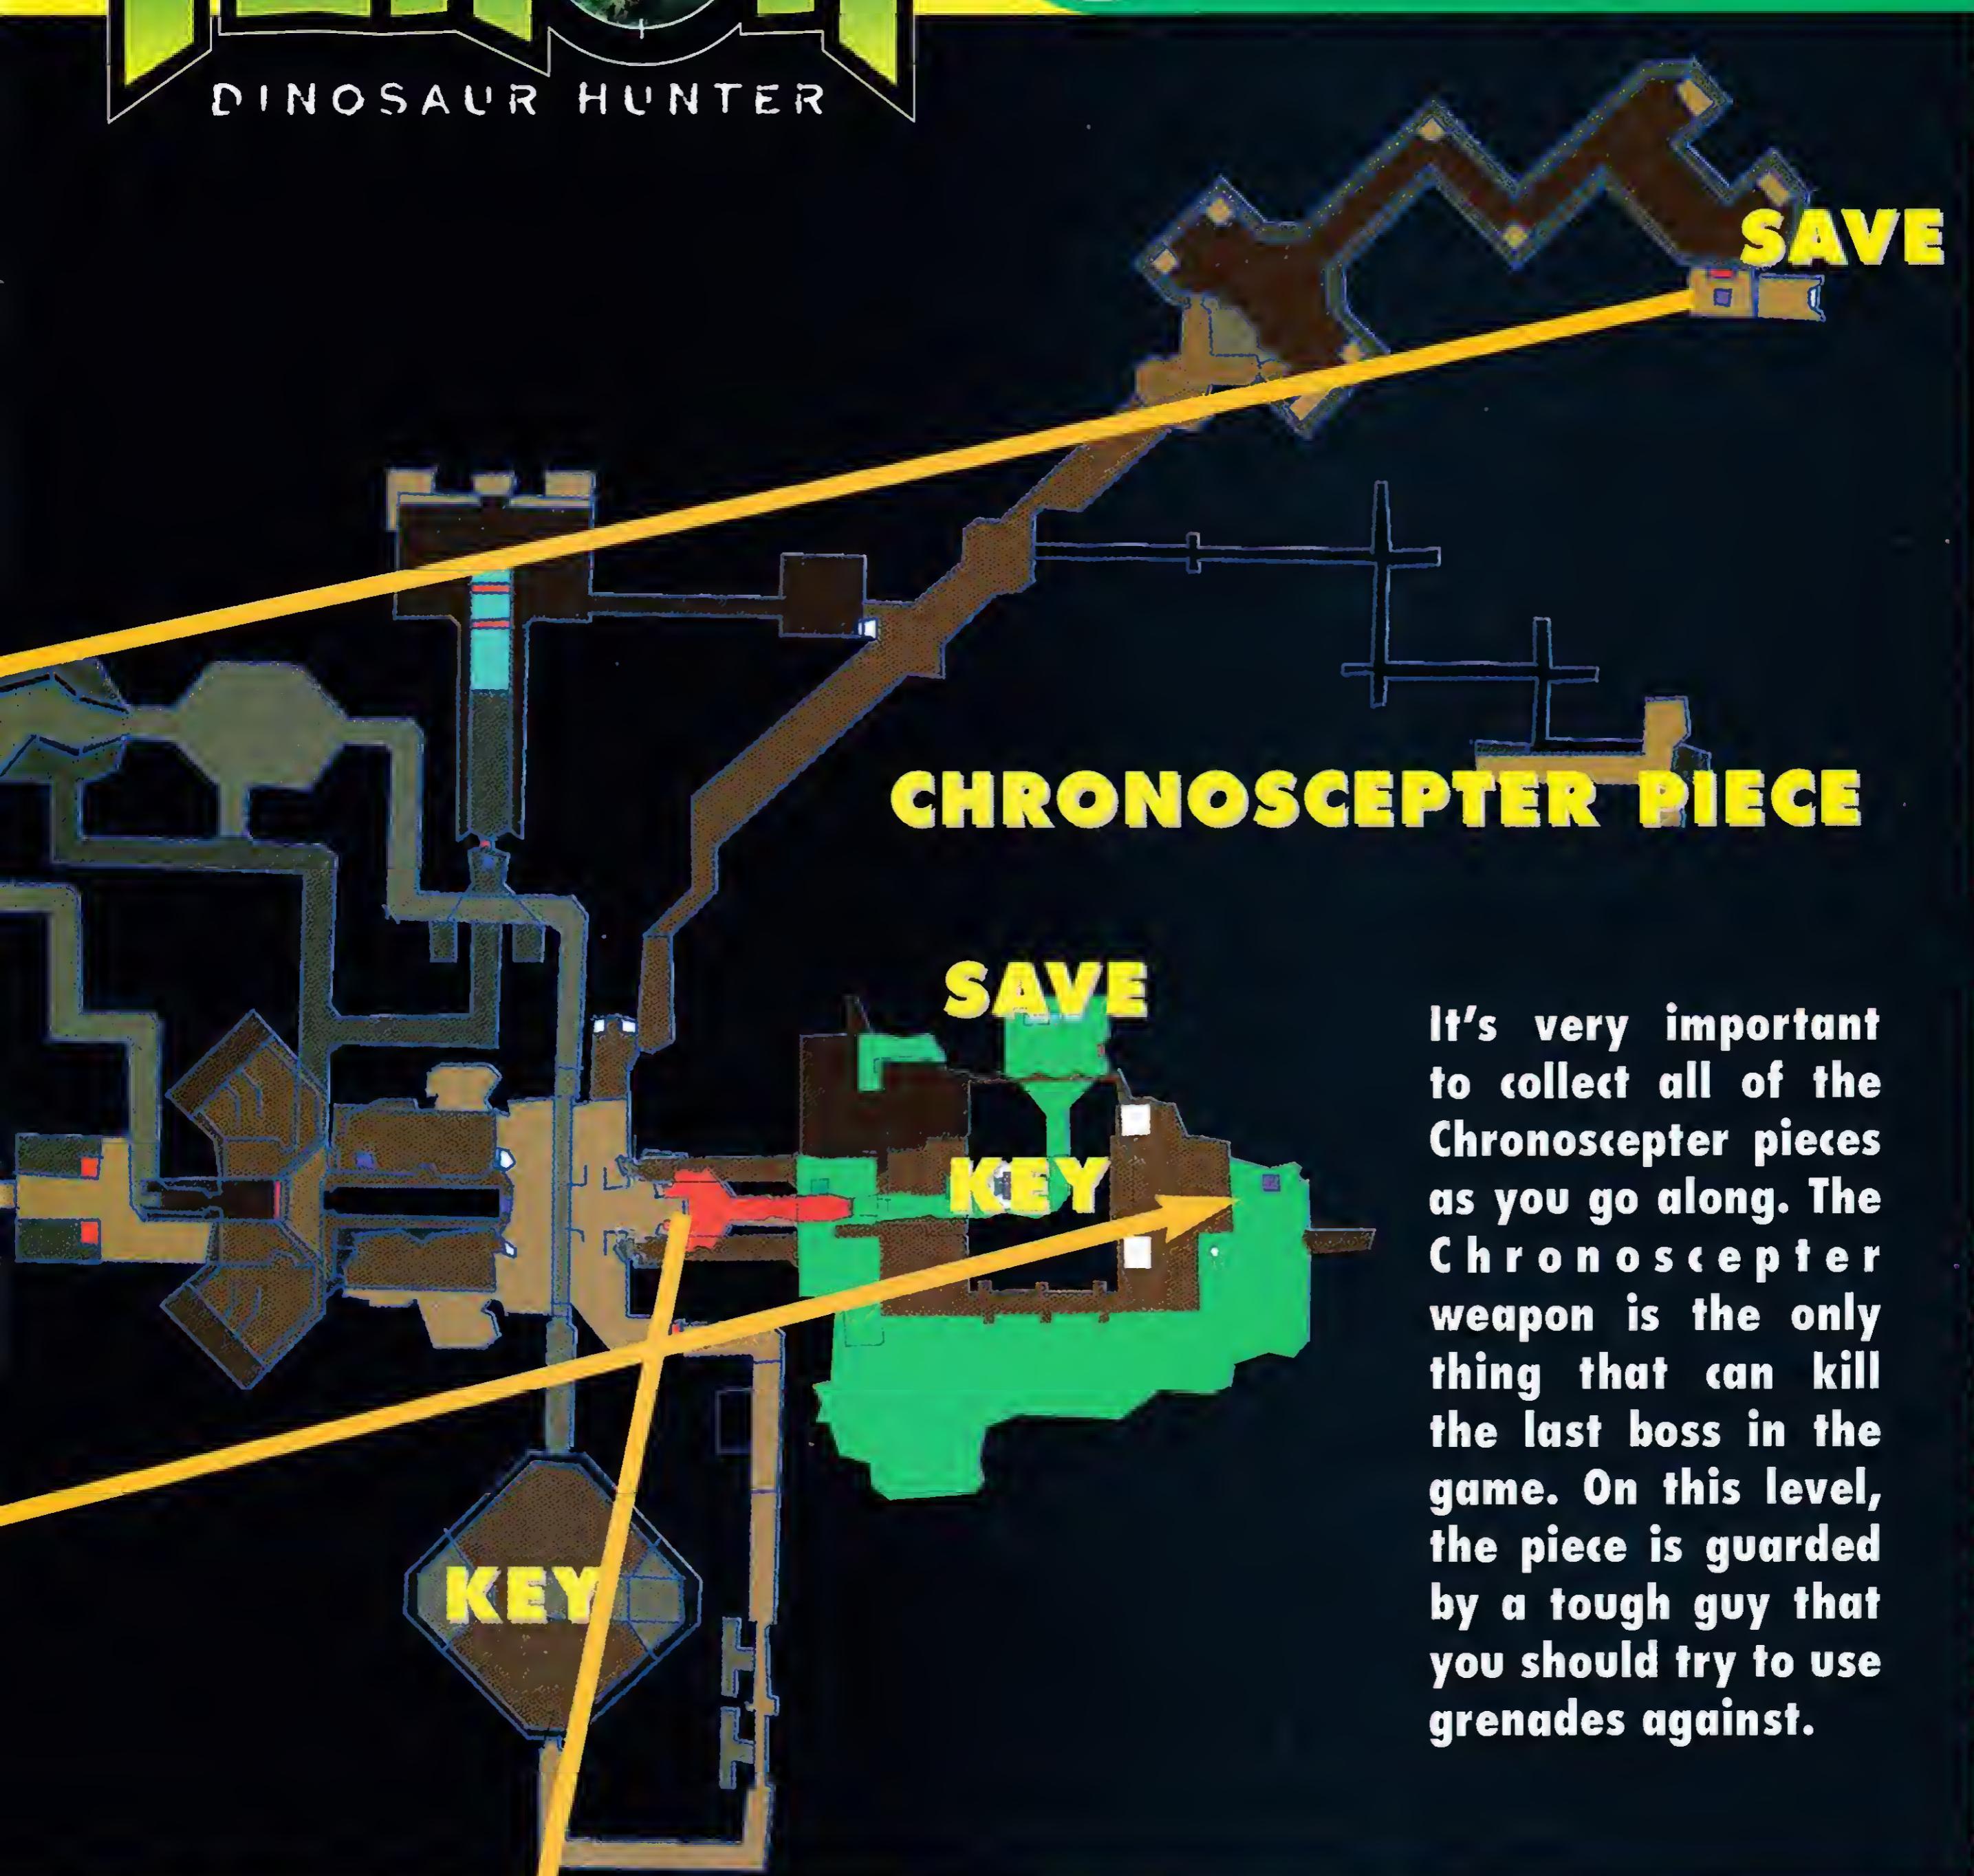

Once you go up the stairs that you've raised, find the key in the level at the top of the stairs. When you do this, the pit to the boss will fill with water. Go back to that section of the level and prepare to face the Mantis. If you can, collect extra ammo.

BONUS
LEVELS

Turok: Dinosaur Hunter

LEVELS BOSS

To get the last key on the level, you have to defeat the Praying Mantis Boss at the end of the level. Always keep him in your sights, because if you lose him, he'll jump behind you and get you from behind. The best weapon to use is the Mini Gun, but you'll probably need to use all of your artillery. The Mantis will flash to indicate that its attack pattern will change. Watch these changes and stay ahead of the game.

TIPS & TRICKS

May 1997

Some of the lava on this level is actually harmless. It's tough on your health, but check all of the different pools to find some secret power-ups and hidden paths to the Chronoscepter Piece.

In level 4 you probably experienced some booby traps that took away a lot of life. Well, level 6 has a ton of these traps that you have to avoid. Some traps actually make a warning sound that ticks like a time bomb before they go off. Listen for the warning and take evasive action by going backwards.

TUROK

DINOSAUR HUNTER

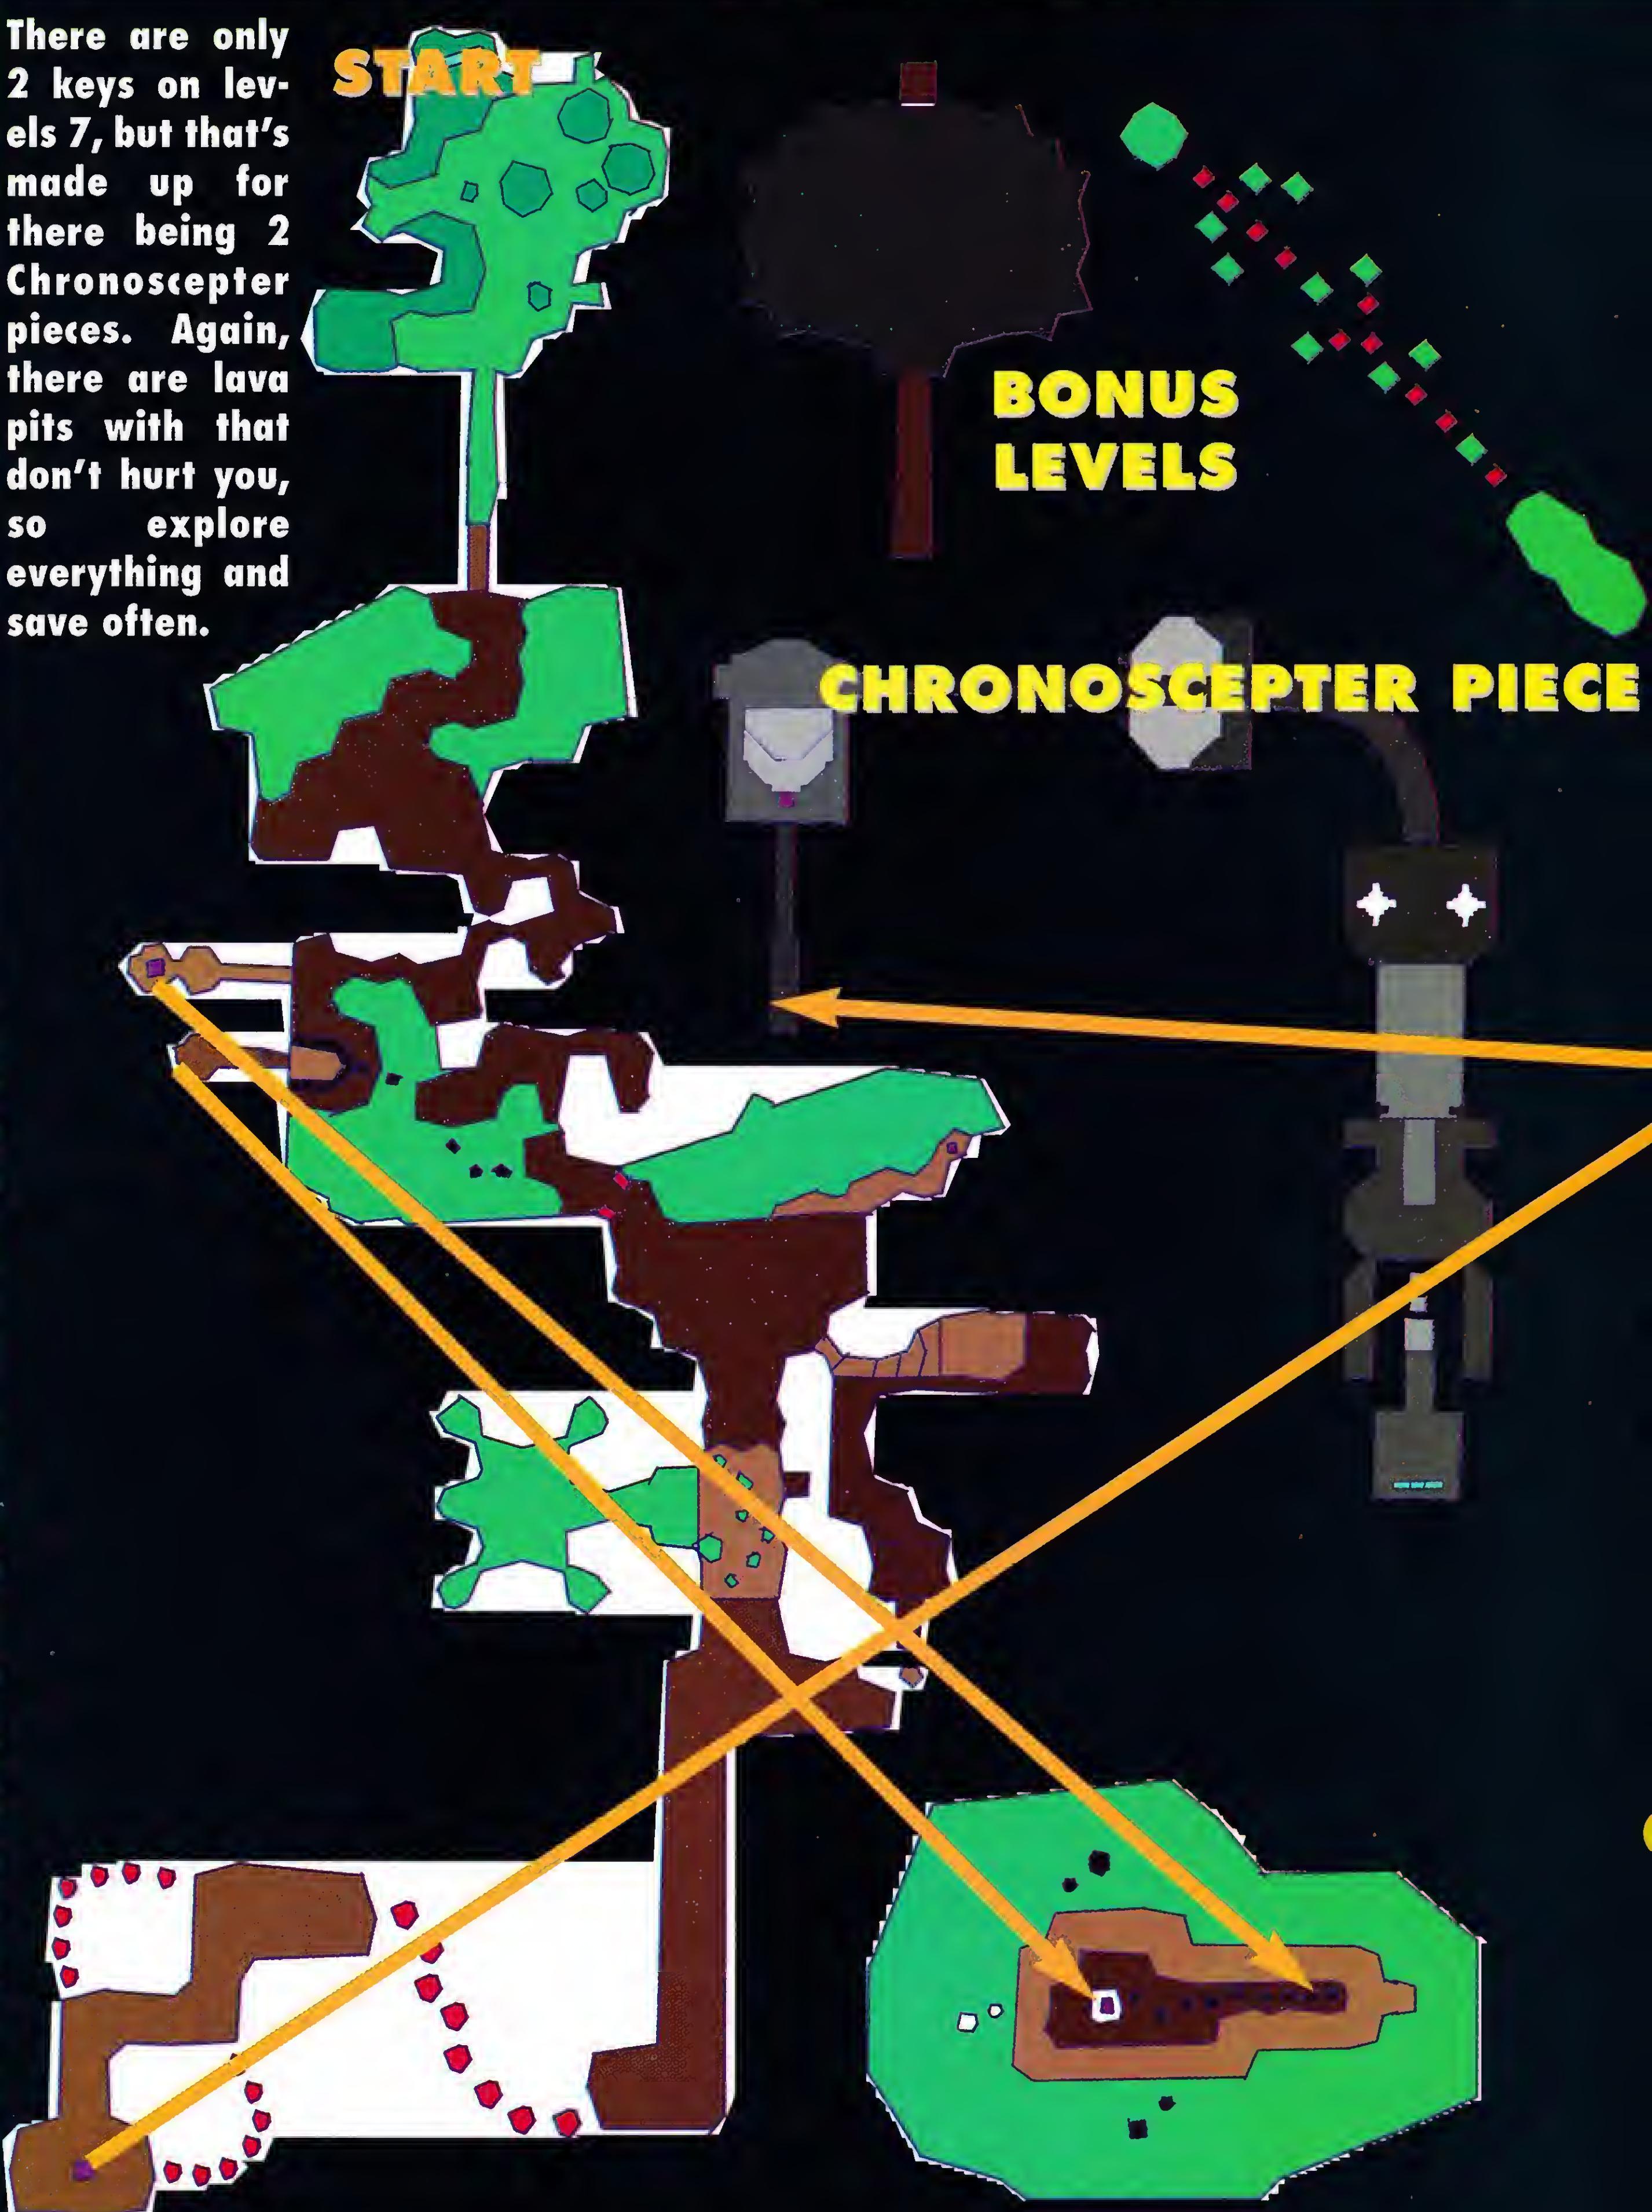

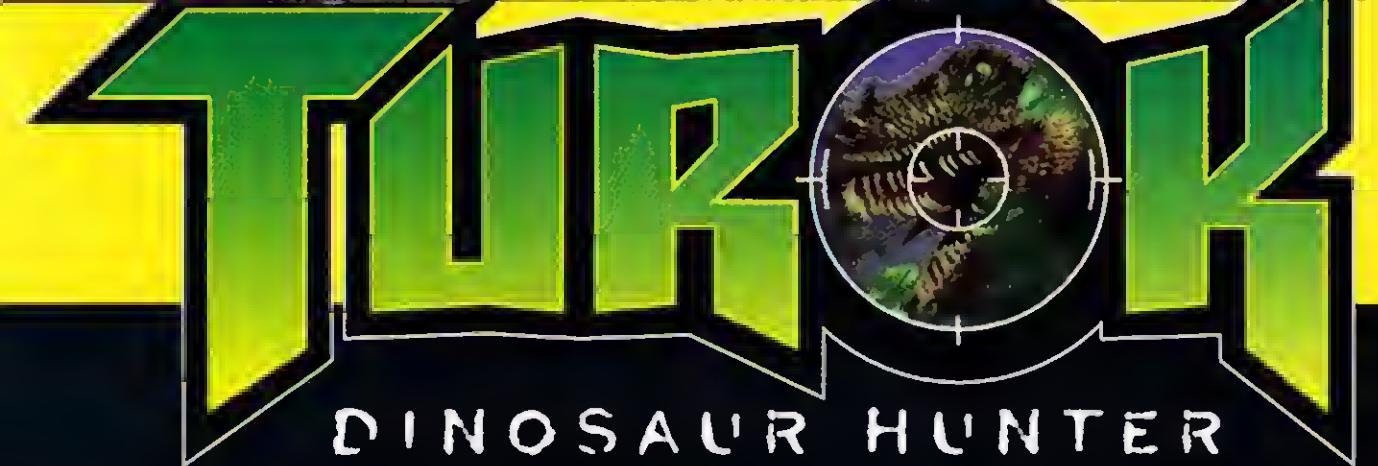

Turok: Dinosaur Hunter

There are only 2 keys on levels 7, but that's made up for there being 2 Chronoscepter pieces. Again, there are lava pits with that don't hurt you, so explore everything and save often.

Turok: Dinosaur Hunter

Nintendo 64 strategy guide

LEVEL 8

Level 8's enemies are too strong for regular bows and shotgun shells so make sure that you're concentrating on getting power cells.

Turok: Dinosaur Hunter

LEVEL 800

CHRONOSCEPTER PIECE

Watch for the laser fire that the T-Rex shoots out; it will take half your health. When you kill him, you get the last Chronoscepter piece and all weapons.

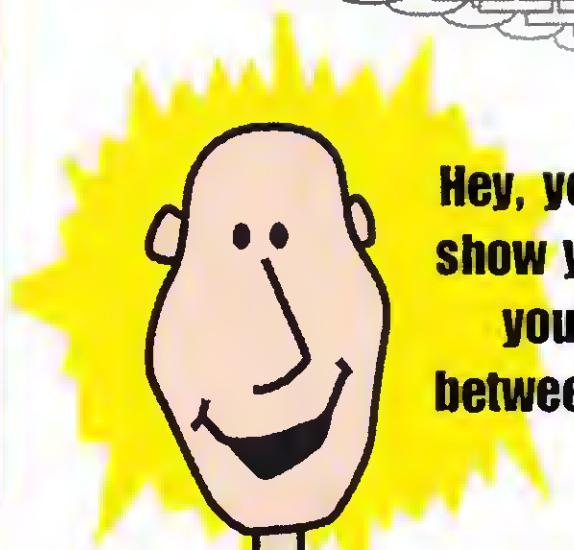

FINAL GOSES

The last boss of the game is the Campaigner, who has created all of the evil beings that have been attacking you through the game. The Chronoscepter weapon is your key to killing this guy. You only have three shots, but a hit will take away 1/4 of his energy. Use all other weapons for the remaining energy.

TIPS & TRICKS SELECT GAMES

Hey, you—listen up! This isn't your typical "review/preview" section. The purpose of "Select Games" is to show you a bunch of games that are out there—or are coming out soon—so YOU can decide which ones you'd like us to cover with in-depth strategy guides in future issues! See that postcard that's stuck between pages 50 and 51? Rip it out and write down the names of the games you're interested in. Drop it in a mailbox; we'll total up the responses and give you the kind of coverage you asked for!

RAMPAGE WORLD TOUR

Midway • Available Now

Remember *Rampage*? What a great game that was. You got to control giant monsters and turn entire cities to rubble. For those who never got to play that joyous little gem, now's your chance. *Rampage World Tour* is a brand new, supercharged 90's version of that 10-year-old classic. Control one of three beasts and move through a whopping 130 levels in an effort to destroy more property than your opponent. Players (up to three at once) also get to pound on each other; punch, kick, slam—the sky's the limit! Power-Ups such as the "Hot Loogie" let you get extra crazy on anyone stupid enough to get in your way. Not only does *RTW* look

times better than the original *Rampage*, there are new "Grudge Match" levels that let players go one-on-one for bonus points in addition to bonus flying levels. The developer of *RTW*, Game Refuge, is responsible for a string of popular home and arcade titles. *Arch Rivals*, *Pigskin 621 A.D.*, *Xenophobe* and *General Chaos* are among their hits; all of them featuring the same hilarious art style and wacky game-play. *RTW* could be the perfect outlet for anyone needing a break from a saturated market of all-too-serious driving and fighting games.

Pick it!

The elite "TIPS & TRICKS Pick" is given to those select few games that are highly recommended by the T&T staff after we've tested them thoroughly. Many hot games that are previewed here are not eligible for the pick until they are considered "reviewable" by the publisher, which means they're finished or nearly finished. Pay special attention to the picks; these are our favorites!

YOSHI'S ISLAND 64

Nintendo • 8/97

We'd be lying if we said we knew all about this game, since Nintendo provided us with nothing more than the handful of photos you see here. However, if it's anything like the Super NES *Yoshi's Island* game, you can expect dozens of huge, colorful levels filled with cute-but-dangerous enemies and cleverly-hidden secret areas. Unlike *Super Mario 64*, *Yoshi's Island* features the two-dimensional gameplay of the

Super Mario Bros. series of games. However, this shouldn't prevent Nintendo's designer extraordinaire Dr. Miyamoto from giving it the same addictive qualities of all his other hit games.

DUKE NUKEM 3D

Sega • 6/97

The PC "corridor" adventure *Duke Nukem 3D* is considered by many to be the greatest first-person shooter of all time, even over *Doom*. Brace yourselves, Saturn owners; your conversion is almost ready. Even without big-bucks Pentium PC hardware, the game looks—at this point—to be an extremely faithful and quite speedy translation. Sega promises that Duke will be Net-Link compatible, but won't confirm the number of players that will be allowed simultaneously. Hey, even if you've gotta play it solo, you should give Duke a look-see.

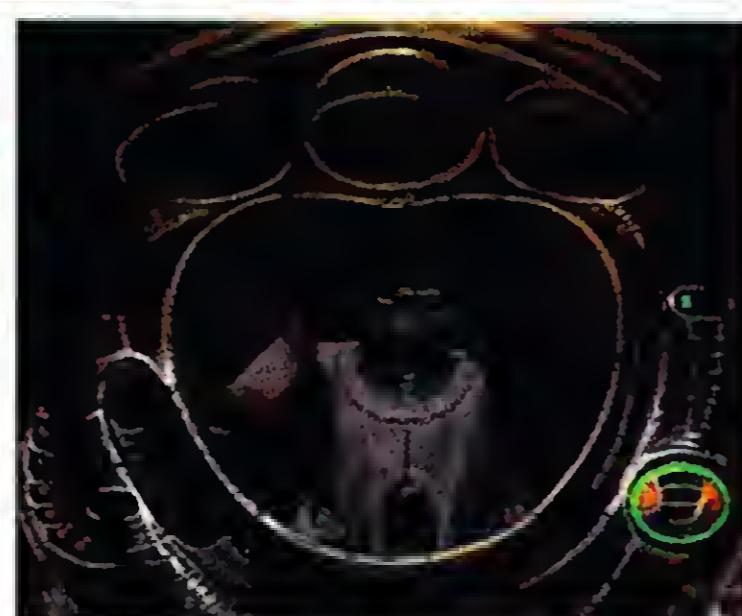

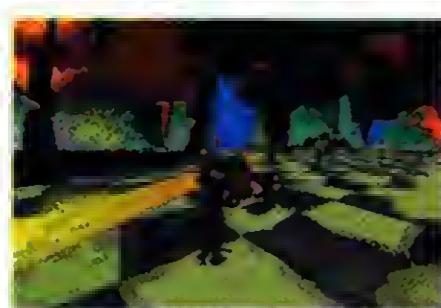

MDK

Playmates • 6/97

It's almost here! *MDK* (*Murder, Death, Kill*) has got to be one of the most innovative titles to come down the pike in a very long time. The premise of the game is that aliens are using mammoth floating cities to deplete the Earth's natural resources. As Kurt Hectic, you must put an end to the destruction. Working 24 hours, round-the-clock, Shiny's programming team has incorporated amaz-

ingly cool features into the game. Collision detection is so precise, it is now possible to zoom in on enemies from over a mile away and hit them exactly where you want—right down to a quarter of an inch. The sniper helmet (see screen shot below) allows for this kind of precision targeting. You can also use your parachute to drop down from above. *MDK* provides some truly innovative gameplay. For example, jump into a droid and infiltrate enemy headquarters undetected to listen in on private conversations. Tommy Tallarico does the in-game music and sound effects.

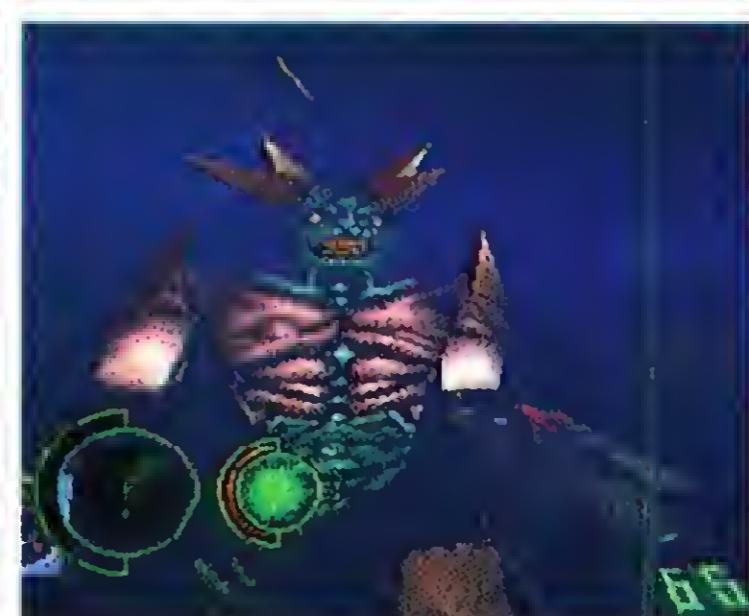

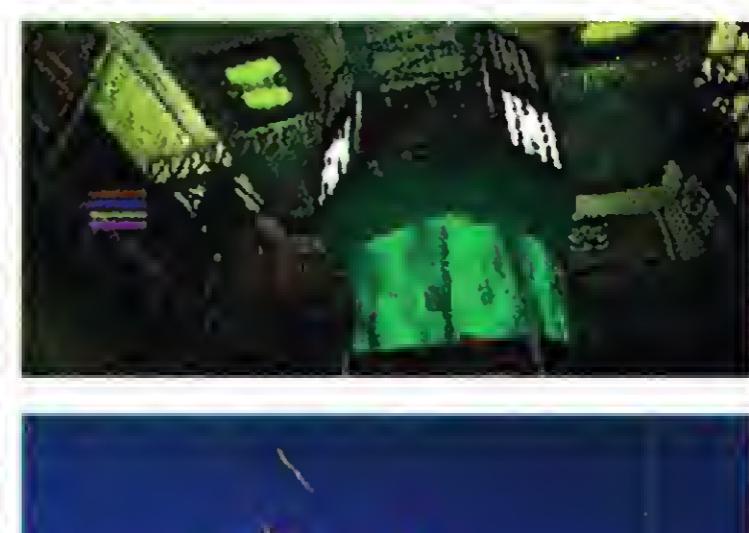

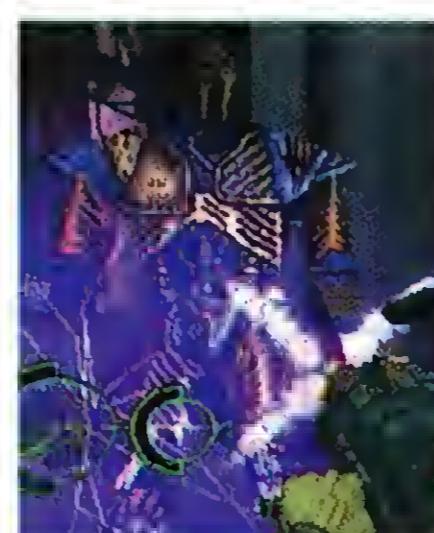

CODENAME: TENKA

Psygnosis • Available now

Codename: Tenka has been in development for over a year, and the final product really shows the results of all the effort. Beautiful touches like steam effects, sparks and the ever-popular lens-flare—coupled with a library of cool sound samples—add serious "oomph" to a game genre that continues to be milked to death. Weapon power-ups are

another area in which *Tenka* shines—the machine gun packs one heck of a wallop, and the laser-sight is not only cool-looking, but functional, to boot. The hovering machinery can be a bit redundant (hasn't anyone learned since the first *Kileak* game?), but *Tenka* has so much else going for it, you'd be crazy not to take it for a test drive.

FIGHTERS MEGAMIX

Sega • 5/97

With Capcom's introduction of *X-Men vs. Street Fighter*, it makes sense that Sega would attempt a similar crossover. Think of *Fighters Megamix* as "*Virtua Fighter 2 vs. Fighting Vipers*", with a ton of extra characters

thrown in for good measure. Over 30 fighters are featured, including heroes from *Sonic the Fighters*, *Virtua Fighter Kids* and even *Daytona U.S.A.* and *Virtua Cop 2!* The gameplay engine incorporates elements of both VF2

and *Fighting Vipers*, and there are tons of bonus options, including a training mode. Released in Japan just before the end of '96, this could be '97's fighting game of the year for American Saturn owners.

NORSE BY NORSEWEST: THE LOST VIKINGS RETURN

Interplay • Available Now

This sequel to *The Lost Vikings* contains five different characters and 31 levels of bizarre platform/puzzle action. Gameplay works like this: You control a band of vikings; each with his own unique abilities, and you can switch control of characters at a moment's notice. Need to squeeze through

a small opening? No problem! Use Olaf; he can shrink to the size of a grapefruit! Being attacked by an army of skeletons? Relax; just use Baleog's energy saber to cut 'em down. *Norse By Norsewest* revitalizes that great *Lost Vikings* playability, yet has a distinct flavor all its own.

NEED FOR SPEED II

Electronic Arts • 7/97

The sequel to *Need For Speed*—this time without the Road & Track license—is coming right along. If you thought the first one was a good ride, check out these babies: McLaren F1, Ford GT90, Jaguar XJ220 and Italdesign Cala to name a few. Some are real deal exoticars—others, concept cars—but all extremely

cool. Options are more detailed in this one, too; you can actually fine-tune spoiler settings on the Calia for greater drag efficiency. The icing on the cake is, of course, drooling over video footage complete with stats on gorgeous beauties you'll probably never actually even get to touch.

CITY OF LOST CHILDREN

Psygnosis • 4/97

Based on a French film, this game essentially puts you in control of a 12 year-old orphan girl who has been forced into a life of thievery by her captors, kinda like an unwilling Oliver Twist. Um...okay. In any case, *The City of Lost Children* is an adventure/RPG with graphics set up similar to games like

Alone in the Dark and *Resident Evil*. Characters are made up of polygons and maneuvered through pre-rendered backdrops. Interact with other characters, pick up items and add them to your inventory to unlock the many mysteries which lie ahead. Completely and absolutely bonkers.

GOAL STORM '97

Konami • 6/97

Fans of the sport they call "football" in Europe have to be going crazy by now; there are tons of soccer games available for the PlayStation and it doesn't look like they'll be slowing

down any time soon. This upgrade to Konami's *Goal Storm* features 36 international teams, motion-captured player animation, improved graphics and play control.

Select Games

BOTTOM OF THE 9TH '97

Konami • 6/97

Baseball fans who overlooked Konami's original *Bottom of the 9th* in favor of Sony's *MLB Pennant Race* or EA's *Triple Play 97* may have been happy with their choices, but they missed one of the most flexible

and unique pitcher-batter interfaces in the history of baseball video games. This new '97 upgrade offers refinements to that interface with improved player graphics and different camera angles.

MISSION: IMPOSSIBLE

Ocean • 6/97

Based on the Tom Cruise film version of the classic TV show, *Mission: Impossible* contains six individual mission levels, all rendered in real time. Assuming the role of Ethan Hunt, CIA agent, select from all types of spy gadgetry like the fountain pen tranquilizer. You can even use that cool facemaker device

to disguise yourself! There are also multiple camera angles like the mouse cam and hover cam. The programmers used an artificial intelligence computer language called SOOL to give characters in the game adaptable personalities. *Mission Impossible* is definitely one of the more promising N64 titles.

RUSH HOUR

Psygnosis • 5/97

An overhead-perspective racing game, *Rush Hour* may look similar to *Spy Hunter* or *Crime Wave* but it plays more like a *Ridge Racer*-style racing simulation. A wide variety of locations and scenarios are available, including sprawling city

scenes, mountain ranges and seaside oceanscapes. Our first look at this disc was a very early alpha revision with few of the final game's options included, so we'll have to give you more specifics at a later date.

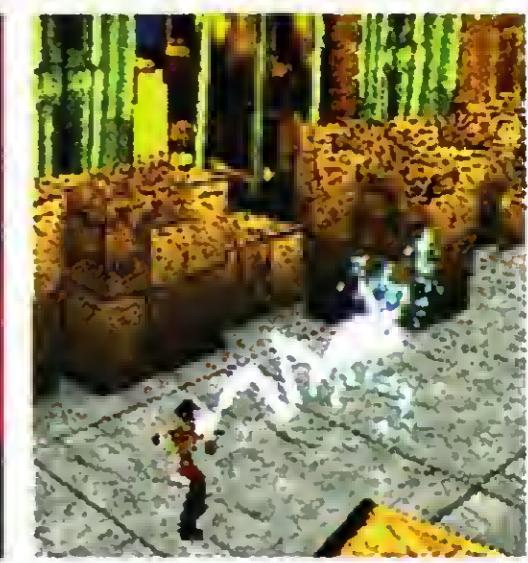

WILD 9S

Interplay • 4/97

Play as Wex Major, survivor of an alien attack on Earth. Team up with eight other characters (hence the title) from a far away planet and go after the evil scum-sucking invaders. You get to take control of all nine characters at various stages of

the game. *Wild 9s* contains some very lush, imaginative environments and looks to contain all of the elements necessary for a great action/adventure title. Use weapons and power-ups to overcome level after level of alien attackers.

MANX TT SUPER BIKE

Sega • 7/97

This Saturn conversion of the *Manx TT* arcade motorcycle racing game may not have the same high-resolution graphics as its coin-op inspiration, but it's expected to make up for the difference in gameplay, especially with an analog stick or steering wheel controller. The real-life Isle of Man courses

from the arcade are included as well as two "reverse" courses. You also have the option of racing against a "ghost" bike from your last race or your best race. As in *Daytona USA*, the game features an original "Arcade" mode as well as a "saturn" mode created exclusively for home play.

THE LOST WORLD: JURASSIC PARK

Sega • 7/97

The sequel to one of the most successful motion pictures ever made is coming exclusively to Sega systems. This 3-D action game lets you control five different characters: Raptor, Compy, T-Rex, Human Hunter and Scientist. Battle your way through 20 levels containing 40 different stages. The develop-

ment team was able to gather footage early on in the film-making and has created impressive animation routines. "Morph-x", a new rendering procedure, allows the skin of the dinosaurs to stretch while running and jumping. *Lost World* is also slated for release on Genesis and Game Gear.

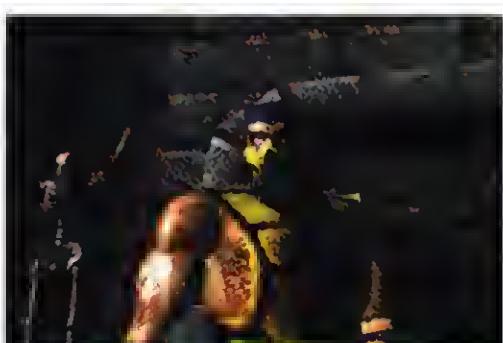

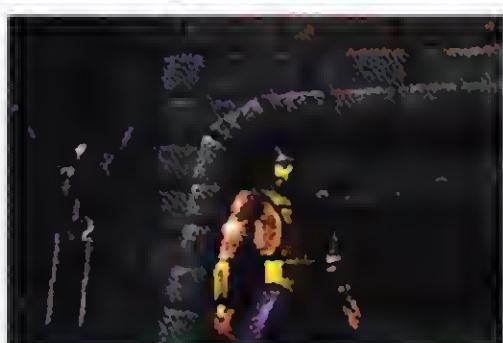

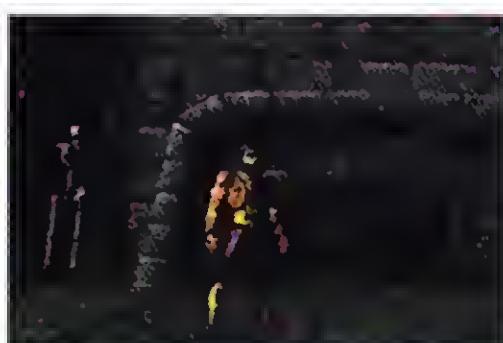

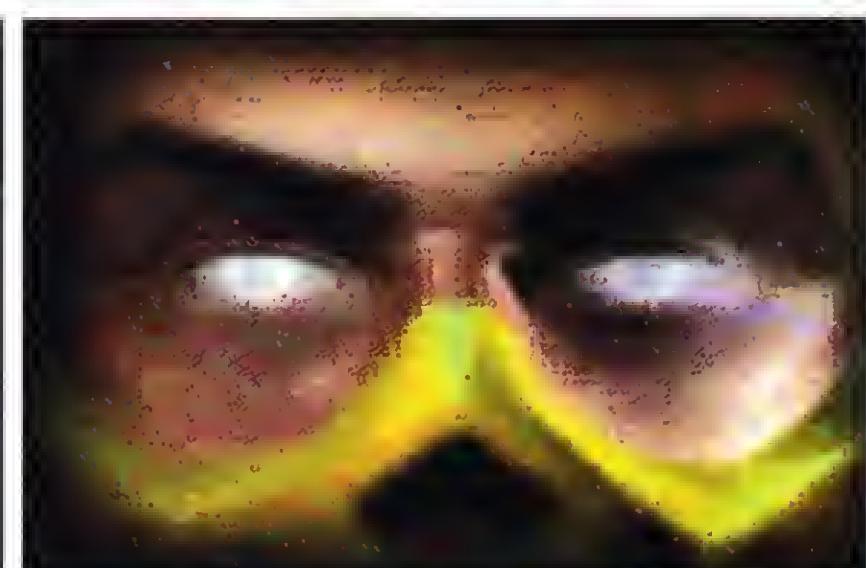

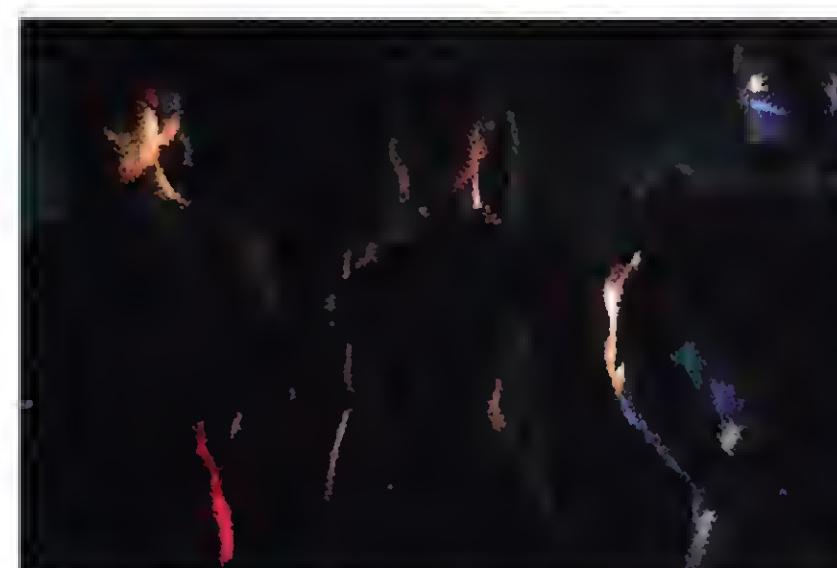

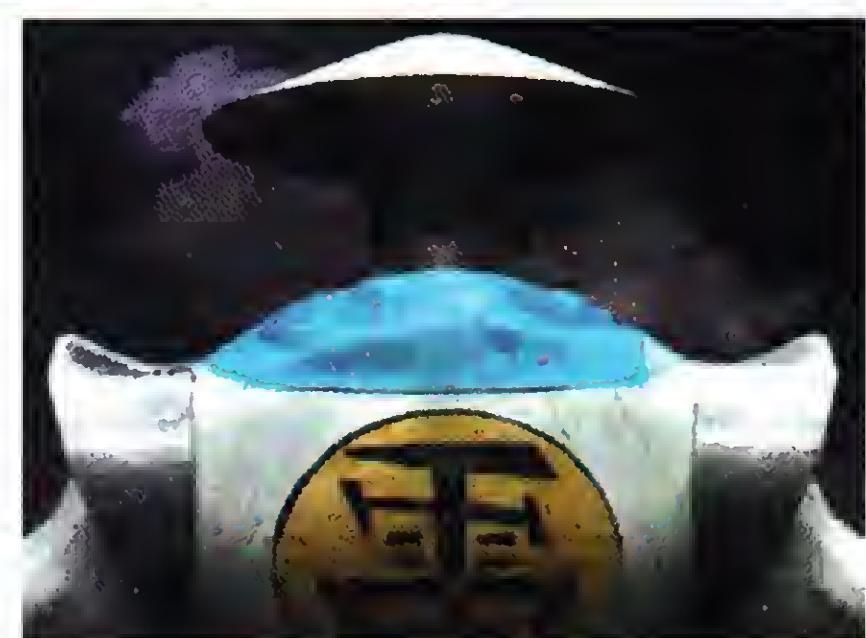

MORTAL KOMBAT 4

Midway • 9/97

The next chapter in the amazing *Mortal Kombat* saga is in the works, and it holds quite a few surprises for loyal fans of the series. For starters, the two-dimensional, side-by-side fighting format of all previous *MK* games is being replaced by an all-new 3-D design that features interactive backgrounds ("characters will be able to knock things over"), unique blood effects ("different from *Resident Evil* and different from *War Gods*") and character costumes that are affected by gameplay. The photos you see here have been taken from a "teaser" video clip released by Midway; they're the first images of *Mortal Kombat 4* to be seen by the public. It's not known if the graphic quality of these photos is comparable to the way the characters will appear in final gameplay; however, Midway's proprietary 3-D hardware technology—code-named "Zeus"—has been described by *Mortal Kombat* co-creator Ed Boon as "incredible." It's also expected to be much more affordable than Sega's Model 3 hardware, which has inflated the price of games like *Virtua Fighter 3* and *Super GT* to

the point where many arcade operators can't afford to stock them. Characters who appear in this sneak preview include Raiden, Liu Kang, Sonya, Sub-Zero and Scorpion; Johnny Cage is also reported to be returning. Of the never-before seen fighters in *Mortal Kombat 4*, at least one is a new character who was created for a game called *Mortal Kombat Mythologies*, which is being developed concurrently (see below for more information.) Look for more information on this highly-anticipated arcade game in future issues of *Tips & Tricks*.

Other New Game News...

- In addition to his work on *Mortal Kombat 4*, MK co-creator John Tobias is also spearheading the design team of *Mortal Kombat Mythologies*, an adventure/fighting game for the PlayStation and Nintendo 64 starring Sub-Zero. Described as something of a cross between *Mortal Kombat* and the *Resident Evil/Alone in the Dark* school of action/adventure games, *Mythologies* is the first home video game to be designed and programmed internally at Midway's offices in Chicago. (All home versions of Midway arcade hits like *Mortal Kombat*, *NBA JAM* and *Revolution X* were converted from the coin-op originals by third-party software developers.) The story-line of *Mythologies* takes place before the action of the original *Mortal Kombat* game; fans of the series will find out everything they always wanted to know about the long-standing blood feud between Sub-Zero and Scorpion. Expect lots of full-motion video intermissions—especially in the PlayStation version—and look for appearances by Raiden and Liu Kang. *Mortal Kombat Mythologies* is due in stores by November.

- Sega's underrated *Last Bronx* arcade game is on its way to the Saturn; the sneak-preview photo below does not include backgrounds or energy bars, but it does give you an idea of the level of character detail. A release date has not been announced.

- Upcoming Saturn releases from Sega include *Sky Target*, a conversion of the arcade jet-fighter game, due in July.

- Development of new 16-bit software has slowed to a crawl; we only know of a handful of future releases for each system as

follows:
Super NES—*Harvest Moon, Brunswick's World Tournament of Champions, Midway Presents Arcade's Greatest Hits: The Atari Collection* and *Timon & Puumba*.
Genesis—*World Series Baseball '98, Midway Presents Arcade's*

Greatest Hits: The Atari Collection and *The Lost World: Jurassic Park*. Even worse is the Game Gear situation; the only confirmed future Game Gear release is *The Lost World: Jurassic Park*, due in July. Who could have guessed that the Game Boy would outlast all three of these systems?

- Midway's *War Gods* is on its way to the Nintendo 64; we recently got a look at a preview copy and were surprised to learn that the developer, Eurocom, had added several new gameplay elements that were not in the original arcade version, including combo breakers and "get-up" attacks (for when you get knocked down.) Look for a comprehensive *TIPS & TRICKS* strategy guide in the very near future.

- The latest arcade game from Sega's AM1 division is *The House of the Dead*; early reports say it looks like "Virtua Cop meets *The X-Files*." Imagine *Virtua Cop* with ghouls and zombies instead of crooks. Look for it in American arcades this May.

- Midway's next retro-gaming extravaganza for the PlayStation is *Midway Presents Arcade's Greatest Hits: The Atari Collection Volume 2*. It's expected to include arcade-perfect emulations of *Gauntlet*, *Crystal Castles*, *Marble Madness*, *Paperboy*, *Millipede* and *Roadblasters*. Yessssss!

- Just as we went to press, Konami confirmed that its first Japanese Nintendo 64 title, *J. League Perfect Striker Soccer*, will be released in America. The official release date and American title are still pending.

It's a ghostly version of Mario with much-improved acceleration and top speed; you must complete the course with a total time of less than 1'27"00 if you want to beat him. Press R at the title screen to show off your best time on the Mario Raceway course.

Ghost Luigi

Race on the Luigi Circuit course in Time Trial mode until you get a total time of 1'52"00 or better. As above, you will be challenged by the "course ghost" the next time you return to that course in Time Trial mode; this time it's a ghostly version of Luigi. You must complete the course with a total time of less than 1'48"45 if you want to beat him.

MORTAL KOMBAT TRILOGY**Play as Khameleon**

When the "story" screens appear during the game's demo mode, quickly press C▶, C▲, A, B, C▼, C▲, C▶. If you're fast enough, you'll hear Shao Kahn say, "Khameleon." Now Khameleon is a selectable character at the character-select screen.

Play as Motaro

Choose any character, hold High Kick + Low Kick and point the D-pad or joystick away from your opponent before the battle begins. When the fighters appear on the screen, you might change into Motaro. Note: This trick only works in certain stages, including the Wasteland and Jade's Desert.

Play as Shao Kahn

Choose any character, hold High Punch + Low Punch and point the D-pad or joystick Down before the battle begins. When the fighters appear on the screen, you might change into Shao Kahn. Note: This trick only works in certain stages, including the Rooftop and The Pit 3.

Hidden Game #1

After playing 50 consecutive games in two-player mode, you'll get to play a hidden game that's similar to Pong.

Hidden Game #2

After playing 100 consecutive games in two-player mode, you'll get to play a hidden game that's similar to Galaxian.

Hidden Game #3

When fighting on The Pit stage, keep an eye on the moon in the background. If you see a shadow of any kind flying in front of the moon, press the Z button; if you do this, the winner of that match will get to play a hidden game that's similar to Space Invaders. This game also appears if you play 150 consecutive games in two-player mode.

Stage Select

At the character-select screen, highlight Sonya, hold Up and press START, then choose your character normally. A "Select Kombat Zone" option will appear before the fight, allowing you to choose the stage you'd like to fight in.

Super Hard Mode

At the character-select screen, highlight Kano, hold Down and press START, then choose your character normally. When the "Choose Your Destiny" screen appears, you'll find that all of the battle plans have been changed to make them much more challenging. The "Novice" plan now includes three endurance matches instead of one, and the "Champion" plan starts with battles against Khameleon and Motaro—followed by a whopping eight endurance matches.

Free Play

When the "story" screens appear during the game's demo mode, quickly press Down, Down, Up, Up, Right, Right, Left, Left on the D-pad. You'll hear a crunch sound to confirm the code. Now when you die in a one-player game, you'll find that the credit counter has been replaced by the words "Free Play", which indicates that you can continue as many times as you wish.

Secret "More Kombat" Menu

When the "story" screens appear during the game's demo mode, quickly press Run, High Punch, Low Punch (that's C▼, B, A in the default control configuration.) You'll hear Shao Kahn say "Outstanding!" Now press START to access the Kombat menu, then hold Up and press START. When the main menu appears, you'll find a new option with a blue question mark; this cheat menu allows you to activate the stage-select feature, disable throwing, activate unlimited "run" meters, turn on "Bloody Kombat" and activate the two secret characters, Human Smoke and Khameleon.

When the main menu appears, you'll find a new option with a red question mark; this cheat menu allows you to activate Free Play mode, disable the Fatality timer (giving you infinite time to do a finishing move), set one-round matches or turn the game's collision boxes on. The collision boxes are tools that the programmers use to check the characters' hit detection,

STOP THE PRESSES! Wow, we are really impressed with the Mario Kart 64 fans who have been sending us photos of their best times on the Mario Raceway course! First we challenged our readers to beat our measly 1'28"43 time, which we improved to 1'26"99 last issue. As you saw in the Readers' Tips section on page 6, reader Jeff Martinovich managed to beat that total by over one second. However, just as we wrapped up this issue we received two amazing photos. On the left you see a Mario Raceway time of 01'24"67 from a reader named Martin Gilmore. Even more interesting is the photo on the right, which was sent in by Laurie Harris of Eclectic, Alabama. Her best time of 01'24"79 is just 12/100ths of a second shy of Martin's scorching run, but take a closer look at the photo: She did it with Yoshi, not Toad, the character nearly everyone else has been using. Is Yoshi really the game's secret weapon?

but you can use them to study the attack ranges and defense parameters of your favorite fighter. When you attack, a blue box appears that shows the area of the screen that's within range of your attack and a red box appears that shows your opponent's vulnerable area. If the blue box touches the red box, your attack will connect. Note that the above code also activates the blue question mark menu as described above.

STAR WARS SHADOWS OF THE EMPIRE**See the Ending**

Enter your name as " Credits" (the first character is a space) or use the "Rename" option to change your name to this. When you choose a level and start the game, you'll go directly to the game's ending and credit sequence. Note: When entering the name, be sure that the "C" is the only letter that's capitalized.

WAVE RACE 64**Ride the Dolphin**

Enter Stunt Mode and choose the Dolphin Park course. To activate the trick, you must perform all of the possible stunts—that means you must do a handstand, ride backwards, stand up, do a somersault, do a vertical flip off a ramp, do barrel rolls off a ramp in both directions (clockwise and counter-clockwise) and do the submarine dive off a ramp. You must also go through all of the rings and finish the course before the timer expires. The easiest way to accomplish this difficult task is to do all of the non-ramp stunts at the beginning of the course, before you reach the ramps; you can even do one stunt—like the stand and somersault—before you cross the starting line and you should still have enough time to reach the first checkpoint. There are only four ramps in the course, so you

must do a different ramp stunt on each of them. If you can do all of the above correctly, you should hear the dolphin chattering happily when you cross the finish line. With this trick accomplished, return to the main menu, choose Championship mode and select the "Warm Up" option. When the Watercraft Select menu appears, highlight the character you want, hold the joystick Down and press a button to confirm your choice. (If you want the alternate-color character, hold Up on the D-pad while holding Down on the joystick.) When the race starts, you'll be riding the dolphin instead of a jet ski. With the dolphin trick accomplished, you'll also find that the game's demo mode alternates between the normal demo and a new demo of people riding dolphins.

WAYNE GRETZKY'S 3D HOCKEY**Multiplayer Practice**

To play in Practice mode with more than one player, each player aside from Player 1 should hold the A button at the title screen, then have Player 1 highlight "Practice" and press A. If you do this, all of the other players who were holding A will get to play in practice mode with you.

Instant Start

To start a game quickly, hold any button except A at the main menu and press START; you'll immediately jump to the face-off with you playing as Gretzky on the Rangers.

Select Opposing Team

When playing against the computer, go to the "Select Your Team" menu, highlight the team you wish to play against and press the C► button three times; you'll hear a click to confirm that the highlighted team has been chosen as your opponent.

Player Size Tricks

At the Options menu, hold the C▲, C◀ or C▼ button and press R; you'll see a line of numbers called "Specials" at the bottom of the screen. The first six digits control the way your character appears in the game as follows:

Big Heads—Hold the C▼ button and press R until the first two digits of the "Specials" option are "10".

Huge Heads—Hold the C▼ button and press R until the first two digits of the "Specials" option are "01".

Tiny Heads—Hold the C▼ button and press R until the first two digits of the "Specials" option are "11".

Tiny Players—Hold the C◀ button and press R until the third digit of the "Specials" option is "1".

Short, Fat Players—Hold the C▲ button and press R until the fifth digit of the "Specials" option is "1".

Tall, Thin Players—Hold the C▲ button and press R until the sixth digit of the "Specials" option is "1".

Some of these effects can be combined; for example, if you want giant players with tiny heads, use the above codes to change the first four digits of the "Specials" option to "1101". Some of the codes also change the announcer's voice in a humorous way.

Forfeit Game

During a game, press START to pause, then access the Options screen. Hold the L button and press C◀, C◀, C◀, C◀, C◀, C◀; the seventh digit of the "Specials" option will be changed to "1". When you return to the game, you'll find that the game clock is at 0:00 and the score is 1-0 against you.

Trade Players

At the Options screen, hold the L button and press C▼, C▼, C▲, C▲, C▼, C▼, C►, C►, C►, C▼; the eighth digit of the "Specials" option will be changed to "1". Now return to the main menu, choose "Records" and access the "Team Stats" option. When the team stats appear, press the C▲ button ten times. A secret "Modify Teams" menu will appear. Use the D-pad or joystick to choose two teams to modify, then press A. The roster of the first team appears on the left; press B to change the team on the right. Use Up or Down to highlight the name of the player you want to replace, use Left or Right to highlight the name of the player you want to replace him with. Press A to make the substitution. Press START to advance to the other team to modify; when you're finished (or if you just wanted to mess with one team) press START to return to the "Team Stats" screen.

Frequent Fight Mode

At the Options screen, hold the L button and press C▲, C▲, C▼, C◀, C►, C►, C◀, C◀, C►, C►, C◀, C◀. The "Specials" option will appear with the ninth digit changed to "1". Now start a game in Arcade mode with fighting turned on; you'll have fights breaking out approximately every 20 seconds.

Access Super Teams

At the Options screen, hold L and press C►, C◀, C◀, C►, C◀, C◀, C►, C◀, C◀. The "Specials" option will appear with the tenth digit changed to "1". Now you have access to four super teams at the "Select Your Team" menu: USA, Canada, Williams Entertainment and the "99ers".

See Company Logos

Press Z at the Options menu to view the different company logos that appear on the sides of the rink during the game. This only works if you choose Options from the main menu, not while a game is in progress. You can also do this at some of the other menu screens, like the "Records" menu.

AIR COMBAT

Secret Loading Screen

Hold the **R1** and **O** buttons at any point in the game when the standard "bird logo" loading screen is about to appear. If the "bird" screen appears, you're too late—but if you held the buttons down at the right time, you should see a new, black loading screen with little compact discs bouncing around.

Hidden Game

When the secret CD loading menu appears as described above, quickly press **Up, Left, Down, Right**. A tiny picture of a Fygur—the dragon character from Namco's classic *Dig Dug* arcade game—will appear in the lower left corner of the screen to indicate that the code worked. With this cheat in place, start the game, or return to the title screen and continue to reach the "loading" screen again. This time, don't hold any buttons—the "loading" menu will be replaced by a strange hidden game in which you must steer the Air Combat bird symbol around the screen and destroy as many of the passing ships and missiles as you can before a tiny bird can walk from the left side of the screen

to the right. Use the **L2** and **R2** (or **Left** and **O**) buttons to spin the symbol clockwise and counter-clockwise; if you don't press any buttons, you'll crash into the walls and die. Tap the **R1** button to toggle between three different control configurations. Get a score of 4.60 or higher and you'll get something...but we're not sure what.

999,999,000 Credits

At the special CD loading menu, quickly press **Down, O, △, △, △, O, △, O, △**, then press **O+△** simultaneously twice and hold both buttons down after the second press. You'll see a Pooka character from *Dig Dug* appear in the corner of the screen. Now start the game and visit the fighter select screen. You'll see that you have instantly earned an incredible 999,999,000 credits which you can use to buy any ship or wingman available.

Different-Colored Ships (1P Mode)

At the CD loading menu, press **Up, Down, Left, Right, Up, Down, Left, Right, R1**—continue to hold the **R1** button until you see a spaceship appear in the corner of the screen. Now start the game, and notice that when choosing your plane, all of the standard ships have been painted different colors.

Different-Colored Ships (2P Mode)

At the CD loading menu, quickly press **Left, Right, Left, Right, Down, Up, Down, Up, O, O, △, △**—continue to hold the **△** button until you see an insect appear in the corner of the screen. Extra Wingmen

At the CD loading menu, hold the **R1** button and press **START** 10 times (continue to hold **START** after the tenth press.) This code is tougher to do than the others, but when you get it to work, you'll find more variety in your available wingmen.

- If you select the VR bonus before entering Stage 4, you can destroy the helicopter easily by using the VR to freeze all of the enemies just as the helicopter appears. Now you can ignore the enemies and concentrate on firing super batarangs at the helicopter.

- When the Monarch Bat makes its sweeping attack, press Punch + Kick to block; you won't take any damage. However, blocking will not protect you from the bat's fire attack.

- At the start of the game, if you jump on the hood of the Batmobile and stay there, you can prevent it from driving away so quickly.

BATTLE ARENA TOSHINDEN**Boss Codes**

To play as Gaia:

Turn the game on and wait for the title screen to appear. While the words "1P GAME," "VS HUMAN," "VS COMPUTER" and "OPTIONS" are flying in from both sides of the screen, quickly press **↓ ↗ + □** before all of the text appears. You'll hear "Fight!" and

the small text on the title screen will change from blue to pink. (If you don't get it to register the first time, you must wait for the demo to begin or start a game and cancel to return to the title screen; the code won't work if you're returning to the title screen from the Options menu.) At the fighter-select screen, highlight Eiji, hold Up on the D-pad and press any action button.

To play as Sho:

First enter the Gaia code. Next, wait for the title screen to appear again as described above. This time, while the words are flying into the screen, press **→ ← ↗ + □** on Controller 2; you'll hear "Fight!" again and the text will change from pink to a greenish color. With that code in place, start a game. At the fighter-select screen, highlight Kayin, hold Down on the D-pad and press any action button.

To choose the alternate-color version of Gaia or Sho, press **SELECT** before you hold the appropriate direction on the D-pad as described while choosing each character.

Easy Desperation Moves

Visit the option menu and configure your controller so that the L and R buttons are set up to trigger "Special 1", "Special 2", "Special 3" and "Special 4"—setting A4 is a good example. Now you can trigger any character's desperation attack simply by pressing all four L and R buttons at exactly the same time whenever your energy bar is flashing red. Note that you can only choose the "special" control settings when the game's difficulty is set at "Easy" or "Very Easy"...unless you use the "Easy Special Attacks etc." code listed below.

Easy Super Moves

In addition to the desperation moves, each fighter in *Toshinden* also has up to three "Super" moves which are very difficult to execute, but can be used at any time during a match. Here's a list of the "Super" attacks, all shown as if your character is facing the right:

Eiji: **↑ ↓ ↑ ↓ → ← ← + △ + ○**

Kayin: **→ ↓ ← ← → ← + ○ + X**

Sofia (1): **→ ↓ ↓ ← ← ↓ + △ + X**

Sofia (2): **↓ ↗ ↓ ← ← ↓ + △ + ○**

Rungo: **↗ ↑ ↗ ← ← ↓ + △ + ○**

Fo (1): **→ ↑ ↗ ← ← + □ + ○**

Fo (2): **→ ↓ ↗ ← ← ↓ + △ + X**

Fo (3): **△ ○ ← ← ← + △ + ○**

Mondo: **↗ ↑ ↗ ← ← ↓ + △ + ○**

Duke: **↓ ↗ ↓ ← ← + □ + ○**

Ellis (1): **↗ ↑ ↗ ← ← + □ + ○**

Ellis (2): **↓ ↗ ↓ ← ← + □ + ○**

Gaia: **↓ ↗ ↓ ← ← + □ + ○**

Sho: **↓ ↗ ↑ ↗ ← ← + □ + X**

The "Super" moves can be more trouble than they're worth, since they're so difficult to pull off. To make things easier, try this: First, enter both "boss" codes to access Gaia and Sho as described above. With those codes in place, wait for the demo to begin again, then return to the title screen once more and press **↖ + X** on Controller 1 while the words are zooming in. You'll hear the word "Fantastic!" and the text will change to white. With this code in place, set the Control Type for all four "Specials" as described in the "Easy Desperation Moves" code above. Now, at any time during the game, you can trigger one of your charac-

ter's "Super" attacks simply by holding the **SELECT** button and pressing all four L and R buttons at exactly the same time.

Easy Special Attacks at Any Difficulty Setting

Once you've entered all three title-screen codes as explained above, wait for the demo to start and return to the title screen as before. While the words are zooming into the screen, press **→ ← ↗ + □** on Controller 2; you'll hear "Fantastic!" again and the text will change to yellow. With this code in place, you will be able to choose the "Special" Control Types—A3, A4, etc.—at any difficulty setting, not just "Very Easy" and "Easy".

Camera Controls

Go to the Options menu and choose any control type that has all four of the top buttons set to "NOT USE." Move down to the Camera Action setting; you'll find a new camera angle option called "Camera." With this setting, you can change camera angles almost exactly as described under the codes for the original *Battle Arena Toshinden* game; the only difference is that you can't pan left or right.

flying in from the left side of the screen, quickly press **○**, **R2**, **L1**, **X**, **L2**, **R1** before all of the text appears. You'll hear a signal to confirm the code if you're fast enough. At the fighter-select screen, highlight the "?" box; Vermilion and Sho are now included in the random characters that appear. To choose them more easily, hold the **SELECT** button; this slows down the random-select feature.

Camera Controls

At the Options menu, set all four of the top buttons to "NOT USED." Move down to the Camera Action setting; you'll find a new camera angle option called "Camera." You'll see the "Credit" counter in the lower right corner start to increase as you're tapping, but it gets more and more difficult as the timer counts down. When the timer runs out, that's it. You can return to the title screen and try the code again to accumulate more credits, but the total credits will be cut down to nine each time you return to the Option menu. Also, if you use an auto-fire controller, the Credit counter may reset to 1 if you manage to get over 30 credits.

FOX HUNT

Disk 1 Tips

Jack's apartment—Make sure to collect the video book and the keys that are hidden in the chair. Just as your timer expires, Fat Freddie will enter the scene. It is not necessary to defeat him, but remember remembering which window he escapes from.

Back room of Flower Shop—Find the taco (spy weapon) and the CIA identification card. Attempting to use the computer or taking too much time will trigger the end of the interactive portion of the scene.

Jack's apartment, Part 2—Pick up the knife and the bullet found on the table. You may encounter Fat Freddie once again. When Frank enters the room, exit through the same window that Fat Freddie did.

Hospital Scene—Starting on the third floor, follow the hallway without turning unnecessarily. When you reach a 'T' intersection, turn left and follow the hallway into the waiting elevator. From the second floor, turn right at the first fork and keep following the hallway without making any unnecessary turns to find the next elevator. On the first floor, continue straight through the first intersection, turn right at the next, left at the next, then proceed to the exit. Note: In Strategy Mode, there are only two floors.

Venice Stores/Fleurde Spy—Do not go directly into the waiting car. Inspect a nearby vacation poster and note the number of grass huts in it, then turn around and move forward into the six-hour express delivery store.

Disk 2 Tips

Depending on your previous actions, Jack may go to either Las Vegas or Aspen.

Las Vegas—The first two showgirls can be defeated by just blocking. Punch the third showgirl once, then continue with kicks only. The last one can be defeated with a simple block. Attack or block them when they begin moving or when their facial expressions change. Before leaving Las Vegas, you must go to another six-hour express store.

Aspen—Follow the ski hut sign that corresponds to the number of grass huts that you counted in the poster outside the hospital. Move through the ski gates in a left/right pattern and don't miss more than two snowboarders if you want to pick up the gold medal. Immediately find another six-hour express store. Note: In Strategy Mode, Jack will always get the gold medal. However, you must still do well to reach the six-hour express.

Las Vegas, Part 2—in the segment after speaking with Chauncy, you are working against the clock. Find a blue feather (placed randomly), a bullet (in a bra) and a knife (in a red book under some underwear). If you take too long, continue through the curtains and up the ladder to reset your time. Once up the ladder, pick up a gambling chip and proceed to the rack of gambling chips. Move the chips to reveal some powder. Move the powder to reveal the clue that tells which deck of cards to choose later on.

Playing Blackjack—Watch the clip from the video book, paying attention to the man's actions. The CIA guy will instruct you on the first two hands. The third one is up to you. If the Wolf performs the identical movement as the man in the video book, take a card. Otherwise, stand. Win three hands to go to Disk 3. Note: As long as you have the knife, you will automatically move to disk #3, but you don't win three hands of Blackjack you will have no money.

Disk 3 Tips

Fighting in the final stages—You must battle both Alans, some Russian wrestlers, a caveman and Frank. When battling the Alans: If

they begin to swing, block; if they wait (in a dumb boxing-type pose), punch or kick. They are the toughest. The rest of the battles can be won with roundhouse kicks and leg sweeps.

Fox Hunt video game—Shoot the duck, not the foxes.
The chase in the tubes—Shoot the bad guys ahead of you and avoid the gunfire from behind. Maneuver the guys from behind you to the front while spinning to avoid their gunfire. To get behind your opponent, turn down the tube with the white light illuminating it, watch which way your opponent turns and follow. Now shoot and destroy. Keep this up until the Wolf is caught.

Stage Select

At the arena select screen with the globe in the background, highlight Russia, the only available mission at the start of the game. Next, press Right, but before the Japan mission information appears, press X + Down/Left on the D-pad and hold them. You'll see the globe bouncing through the different arenas. Now release the buttons to begin at whatever arena is facing you on the globe at the moment you let go. You won't see the names of the missions as they pass by, so it's difficult to tell which one you've selected, but with practice you can pick the one you want by counting the rotations of the globe or by watching the position of the sun and planets in the background.

At any time during the game, press the START button to pause. When the pause menu appears, hold the L1 and L2 buttons for approximately ten seconds; this will "lock" the red rectangular cursor in place. If you can still move the cursor up and down with the D-pad, then you need to hold the L1 and L2 buttons a little bit longer. After the cursor is locked up, continue to hold the L1 and L2 buttons and enter the following codes to add cheat options to the pause menu:

AMMO: Down, Right, O, Left, Right, O. Select this option to boost your ammo.

Enter the code Dragon-MK-Dragon-Goro-Skull-Goro by pressing R1 once, △ six times, X six times and O nine times. Turn "Free Play" on for infinite credits in the one-player mode. Turn "Smoke" on to activate him as a playable character without using the Ultimate Kom-Bat Kode. Turn "Fatality Time" off to give yourself infinite time to perform fatalities. Turn "Level Select" on and you'll be able to choose any stage—including the Hidden Portal—from a menu at the bottom of the character-select screen after you choose your fighter. With "One Round Match" on, fights will last just one round, and with "One Hit Death" on, the first player to strike will automatically win the round.

If you're having trouble remembering this code, here's a simpler version: During the opening demo, press X, L1, L2. You'll hear a whooshing sound. Now you can access a shorter version of the cheat menu without the "One Round Match" or "One Hit Match" options.

MORTAL KOMBAT TRILOGY

He's a semi-transparent ninja who randomly morphs into other ninja characters.

Secret Cheat Menu

Choose "Options" from the main menu, then highlight "Game Configure" and hold L1 + L2 + R1 + R2 + Up. After a few seconds, you'll hear a confirmation sound and the screen will shake. Now you can access the previously unavailable "?" menu at the Options screen. Here you can activate several cool options, including "Instant Aggressor," "Normal Boss Damage," "Low Damage" and "Health Recovery." Best of all, if you turn on the "1 Button Fatalities" option, you can perform finishing moves with ease as follows:

Extended Roster

Each of the NBA teams in Jam T.E. has more than three players available to choose from. To find these hidden bonus characters, just put the cursor on the team you'd like to choose, hold the SELECT button and rotate the D-pad in a counter-clockwise direction. A card will drop from the top of the screen that says "EXTENDED ROSTER"; now you'll see extra players as you toggle through the line-ups with the SELECT button. Note that if you choose the extended roster for one team, then decide to choose a different team, the extended roster will not be available for the second team. This trick also works at the "Substitution" screen.

Power-Up Codes

Just like all of the other versions of NBA JAM, the PlayStation Tournament Edition offers plenty of power-up codes. Each of these codes must be performed at the "Vs." screen, when the announcer is saying, "Tonight's match-up...etc." In most cases, you'll see text on the screen that tells you the code is in place. Some of the codes don't

show you immediate results on the screen, but you'll know they have been activated if you see your player flashing white before the tip-off.

TEKKEN

Galaga Secrets

To continue playing the Galaga loading game as many times as you wish, just press the SELECT button whenever the screen displays your "Number of Hits". If you score a perfect 40 ships in the first round, the game will automatically continue to the next wave; there are eight waves in all. If you don't like using the D-pad to move your ship, you can use the L and R buttons on top of the controller. Holding the △ button gives you rapid-fire.

Double Ships

There are two ways to get twin ships in the mini-Galaga game.

Method 1: If you destroy a perfect 40 ships in the first wave with a total time of 18.5 seconds or less, you'll get the double ships for the second wave through the rest of the game.

Method 2: When you first load the game, wait for the PlayStation logo to appear, then hold Up, L1, △ and ✕ on Controller 2 until the Galaga game starts. Now you can use the twin ships on the first wave.

Secret Character: Devil Kazuya

To play as Devil Kazuya, you must score a perfect "40" on all eight waves of the Galaga game without using more than one continue and without using Method 2 (described above) to get the twin ships. After you've done this, start the game in Arcade mode, highlight Kazuya and press the START button to choose his evil alter-ego.

Play as the Boss

You've probably noticed the extra characters that you can earn in Tekken by beating the game in Arcade mode. Each of the game's eight characters will "release" one additional fighter when you beat the game with him or her. If you beat the game with all eight characters, you'll earn an additional eight hidden characters to use in Arcade or two-player mode. To earn the big boss, Heihachi, as a playable character, you must beat the game with any character in Arcade mode without continuing. You may find it easier to do this if you visit the option menu and set the round time to 20 seconds; it also helps to choose one-round battles.

Hidden Character Demos

With the exception of Devil Kazuya, you can watch any of the game's fighters mixing it up in the demo mode. To do this, hold down the buttons as shown while the game is in demo mode:

Kazuya: Hold ↑ on the D-pad

Paul: Hold ↗ on the D-pad

Law: Hold → on the D-pad

Jack: Hold ↙ on the D-pad

Nina: Hold ↓ on the D-pad

King: Hold ↛ on the D-pad

Yoshimitsu: Hold ← on the D-pad

Michelle: Hold ↜ on the D-pad

Heihachi: Hold L1+L2+R1+R2

Lee: Hold L1+L2+R1+R2+↑ on the D-pad

Kuma: Hold L1+L2+R1+R2+↗ on the D-pad

Wang: Hold L1+L2+R1+R2+→ on the D-pad

Ganryu: Hold L1+L2+R1+R2+↙ on the D-pad
Kunimitsu: Hold L1+L2+R1+R2+↗ on the D-pad

This also works on Controller 2. For example, if both players hold all four L and R buttons on top of both controllers, the demo will show Heihachi fighting Heihachi.

Mystery Fruits

At the Test Modes menu, set the "2P Game Wins Shown By" option to "Fruit". Now start a game in Arcade Mode, but join in with Controller 2 whenever a one-player fight starts. Let one player win over and over again to see the fruit counter in the corner of the screen change to different wacky symbols. At the 25th battle, a "Special Flag" symbol appears. This icon has special significance; it appears in several classic Namco arcade games. You'll also see some characters from Pac-Man including the dot-eater himself.

TEKKEN 2

Hidden Characters

When you beat the game in one-player mode with a particular character, the "boss" character you defeated will become available as a playable character in all game modes. When you play in one-player mode as one of the "boss" characters, you'll face Kazuya; beat him and he, too, will become a playable character. Beat the game as Kazuya and you will face Devil; defeat him to add Devil and Angel to your ranks. Finally, when playing in one-player mode, you must win Stage 3 with very little energy left; you'll hear the announcer say, "Great!" if you've met this requirement, and your next opponent will be Roger or Alex. Defeat him and you'll have all of the game's characters at your command. To play as Alex, highlight Roger and press either Kick button; to choose Angel, highlight Devil and press either Kick button. Note: You must have earned all of these characters to perform any of the following tricks:

• Kazuya's Purple Suit

Highlight Kazuya and press START to see his slick purple suit. This works in every game mode except Team Battle and can only be used by one player in a two-player game.

• Super-Deformed Characters

Hold the SELECT button before the "Vs." screen appears; your character will be inflated to super-deformed size. If you do this trick after you've already done it in the previous battle, you'll be even bigger.

• Punch-Out!! Mode

Hold the L1 and L2 buttons when choosing a character in any one-player mode. You'll be playing in a semi-first-person perspective with your character drawn in green wireframe, just like Nintendo's classic Punch-Out!! arcade game. There's a small gauge near the upper left corner of the screen that helps you to judge your distance from your opponent.

• Super Juggle Mode

Hold SELECT and Up on the D-pad before the "Vs." screen appears; when the round starts, you'll hear an explosion sound. Now whenever you use an attack that makes your opponent go up in the air, they will go much higher, which makes juggling more interesting.

TEMPEST X3

Power-Up Swarm

At the start of a stage in "Tempest X3" mode, shoot the first creature and fire your superzapper before the power-up reaches the top of the playfield; do not collect this first power-up. Now play normally and you will receive power-up items from nearly every enemy you shoot.

Cheat Codes

At any time during the game—at the title screen, menus or during the game—hold L1, R1, △, ○, START, SELECT and Up/Left on the D-pad. You'll hear a loud grinding noise to indicate that the master cheat code is in place. Once you've done this, you can do any of the following tricks during the game:

• Level Skip—Hold R1 and tap L1, then fire your superzapper. The screen will be cleared

and you will advance to the next stage immediately.

- Trippy Mode—Hold L2 + R1 + △ + ✕ and press Up. The graphics will leave freaky trails of light on the screen; perfect for those mind-altering experiments at your next party.

- .MOD Music—Hold L2 + R1 + △ + ✕ and press Right. The music will change to the .MOD music when you start the next stage.

- Remix Music—Hold L2 + R1 + △ + ✕ and press Left. The music will change to the remix music when you start the next stage.

- A.I. Droid—Hold L2 + R1 + △ + ✕ and press Down. You'll hear the A.I. droid say "Attack!". Now if you can make it through the current stage without losing a life or using the Level Skip cheat, the first power-up that appears in the next stage will give you the A.I. Droid.

High Score Trick

At the three-character High Score entry screen, enter your initials as "GAY". The blue shape in the background of the High Score screen will be changed to a spinning pink triangle.

Hidden Game Modes

Play until you earn the top spot on the High Score table; you must earn over \$00,000 points to get there. Once you do this, the game will ask you to enter a five-character name in addition to the usual three-letter initials. Enter your name as "H_V_S"; those are spaces in the second and fourth positions. Save the game to your memory card. Now you'll find two new game modes at the main menu: "Tempest Plus" and "Tempest 2000".

After the Jaleco logo disappears and the full-motion video scene starts, press START on Controller 1, or simply wait until the title screen appears; in either case, you must not release the buttons on Controller 2 until the title screen starts to appear. Now start a game in Scenario mode; when you enter the Speed Shop, you'll have 9,999,999 points to spend on any car modifications you want.

Press START to pause the game, then quickly press Up, Y, Left, A, Down, B, Right, C. You'll hear a whistle sound to confirm the code. Now when you continue the game, you'll find that you are completely invincible.

Secret Mode + 99 Lives

Visit the "Options" menu and press Left,

Right, Left, Right, Up, Down, L, R, START on Controller 2. (Note: This code may not work if you didn't have Controller 2 plugged in when you turned the Saturn system on.) If you enter the code correctly, you'll hear Astal shout and the words "Secret Mode" will appear at the top of the screen. Now highlight the "Lives" option and press Right; you'll find that—instead of being limited to just five lives—you can start the game with as many as 99.

Stage Select

Enter the "Secret Mode" cheat described above. Once that code is in place, return to the title screen and press Up, Down, Left, Right, L, R, A, Y, C, Z, B, X on Controller 1 while the words "Game Start" and "Options" are visible. You'll hear an exclamation from Astal to confirm the code and a new option called "Stage Select" will appear. Choose this item to select your starting level.

BAKU BAKU ANIMAL

League Mode

At the title screen—while the words "Press Start Button" are flashing on the screen, spell the game's title with the controller by pressing B, A, C, Up, B, A, C, Up. You'll hear a chorus of voices shouting to confirm the code. Now advance to the Main Menu and you'll find a new option called "League Mode". Here are rough translations of what the menu items say at the League Mode screen:

- Game Start: Start a game in League Mode. When you choose this item, you'll get a menu that asks you to select the names of the two people who will be competing. If you have not registered your name for League Mode play (see below) you must choose name 6, a generic name which will allow you to play without any records being saved. The last two items at the bottom of the play menu are "View Records" (see description below) and "Return to League Mode Menu".

- Name Entry: Choose from one of five save slots and enter your name. Move the cursor to the "ABC" item and you'll be able to enter your name with the standard alphabet instead of the default Japanese Hiragana characters. The three-character item in the upper right corner says "backspace" and the one in the lower right corner means "done".

- Delete Name: Use this option to remove any of the registered names from the machine's memory. When you select a name to delete, a small menu will come up which asks you to confirm if you really want to remove the selected player and all of his or her records from the league; choose the top item to say "Yes".

- View Records: Use this option to check your stats. The first screen shows your winning percentage; highlight your name and press A or C to view your win/loss records against each player.

- View Records / Return to Main Menu: The next-to-last menu item brings up a quick description of how the League Mode works; there's really nothing here that you can't figure out on your own just by playing the game in League Mode for a while. The last option at the League Mode menu takes you back to the Main Menu.

CHRISTMAS NIGHTS

Date and Time Codes

The *Christmas Nights* limited-edition sampler disk uses the Saturn's internal clock to change the game depending on the date and time you play the game. To force any of these changes whenever you want to, access the Saturn's System Settings menu and change the date and time to get different effects. Note: It's a little known feature of the Saturn that if you load a game, then hold the L and R buttons and press RESET on the machine, the System Settings menu will appear without having to load the CD menu; when you exit, you'll go right back into the game. This comes in handy when testing out some of the *Christmas Nights* features as follows:

- Enter dates from other times of the year to play with the standard *NIGHTS* settings. You'll also see Claris and Elliot's clothes change depending on the season.
- Enter the date April 1 to play as Realia; this will also add a new option to the Presents menu that will allow you to play as Realia whenever you want.

Also, if you've got the date set for a time of year when there's snow in the game, you can change the snow to different items as follows:

- At 9:00 AM the snow changes to crescent moon shapes.

Here's how it works: When a match is over and the words "Wins" appears on the screen (e.g. "Keel Wins"), press START to pause the game, then press the L button. A small menu will appear that allows you to choose the fighters for the next battle. Select your characters, then hit L again and unpause the game. After the point tally, the game will go to the loading screen—but instead of returning to the full-sized character-select menu, you'll go straight into another match with the characters you chose from the mini-menu.

Magic Attacks

To perform your character's Magic Attack, knock the little elves who pass by and pick up the potions that they drop. When you have five potions, push X+Y+Z to activate the magic attack power, then perform the move listed below while your character is powered up. Note that all of these moves are shown as if your character is facing to the right; if you're facing left, just reverse the left/right commands.

GRID RUNNER

"All Flags" Mode

Choose "Restore Game" from the main menu, then access the "Enter Password" screen. If there is already a password entered, press R to clear it first; otherwise, enter the password $\downarrow Y \rightarrow A \rightarrow \uparrow \rightarrow B A \downarrow$ and press $START$ to confirm. Now start the game and you'll find that you have to capture all of the flags on each level instead of the usual designated number.

"Free-For-All" Mode

Choose "Restore Game" from the main menu, then access the "Enter Password" screen. If there is already a password entered, press R to clear it first; otherwise, enter the password $\uparrow Y A \rightarrow \uparrow Y B \downarrow \rightarrow \downarrow$ and press $START$ to confirm. Now start the game and you'll find that neither player is "it" and you can both capture flags at any time.

See the Ending Credits

Access the "Enter Password" screen, enter the password $A Y A \rightarrow \downarrow Y \uparrow \rightarrow \rightarrow A$ and press $START$.

GUARDIAN HEROES

Cheat Mode

To access a Debug feature, choose "Option Mode" from the title screen. When the Options menu appears, highlight "EXIT" and hold the X, B and Z buttons. Here's the tricky part: While holding those buttons down, press and continue to hold $Down$ on the D-pad, then quickly tap the A button while the "DIP Switch" option is highlighted. Note that you must tap the A button before the cursor starts to move down again—remember that you're still holding $X+B+Z+Down$ —and you must release the A button immediately after you press it, before the DIP Switch menu appears.

If you've done this correctly, you'll find three new options at the dip switch menu. Turn the "Enemy Level Disp." option on to see the experience levels of all enemies in the Story Mode. With the "Next Exp. Disp." option on, you'll get a red-and-black "Next" indicator on the screen in Story Mode that saves you from having to pause the game just to find out how many experience points you need to go up a level. Best of all is the "Debug" option; turn this

on to gain access to the following features:

- A "Test Mode" option will appear at the Options menu; this allows you to see any of the game's seven different endings.

- In Story Mode, when the character set-up menu appears, your character will have a level of 200; you'll also have 200 bonus points to fully max out your strength, vitality, intelligence, mental powers, agility and luck ratings.
- In Story Mode, a stage-select menu will appear after you choose your character.
- In Story Mode, you can refill your life points at any time by holding $X+Y+Z$ and pressing Up. (If you hold $X+Y+Z$ and press Down, you'll die instantly.)
- In Story Mode, you can skip to different scenes using the following commands: Hold R and press $START$ to skip ahead one event

Hold $R+A$ and press $START$ to skip ahead two events

Hold $R+B$ and press $START$ to skip ahead three events

Hold $R+C$ and press $START$ to skip ahead four events

Hold $L+R$ and press $START$ to skip back one event

Hold $L+R+A$ and press $START$ to skip back two events

Hold $L+R+B$ and press $START$ to skip back three events

Hold $L+R+C$ and press $START$ to skip back four events

• In Vs. Mode, you can choose from any of 45 different characters, including all of the heroes and enemies from the whole game.

- In Story Mode and Vs. Mode, if you pause the game and tap the L button, you will see boxes drawn around the characters that show how the game's collision detection works; if an enemy touches the box, it registers a hit. If you pause and tap L a second time, the boxes will be three-dimensional. Pause and tap L a third time to remove the boxes.
- If you have both the "Debug" and the "Next Exp. Disp." options turned on, the red-and-black meter in Story Mode will display your karma points instead of experience points.

GUNGRIFFON

Cheat Codes

Each of the following codes should be entered at the main title screen, while the words "Press Start Button" are flashing yellow and white. Each of these codes ends with the $START$ button, which takes you into the main menu, so if you want to use more than one cheat at the same time, just enter a code, then choose "Main Game" or "Exercise" and press the B button to cancel out of it; the game will then return to the main title screen so you can enter another cheat. All codes should also be entered quickly.

Invincibility—Left, Right, $B, C, C, START$. Entering this code will make you invincible. **Stage Select**— $Y, Y, A, Y, Y, START$. With this code in place, you'll be able to choose any stage in the Main Game.

Infinite Jumping Ability—Up, Right, Down, Left, $Z, START$. This code disables your mech's jump meter. The jump energy will never be used up, so you can jump as often as you like.

Infinite Ammunition— $B, B, B, C, START$. This code gives you infinite 120mm ammunition for your main gun; the weapon status window will always show 80 rounds remaining no matter how many times you fire.

See the Ending—Down, Up, Right, $A, Left, START$. Enter this code, then choose "Main Game" to see the ending sequence.

Tackle Attack—Right, Right, $B, C, A, START$. This cheat code allows you to attack your enemies by running into them. However, your mech will also take damage if you use this attack.

Double Hit Points— $X, Y, Z, Up, Down, START$. Your initial hit points will be doubled. This code also doubles your maximum hit points.

Turret Lock— $B, B, B, Up, C, START$. If you rotate your mech's turret with this code in place, the turret will not automatically return to the forward position when you release the L button.

Change Height—Down, Left, $C, C, START$. When you enter this code, you can adjust the height of your mech at any time with the buttons on Controller 2. Press Z on Controller 2 to go up, C to go down or A to reset to the default height.

Disable Targeting Cursor—Left, Right, $C, A, START$. This makes the game more difficult by disabling your mech's targeting cursor. **Disable Radar**— $B, B, Down, C, START$. This makes the game more difficult by disabling your mech's radar systems.

Hard Mode—Down, $C, C, A, START$. This makes the game much more difficult; your enemies will shoot at you much more aggressively.

Silly Controller 2 Codes

During the game, press Right, Right, X, B, A, L, L, L, R on Controller 2 to activate the programmers' debugging display, a bunch of basically useless numbers that appear on the screen. With the code in place, press Y on Controller 2 to toggle between three different settings, the best of which is "off". Also on Controller 2: In Stages 1 and 10, if you press the C button rapidly many, many times, the windmills will eventually begin to turn faster and faster.

HANG-ON GP

Access All Courses

Access the Option menu and highlight any icon. Next, press B to return to the main menu, then press R, R, L, R on top of the controller; you'll hear a xylophone sound to confirm the code. Now you can race on the previously-unavailable courses without having mastered the first three.

HIGH VELOCITY

Secret Vehicle (The Hard Way)

If you've finished all 36 heats in *High Velocity*, you can access a top-secret hidden vehicle by entering the "Full Counter" course and choosing "Turn Left." You'll see a black Porsche sitting next to the restaurant; if you ram it from behind, you'll be able to choose the Porsche as your own vehicle.

Secret Vehicles (The Easy Way)

Go to the car select screen and highlight car type "F", then hold the L, R and Y buttons and press Right. The Porsche is now available without all the hard work. With

the Porsche highlighted, hold L, R and Y again and press Right to find yet another secret vehicle, a diesel truck.

Secret Course

At the "Mode Select" menu, highlight every available option and press the B button at each one, one at a time. When you press B at the last option, you'll see all of the menu options light up for a second to confirm the code. Now select the "Time Trial". When the "Course Select" menu comes up, highlight any of the three tracks, hold the X button and press A . You'll be sent to a secret rooftop course with no specific path from start to finish. The background scenery will match that of the track you highlighted at the "Course Select" menu. Press the Y button to get a pop-up window with an overhead view.

However, if you're in the middle of a campaign and you want to take control of the CPU forces, just access the "Sound" option from the System menu, go to the "Snd. Test" option and set the BGM to "5 UK". Now highlight the "SE" (sound effects) option and listen to all 116 sounds with the C button. Once you've triggered all of the sound effects, return to the system menu and you'll find that you can access the "CPU/User Options" to set up a multiplayer game.

Secret Attack Configuration Menu

When initiating an attack, a statistics screen will appear just before the animated sequence that shows the attack being carried out. If you press the A button on Controller 2 immediately as this statistics screen appears, you'll get a secret configuration menu that allows you to change the way the animated sequence looks. Change the weather from "Hare" (normal) to "Yuki" (snow), "Ame" (rain) or "Kumori" (overcast), or change the camera setting to any of nearly 100 pre-programmed camera movements (the default "100" gives you the recommended camera setting for that battle.) Still don't know what "Ruseki" means...

LAST GLADIATORS DIGITAL PINBALL

Hidden "Victors" Table

At the title screen, after the words "PRESS START BUTTON" appear, press X, Y, Z, X, Y, Z, C, B, A, Up, Up, START. You'll warp immediately to the "Victors" table, a small pinball machine which actually leads to the game credit sequence that plays when you beat the game. You'll only have a short time to play it before the credits roll, but hey, it's something.

If you're some kind of nut who wants to watch the ending credits without playing the "Victors" table, use this code at the title screen instead: C, B, A, A, B, C, Y, Z, X, Down, Down, START.

Debug Menu

If you can read Japanese, you might get a bit more out of this cheat than the average American gamer. At the title screen—when the words "PRESS START BUTTON" appear—press Up, Up, Down, Down, Left, Right, Left, Right, X, B, Z, R, START. You'll be sent to a strange debugging menu with different windows of information. The only thing you can play with is the small window that says "CPK" (actually, it says "CPK • Player" in Japanese.) Move the arrow/cursor to the "Mount" button and press A; you'll get a list of items in the window above it. To see or hear an item, highlight it with the cursor and A button, then point to the "Play" button and press A. The items that start with the letters "CDDA" are the digital audio tracks from the CD, and the items that end with "CPK" are full-motion video scenes; most of the others will lock up the Saturn, as will the "CDDA" and "CPK" items as soon as they're done playing.

Cheat Mode

At the title screen, after the words "PRESS START BUTTON" appear, press Up, Up, Up, Up, A, B, C, Down, Down, X, Y, Z, START. You'll hear a sound to confirm the code. Now start the game; at any time during

play (on any table), hold the X button and press Up; you'll see two sets of numbers appear in the bottom right corner of the screen. Change the number on the right by pressing Up or Down on the D-pad, then press Z to trigger one of the current table's special modes; for example, on the "Gladiators" table, each the following modes can be activated by pressing Z when the corner number is set as follows:

- 00—Multiball
- 01—Roman Triumph
- 02—Retarius
- 03—Bloody Arena (Two-Ball)
- 04—Chariot Races (Three-Ball)
- 05—Extra Ball Lit
- 06—Senator Mystery Lit
- 07—SPQR
- 08—Thracians
- 09—Empire
- 10—Gladiator Show

Experiment with the other tables to find out what each of the 11 numbers can trigger. The only limitation is that you can't trigger one mode if the results of another mode are still in effect. Also, the Saturn will crash after you run out of balls on any table with the cheat mode in place. Heh heh...sorry.

To remove the numbers from the screen, hold X and press Down; while the numbers are gone, hold Y and press Up to pause or unpause the game without obstructing the screen, or hold Z and press Up repeatedly to step through the animation one "frame" at a time.

Secret Scene

Last Gladiators uses the internal clock of the Saturn to play funny tricks on you. Assuming you have entered the date and time correctly at the Saturn's "System Settings" menu, you can see a behind-the-scenes video of the making of the game before the title screen appears if you load the game between 8:00 and 11:00 A.M. At any other time of day, you'll get the standard FMV introduction. If you want to watch this hidden scene at any other time, just change the Saturn's internal time clock at the "System Settings" menu and boot the game.

THE LEGEND OF OASIS

Two-Player Mode

At any time during the game, move Leon to a place where there are no enemies on the screen. Press Z to open the Weapon Select window, then hold the L button and press X. A duplicate of Leon will appear; he's controlled by Player 2. To get rid of him, just enter the code again.

LOADED

Cheat Menu

During the game, press START to pause, then highlight the "BGM Volume" option at the pause menu. Now press and hold the following buttons in order (you must continue to hold each button down until the sequence is complete): L, Z, B, X, C, R. A cheat menu will appear, allowing you to skip the current level or boost your ammo, power and lives. Once this code is in place, you can call up the cheat menu again at any time by pressing L at the pause menu.

One of the most unique fanzines we've yet reviewed in *TIPS & TRICKS*, Editor Ryan H. Smith's *SILICON* features game reviews, a feature article about the fate of the 3DO system and a thought-provoking editorial page. (We got a big kick out of the review section in particular; the reviews are well-written and helpful, but we couldn't help noticing how similar the layout is to the old review section in *T&T* Executive Editor Jim Loftus' former fanzine, *GameHead*.) So what's so unique about *SILICON*? Well, it's FREE! Yup, you heard right; it costs you nothing to receive this quarterly video-game fanzine. Now, we're not sure how he does it, but don't get all mad at him if you write and ask for a subscription and all of a sudden this policy changes. However, for now, you can get *SILICON* by contacting Ryan at *SILICON*, 89 Arundel Place, St. Louis, Missouri 63105. Subscriptions mailed outside the U.S. are \$15 per year (which seems kinda high; maybe that's where these guys get all of their money!) Anyway, if you contact Ryan, please tell him that you read about his 'zine in *Tips & Tricks*.

NHL ALL-STAR HOCKEY

Crazy Codes

To enable these codes, start a game in any mode. During the introductions—when the players are skating around on the ice prior to the start of the game—press L+R+X+Y+Z simultaneously, then release all the buttons. Once you've done this, you'll be able to enter the following codes during the national anthem to change the game.

- Press L+R during the national anthem for giant players.
- Press A+B during the national anthem for short players.
- Press A+Y+Z during the national anthem for upside-down players.
- Press X+Y+R during the national anthem for a spring-loaded puck. (When the puck is tipped or shot into the air, it will continue to bounce until it is touched.)
- Press A+X during the national anthem for a "black hole" at center ice. (A loose puck—if left untouched—will gradually be pulled into the center of the rink.)

Player Power-Up

To create a team of perfect players with fully powered-up attributes, choose the "Construct Player" option at the "Manage Rosters" menu. (If you have not already created a roster, you may need to do so before you will be allowed to access the "Construct Player" option.) Enter the new player's name, then advance to the "Player Construction" menu, where you'll see the default setting of 60 in each of the player's attribute categories. Now hold the A, B, C, X, Y and Z buttons down and press Up; you'll see the total in the "Point Pool" jump to 600. Use the extra points to give your new player a perfect rating of 100 in every category; you can create a whole team of superhuman players.

Secret Team

At the main menu, choose "New Game" or "Quick Start", then quickly hold A + Y + C before the screen fades to black. Continue to hold the buttons down until the team select menu appears; when it does, you'll find a powerful new team with a 99 rating, the Rad Army.

NIGHT WARRIORS DARKSTALKERS' REVENGE

Extra Turbo Speed

At the "Option Mode" menu, highlight "Turbo Speed" and press the following buttons very quickly on Controller 1: X, X, Right, A, Z. You'll hear a clashing steel sound to confirm the code; if you don't get it right, try pressing the buttons more quickly. With the code in place, you'll find that you are now able to set the Turbo

Speed all the way up to eight stars.

Secret "Appendix" Menu

Also at the "Option Mode" screen, highlight the "Configuration" option and quickly press B, X, Down, A, Y. You'll hear the clash of steel to confirm the code, and you'll see a new option called "Appendix" at the bottom of the screen. Choose this option to find a top-secret menu with tons of cool options as follows:

- "Turbo" and "Auto Guard" allow you to disable the in-game speed and guard prompts that appear before each battle; if you set "Turbo" to "On", you'll always play at the turbo setting you chose at the Option Mode menu.
- "Max Round" lets you change the round counter from three to one or five.
- "BGM" gives you the opportunity to change the game's background music into the music from the original *Darkstalkers* game! Choose the "Random" setting to have the game randomly choose between the music from "Classic" *Darkstalkers* or the default *Night Warriors* music (called "Hunter" after the game's Japanese title, *Vampire Hunter*).
- "Scenery" lets you alter the colors of the game's backgrounds to match those of the original *Darkstalkers* game. Also, if you set this option to "Classic" and watch the game's introductory demo, you'll see the intro from the original *Darkstalkers* game.
- Like the previous two choices, "CPU Color" gives you the ability to choose characters with the "Classic" *Darkstalkers* colors.
- "Full Animation" will restore several insignificant frames of animation to certain characters' movements which were deleted from the default "Cut" setting.
- "BGM Test" lets you listen to the game's music.

"Pause" Code

At the "Option Mode" menu, highlight "Screen Size" and quickly press A, C, Y, Y, Up. You'll hear the clashing steel sound to confirm the code. Now start the game, and you'll find that when you press START to pause, the screen will not darken and the word "Pause" will no longer appear.

Level 0

At the difficulty/options title screen, enter Up, Up, Up, Down, Down, Down, Left, Right, Left, Right, Left, Right, L, R. If done properly, Level 0 will start automatically. Your strength continuously goes down and can only be replenished by hitting an enemy.

New Weapons

At the difficulty/options title screen, enter the code Up, X, Right, Y, Down, Z, Left, Y, Up, X. To select a weapon, hold down one of the action buttons at the Episode 1 screen. Hold A or X for normal weapon, B for red lasers, C for sidewinders, Y for multi-shot, or Z for wide shot.

First, enter the "New Weapons" code as shown above. Next, at the same screen, press Left, Left, Right, Right, Down, Up, Down, Up, L button, R button; you'll hear the confirmation sound again. Start the game to find that the dragon's rider has vanished. The dragon has no standard missiles; only the lock-on weapon will work.

Sega Logo Man

Have you ever noticed the man who changes into a Sega logo during *Panzer Dragoon*'s demo mode? To get a closer look at the polygons that make up Mr. Sega Logo, grab Controller 2 as soon as he appears, hold the X, Y and Z buttons and press START. Now you can manipulate the image with Controller 2 as follows:

Right—Rotate screen clockwise

Left—Rotate screen counter-clockwise

A+Left—Rotate image counter-clockwise

Down—Zoom in

Up—Zoom out

A+Down—Tilt backward

A+Up—Tilt forward

X or Y—Hold either of these buttons to change the character's shading

A+B+C—Reset to the initial position and shading

When you're finished playing with the polygons, press START on Controller 1 to return to the game. (For some reason, this trick may not work if you didn't have Controller 2 plugged in when you turned the Saturn on.) If you have already entered the "New Weapons" code (above) the Sega Logo guy will change into a woman.

Elevator Action² Returns!

Er...sort of. Anyone out there remember *Elevator Action*? We sure do! The game debuted as a coin-op in the early eighties and made its way to the NES years later. *Elevator Action* hasn't made an appearance here in the U.S. for quite some time, but that could all change if Taito has anything to say about it. The Saturn version has been available in Japan for a couple of months; it looks like a whole lot of fun. But now that Taito's contract with Acclaim (*Bubble Bobble*) has expired, will we ever see it? Once Taito finds itself a new publisher in the US—or decides to publish the game itself, as the company has done in the past—we just might. In any case, let's hope this little gem makes it to our shores sometime this year.

Secret Teams

There are dozens of hidden teams in the game; most of them are classic NFL and AFL line-ups, some are all-pro squads and several are teams from the little-known World League of American Football. To find them, simply access the "Team Selection" screen and enter one of the following codes. The cheats work for either team, so if—for example—you wanted to pit the '76 Vikings against the '95 Barcelona Dragons, you'd just put the NFL cursor on the left side, enter the Vikings code, then move the cursor to the right and enter the Dragons code. All codes are entered with the A, B and C buttons.

Secret Cheat

Choose "View Character" from the non-combat menu. When the screen says "View Which?", press and hold Left, A and C, then release all three buttons at once. When the character menus come up, press Left repeatedly; you'll start to see stats for a lot of strange characters with incredible weapons and armor. If you make these weird characters trade their treasures to the members of your party, you'll be able to get tons of important items quickly and easily. You can earn quick experience points by accepting the knight's quest—since you'll probably have immediate access to the weapon he asks for—and you can sell the unused weapons for plenty of gold.

MORTAL KOMBAT

Secret Boss

To find the secret character, Reptile, you must play in one-player mode until you reach the stage called "The Pit". Now look at the moon in the background; if there is a shadow of any kind flying in front of the moon, follow these steps: You must win two perfect rounds (a "Double Flawless" victory) without ever using the Block button, and you must successfully perform your character's fatality on your opponent. If you do all of this, you'll be sent down to the bottom of the Pit to face the green ninja, Reptile. If there is no shadow flying in front of the moon, you cannot reach Reptile. The "Super Cheat Code" below can help you; turn on Flag 2 at the cheat menu to guarantee a shadow in front of the moon on the Pit stage.

Arcade Mode

Wait for the screen which says, "The word 'code' has many different definitions," etc. Press A, B, A, C, A, B, B. You'll hear Scorpion say, "Get over here!" as the letters turn blood-red. You've just activated "Mode A," with all fatalities and blood effects intact.

Super Cheat Code

At the "Game Start/Options" screen, spell the word "DULLARD" with the controller by pressing Down, Up, Left, Left, A, Right, Down. A third menu item called "Cheat Enabled" will appear. Highlight this new option and press START; you'll get a hidden configuration menu with new options as follows:

- Fighter 1/Fighter 2—Control what characters will be seen in the "Demo" mode (see below).
- Plan Base—Fight your opponents in a predetermined order in the 1-player mode.
- Chop-Chop—Allows you to choose which materials you'll be shattering in the block-breaking Bonus round; this only works when you enter the Bonus stage from this cheat menu by choosing "Chop-Chop" under the "Demo" option.
- 1 Play Chop/2 Play Chop—These numbers determine the frequency with which the Bonus stage appears during the game. Choose "1" to make the bonus stage appear after every battle or "6" to stall it for six battles. "0" disables the Bonus stage entirely.
- Demo—This option will show you different sequences from the game; just pick a scene and press the A button to view it.
- FLAG0/FLAG1—Player 1 and/or Player 2 starts each round in "Danger" mode; one hit and you're dead.
- FLAG2—Guarantees a shadow in front of the moon on the Pit stage.
- FLAG3—Changes the moon shadow into the head of Fergus McGovern of Probe Software.
- FLAG4—Gives you Reptile hints before every battle.
- FLAGS—Gives you infinite credits.
- FLAG6—The computer does fatalities on you in one-player mode.
- FLAG7—Locks in the background at the Palace Gates stage all the way up to the endurance match.
- Blood On—Turns on the blood effects and arcade fatalities.
- Cheat On—Turn this "Off" to deactivate all of the flags simultaneously; otherwise, leave it in the default "On" position.
- 1st Map—Use this to select the starting scenario or background. If you choose to start at the Pit, you will always get a shadow in front of the moon, which makes it easier to find Reptile.

Test Modes

At the options menu, put the cursor on

"DONE!" and press Left, Down, Left, Right, Down, Right, Left, Left, Right, Right. A new menu option called "Test Modes" will appear. The new menu options allow you to make either player invincible, put either character in "Danger" mode, choose any background, set free play, make the computer do fatalities and more.

Fergality

At the Test Modes menu, set the Background to 6 and turn on the "Oooh, Nasty!" option. Play the game as Rayden, and when it's time to do a fatality on your opponent, press Away, Away, Away, Block. That weird character is Fergus McGovern of Probe Software, developer of the Genesis version of MKII.

MORTAL KOMBAT II (32X)

Test Modes

At the options menu, put the cursor on "DONE!" and press Left, Down, Right, Right, Down, Left, Left, Left, Right, Right, Right. A new menu option called "Test Modes" will appear, giving you options similar to the Genesis cheat menus described above.

MORTAL KOMBAT 3

Play as Smoke

When the MK3 logo appears at the beginning of the game and you hear a gong, press A, B, B, A, Down, A, B, B, A, Down, Up, Up. You'll hear Shao Kahn say "Smoke" and the background color will change from black to blood-red. Now Smoke is a playable character in both the one- and two-player modes.

Endurance Mode

At the main menu, highlight the words "Start Game", hold the A and C buttons and press START. This takes you to a hidden character-select screen in which both players can choose up to eight fighters for an Endurance match. Press START to register for the battle, then use Left and Right on the D-pad to choose a fighter for each box in the line-up. Press B to choose a fighter at random for the current box, or hold Up and press START for a random selection of characters for all boxes. Choosing the dragon logo is the same as choosing a character at random, but you won't know who the character is until his or her turn comes up during the fight. With a Sega Tap adapter, up to four players can participate.

Secret Cheat Menus

At the main menu, press A, C, Up, B, Up, B, A, Down. A new menu item called "Cheats" will appear. Choose it, and you'll get a secret menu with several new options. "Sound Test" lets you listen to all of the sound effects and music from the game, "Continues" allows you to change the number of credits in a one-player game (up to 95) and "Bio Screen" lets you see any character's biography simply by pressing the START button.

Also at the main menu, press B, A, Down, Left, A, Down, C, Right, Up, Down. Another new menu item called "Secrets" will appear. The "Timer" option allows you to change the speed of the game clock, or switch it off entirely. "Win Screen" lets you see the ending story of any character by pressing the START button, and "Kombat Zone" allows you to choose which stage you'll be playing in when you start the game.

Another cheat code that can be entered at the main menu is C, Right, A, Left, A, Up, C, Right, A, Left, A, Up, which gives you a "Killer Codes" menu. "Quick End" lets you perform fatalities, babalities, etc. with just one or two buttons, usually the last button (or combination of buttons) in the series when you perform the finishing move normally. (For example: the sequence

for Jax's normal Friendship move ends with the LOW KICK button. If you set the "Quick End" option to "Friendships", you can do Jax's Friendship move by simply pressing the LOW KICK button once when the screen says "Finish Him!") The "Smoke" option gives you the ability to activate Smoke as a playable character without the hassle of entering the "Play as Smoke" code described above, and "Bosses" lets you choose Shao Kahn or Motaro as controllable characters—but only in two-player mode. "Play Hidden Game" lets you sample the hidden shooter game which appears when the battle counter reaches 100 in the normal game; hold any button after you lose your last ship to see some statistics about your performance.

- Slow-Motion—Press START to pause, then hold the B button to play in slow motion. If you tap the C button while paused, you'll advance the action one "frame" at a time.

Chaos Emeralds Cheat

At the stage-select menu (see above), highlight "Sound Test" and listen to sounds 04, 01, 02 and 06 in order; you'll hear the fanfare that sounds when you get a Chaos Emerald. This code gives you all of the Chaos Emeralds; you can grab 50 rings and jump to change into Super Sonic. You'll also be able to see the "good" ending when you beat the game.

Debug Mode

At the stage-select menu (see above), highlight "Sound Test" and listen to sounds 01, 09, 09, 02, 01, 01, 02 and 04 in order; you'll hear a chime to confirm. Now highlight the name of any stage, hold the A button and press START; don't release A until the stage begins. See the codes for the original Sonic the Hedgehog above to find out how the debug mode works; the only difference is that you don't get invincibility when you enter the Debug Mode in Sonic 2.

"Night" Mode

Enter the "Debug Mode" code above, then highlight the name of any stage at the stage-select menu, hold the C button and press START. This darkens the graphics, making it appear as if you're playing at night.

SONIC THE HEDGEHOG 3

Stage Select

After the Sega logo appears at the start of the game, you'll see a blurry scene of Sonic rushing toward you. The instant Sonic appears, quickly press Up, Up, Down, Down, Up, Up, Up, Up. You'll hear a chime to confirm the code. Note: This is a very difficult code to enter. You must press the buttons at a consistent speed, starting at the exact moment when the screen turns black; you should finish entering the code just a split-second before the screen turns pure white. Use a very light touch on the D-pad and press Up and Down evenly, making sure not to touch the diagonals. If you don't hear the chime, just reset and try again. Once you've done it right, press Up or Down at the title screen menu until you see a new item called "Sound Test"; this gives you a stage-select and sound test menu. The list even includes the names of zones that were taken out of the game before it was released. You can't play these stages, but you can hear the music from them with the Sound Test option. With the code in place, you have access to the following features:

- System Reset—Press START to pause the game, then press A to reset to the title screen.
- Slow-Motion—Press START to pause, then hold the B button to play in slow motion. If you tap the C button while paused, you'll advance the action one "frame" at a time.

Debug Mode

At the stage-select menu (see above), highlight the name of any stage, hold the A button and press START; don't release A until the stage begins. See the codes for the original Sonic the Hedgehog above to find out how the debug mode works; the only difference is that you don't get invincibility when you enter the

Debug Mode in Sonic 3. However, if you get killed when playing in Debug Mode, just press the B button quickly before Sonic falls off the screen with the surprised expression on his face; this will change him into an object and freeze the action. Now just use the D-pad to move the object to a safe place and press B to change back into a healthy Sonic.

"Night" Mode

At the stage-select menu (see above), highlight the name of any stage, hold the C button and press START. This darkens the graphics, making it appear as if you're playing at night.

SPACE HARRIER (32X)

Arcade Mode

When the Sega logo appears, hold A+C and hit START on Controller 2. You'll hear a voice say, "Get ready!" and the words "Insert Coins" will appear at the title screen instead of "Press Start". Now you're in Arcade Mode, which allows you to use your continues to keep the game going instead of returning to the title screen and starting at the beginning of the last "checkpoint" stage. Note that you can't access the option menu in Arcade Mode; if you need to do so, just set the options first, then wait for the demo to return to the Sega logo before entering the code.

SPIDER-MAN: WEB OF FIRE (32X)

Cheat Mode

Note: You must have a six-button controller to use these cheats. While the Sega logo is on the screen, press Up, Right, Left, A, Z, Y. You'll hear the sound of breaking glass to confirm the code. Note: You can't do these cheats without a six-button controller because, in three-button mode, the game has no pause feature.

Erase Third Strike

If you strike out, quickly pause the game before the pitcher gets the ball back from the catcher; you may have to press START several times before you get it to register. Now press C to restart the game, and you'll see that the same batter is still at the plate with just two strikes, as if the strikeout had never happened.

TOUGHMAN CONTEST

Each of the following codes should be entered at the password screen. If you've entered the code correctly, the name of the cheat will show up at the game set-up menu.

Director's Cut

Enter the password RUBE. Start the game. Fighter 2 is headless and bleeding.

Stealth Mode

Enter the password FQSTER. Start the game. Fighter 2 is the Noob Saibot of Toughman Boxing.

To the Death Mode

Enter the password 2LT. Start the game. Time is infinite. The first fighter to get three knock-downs wins.

Caffeinated Mode

Enter the password HYPER. The game is played at double speed.

Iron Man Mode

Enter the password MAXX. Fighter 1 takes no damage. Use this to try to finish the game, but remember that the CPU can still beat you on points, so you are not guaranteed victory.

All The Moves

Enter the password MRBUCKEYE. Start the game. You can throw all of the power punches

no matter what fighter configuration you set up.

Little Napoleon

Enter the password WEASEL. Fighter 2 will be drawn 32 pixels shorter than normal. Don't try for the temples because you can only hit him with body shots.

Whoop Ass Mode

Enter the password SUPERG. Start the game. The CPU difficulty is as high as you can get. The CPU will probably beat you.

Nuclear Waste Man

Enter the password NUCLEAR. Start the game. Your opponent is glowing with nuclear waste.

TOY STORY

Invincibility

Complete the game's first stage; then, at the start of the second stage ("Red Alert!") you must collect the three stars above the toybox. Now move to the right and collect four more stars for a total of seven; if you accidentally grab more than seven, the cheat won't work. Once you've collected seven stars, jump into the toybox and hold Down on the D-pad for six seconds. You'll see Woody's health star begin to spin around, indicating that you are now invincible for the rest of the game.

Stage Skip

At the start of the game, wait for the Toy Story title screen that shows Woody glaring at Buzz Lightyear while the words "PRESS START" are flashing, then spell the word "abracadabra" on the control pad by pressing A, B, Right, A, C, A, Down, A, B, Right, A. You'll hear Woody yell, "Hot! Hot! Hot!" to confirm the code. Now start the game; when you want to skip a stage, just hit START and press A while the game is paused to warp immediately to the end.

TYRANTS

Hidden Sinistar Game

To play a hidden game that's based on the classic Williams shoot-'em-up, *Sinistar*, choose "LOAD/SAVE" from the "OPTIONS" menu and enter "JOOLS" as your password. Use the B button to shoot at your enemies and use the C button to fire the Sinibombs.

ULTIMATE MORTAL KOMBAT 3

Secret Cheat Menus

At the main menu—the one that says "Start Game/Options"—press A, C, Up, B, Up, B, A, Down. You'll hear Shao Kahn say, "Excellent!" and three new menu options will appear. "Cheats" gives you a sound test, a "Bio Screen" select and the ability to give yourself up to 9S continues. "Secrets" lets you adjust or disable the timer, see any fighter's "Win Screen" and choose any Kombat Zone. "Killer Codes" lets you perform "Quick End" finishing moves, activate Shao Kahn or Motaro as playable characters in two-player games or play the hidden shoot-'em-up game. See the description of "Quick Ends" in the tip section under *Mortal Kombat 3* for more information on how they work.

VECTORMAN

Hidden Game + Level Warps

When the Sega logo appears at start-up, notice that you can move Vectorman around the screen with Controller 1. To find a hidden game, move Vectorman under the Sega logo and shoot straight up at it exactly 24 times. Next, make Vectorman jump up and hit his head on the logo exactly 12 times. You'll see the words "Get Ready" on the screen, then the letters "S", "E", "G" and "A" will begin to fall from the sky; 120 of them, to be exact. If you catch between 90 and 109 letters, you'll be able to start the

game at Day 5; if you can catch 110 letters or more, you'll warp to Day 10.

Blow Up Sega

Also at the Sega logo screen, stand on the ground just slightly to the right of the logo and fire your weapon straight up into the air. There's a TV set hidden just off the screen; if you blow it up, it will reveal an Orb power-up. (You'll have to jump up from the logo to grab it.) If you detonate the Orb, the Sega logo will go dark and the background will stop moving.

Cheat Codes

Vectorman has tons of cheats that can be activated during the game with the following sequence: Press START to pause, enter the code, then press START to unpause. Try the following codes while the game is paused for different effects:

ABRACADABRA (A, B, Right, A, C, A, Down, A, B, Right, A)—Refill your energy counter at any time.

BALL or BALD (B, A, Left, Left or B, A, Left, Down)—See the programmers' debugging coordinates.

ABACABB (A, B, A, C, A, B, B)—Five dots will appear around Vectorman and follow him wherever he goes.

DRACULA (Down, Right, A, C, Up, Left, A)—When you get hit, the game will slow down in order to help you to recover safely.

CALL A CAB (C, A, Left, Left, A, C, A, B)—Vectorman turns into a small arrow. This works like a level warp; you can move the arrow anywhere in the current level without taking any damage, so use it to skip the tougher parts of the game. You can't shoot TVs or collect power-ups while you're an arrow, but you can destroy many enemies just by touching them. When you want to change back into Vectorman, just pause and enter the CALL A CAB code again.

Super Cheat Menu

At the Options menu, press A, B, B, A, Down, A, B, B, A. You'll be taken to a top-secret cheat menu that allows you to adjust your health meter and start at any stage with any weapon.

Press START at any time during the game to pause, then press Up, Right, A, B, A, Down, Left, A, Down. When you unpause, you'll see a top-secret cheat menu with sound and music test options as well as a full stage select menu that allows you to warp to any stage in the game, including any of the ending screens, the bonus rounds and even a special testing stage called "Ron's Test Level".

iClub Nintendo: Magnifico!

When Tyrone went to the Amusement Showcase International expo in Las Vegas, he saw lots of cool new arcade games and met a lot of interesting people. One of the most unique goodies he brought back was a copy of a magazine called *Club NINTENDO* which was given to him by one of the magazine's contributors. It's basically the Spanish-language equivalent of *NINTENDO POWER*, sold in Mexico. We flipped through it and were surprised at the great layouts and quality of information in its pages; it even has a tip section with some *Mortal Kombat Trilogy* codes that we didn't know about! The next time you're traveling in Mexico, check the newsstands for this fine publication; even if you don't understand Spanish, you'll find that video games speak a universal language.

Enter the game's first stage, "Pirate Panic"—it doesn't matter if you do this in a new game or a saved game. Walk to the right until you see the entrance to K. Rool's cabin. Watch out for the two bananas on the ground right in front of the door; you must avoid these two bananas throughout the entire sequence or else the trick will not work. Walk inside the cabin, but do NOT touch the red 1-Up balloon; just walk out immediately. Back outside, you must carefully jump over the two bananas without touching them. Now go to the right and grab the first bunch of bananas you see on top of a set of barrels. Next, get back into the cabin without touching the two bananas in front of the door. This time, grab the red balloon and exit. Finally, go back to the barrels again and grab that same bunch of bananas, returning to the cabin without touching the two bananas in front of the door. When you enter, you'll find a spinning coin that gives you incredible 75 Kremcoins. Now you can access the Lost World through Klubba's Kiosks on any part of the island.

ASAVE—with this code in place, your game will automatically be saved after you complete each level without having to go visit Wrinkly Kong.

COLOR—This code makes Dixie's clothes purple and Kiddy's pajamas green; it also changes the colors of the flags that mark each completed level accordingly.

TUFST—Entering this password makes the game harder by removing all of the continue barrels from each level.

MERRY—This code changes the music in all of the game's bonus stages to a Christmas motif; it also changes the stars and bananas in the bonus stages to ornaments and presents.

Secret Level

If you hold both the L and R buttons on Controller 2 when you start the game with Controller 1, you'll be able to play an entire hidden level that's based on the Deutschland Moldavia headquarters stage from *The Peacekeepers*, another Jaleco game for the Super NES.

KILLER INSTINCT**Boss Code**

Choose Cinder as your character; then, at the "Vs." screen—the one that shows both characters' portraits just before the fight begins—hold Right on the D-pad and quickly press QUICK PUNCH, QUICK KICK, FIERCE PUNCH, MEDIUM KICK, MEDIUM PUNCH and FIERCE KICK. (In the default control configuration, that would be L, R, X, B, Y, A.) You'll hear the announcer say, "Eyedol!" When the fight starts, you'll be playing as the boss.

Speed Codes

There are four different "speed" codes; each of them consists of several buttons that must be held down at the "Vs." screen just before the fight begins. If you've entered the code correctly, you'll hear a punching sound that's exactly like the sound the game makes when you pause it during a battle. Note that in two-player mode, both players must enter the codes in order to make them work.

Slow Speed: Hold Left + R + A + B

Fast Speed: Hold Right + L + X + Y

Mission 10—QUVMOH

STREET FIGHTER ALPHA 2**Secret Stage**

Select "Versus Mode" and choose your characters. When the stage-select menu appears, highlight Sagat's stage and hold the START button for four seconds, then press an action button before you release START. You'll get to fight in a secret stage, a grassy Australian field.

Play as "Classic" Chun-Li

At the character-select screen, highlight Chun-Li, hold the START button for at least three seconds, then press any button to choose her before releasing START. You'll see her costume change to the way she looked in Street Fighter II Champion Edition; now her fireball is a "charged" move.

STREET FIGHTER II**Character Vs. Same Character**

As the Capcom logo is starting to appear at the start of the game, quickly press Down, R, Up, L, Y, B. You'll hear a sound to confirm the code; now both players can choose the same fighter in a two-player game. With this code in place, you'll also be able to listen to selection #30 from the Music Test menu at the option screen; this previously-inaccessible tune is the song that plays at the end of the game.

Character Vs. Same Character/Same Color

Select a one-player game and don't choose any character. After a few seconds, the computer will choose Ryu. When the match begins, press START on Controller 2 and choose Ken, then let the timer run out for four rounds for a "draw game." When the "Continue" screen appears, press START on Controller 2 and choose Ken to play against a same-color Ken. If you start this trick on Controller 2, let the computer pick Ken, then interrupt with Controller 1, pick Ryu for the "draw game" and pick Ryu on Controller 1 when you continue; you'll fight a same-color Ryu.

Remove Energy Bars

Select "Option Mode" from the main menu and simply press START to return to the title screen, repeating this process 27 times. You'll

be able to fight for one round with no timer or energy bars at the top of the screen in either the one-player or "VS." modes. All music and sound effects will be disabled, too.

STREET FIGHTER II TURBO**Disable Special Moves—Player One**

If you complete a race in the one-player time trials without touching any obstacles or barriers, choose the "Replay" option to watch your performance and you'll find that you can rotate your viewpoint by using the L and R buttons.

2nd Player 1P Mode

Hold the L and R buttons while pressing START on the second controller to play in the GP mode or Time Trials with your character on the bottom half of the screen.

SUPER STAR WARS**Sound Test + Screen Codes**

During any side-scrolling stage, hold A + B + X + Y and press START to enter the sound test screen. Press START again to go back to the game. Return to the sound test by executing the same trick. You'll notice that the words under SOUND TEST have changed. Repeat this trick several times until you've revealed the following two codes: X, B, B, A, Y for five continuities and Y, Y, X, X, A, B, X, A for the light saber. These codes can be entered at the title screen as described under "Debug Menu" below.

Debug Menu

When the words "Start Game" and "Option Menu" appear after the title screen, quickly press A, A, A, A, X, B, B, B, Y, X, X, X, X, A, Y, Y, Y, Y, B—listen for the sound of a Jawa to confirm the code. Note that this code will only work the first time the main menu appears after you turn the game on; the LucasArts

logo must appear before the game is ready to accept the code, and you only get one chance to put it in before the demo starts. If you screw up, turn the power off, remove the cartridge and start over. Once you have successfully entered the code, start the game and you'll have access to the following special functions:

- Character Select—A character-select menu will appear before each side-scrolling stage.
- Stage Skip—Press START on Controller 2 to skip the current stage.
- Debug Menu—During any side-scrolling stage, press L + R on Controller 2 to call up the "Game Debug Menu", which lets you choose any stage, change characters or weapons or even boost your life counter. (The "Health" option doesn't mean much, since your health meter will always be refilled when you exit the debug menu.)
- Invincibility/Map Mode—During any side-scrolling stage, grab Controller 2, hold A + B + X + Y and press SELECT. Release the buttons and your character's X and Y coordinates will be displayed on the screen. You'll also be nearly invincible, with the ability to walk through walls and even drop through floors (by pressing Down and B simultaneously.)
